The CDC has indicated on their website for months that 92% of adults have taken at least one shot of a COVID-19 vaccine. Yet a prior surveys Zogby and Rasmussen indicated that fraction may only be two thirds.

Now a recent, independent report from Northeastern University has found that the proportion of unvaccinated is not 8% but more like 25%. This agrees separately with a Kaiser Family Foundation report. Apparently the CDC vaccination administration system is not accurately identifying each person by a unique identifier and linking each injection to that code. Therefore, if a patient does not have the prior vaccine card or goes to a different vaccines center with slightly different name spelling, then the encounter is counted as a brand new person coming forward. This is leading to double-counting of “vaccinated” in CDC records.

The COVID States Project

From: The COVID-19 Consortium for Understanding the Public’s Policy Preferences Across States

A joint project of:

Northeastern University, Harvard University, Rutgers University, and Northwestern University

Authors: David Lazer (Northeastern University); Alexi Quintana (Northeastern University); Ata Uslu (Northeastern University); Roy H. Perlis (Harvard Medical School); Matthew A. Baum (Harvard University); James Druckman (Northwestern University); Kristin Lunz Trujillo (Northeastern University); Jon Green (Northeastern University); Katherine Ognyanova (Rutgers University); Hong Qu (Northeastern University); Alauna C. Safarpour (Harvard University); Mauricio Santillana (Harvard Medical School), and Jonathan Schulman, (Northwestern University)

Figure 3: Temporal trajectory of percentage of adults with at least a single shot of vaccine

CDC=Centers for Disease Control, CS=COVID States Project, KFF=Kaiser Family Foundation

These findings give new hope to the unvaccinated that they are not alone in holding strong against the adverse safety profile of the COVID-19 vaccines and standing up for the preservation of good health and right to decide what is injected into their bodies.

The Worldwide Corona Crisis, Global Coup d'Etat Against Humanity

by Michel Chossudovsky

Michel Chossudovsky reviews in detail how this insidious project “destroys people’s lives”. He provides a comprehensive analysis of everything you need to know about the “pandemic” — from the medical dimensions to the economic and social repercussions, political underpinnings, and mental and psychological impacts.

“My objective as an author is to inform people worldwide and refute the official narrative which has been used as a justification to destabilize the economic and social fabric of entire countries, followed by the imposition of the “deadly” COVID-19 “vaccine”. This crisis affects humanity in its entirety: almost 8 billion people. We stand in solidarity with our fellow human beings and our children worldwide. Truth is a powerful instrument.”
