"More than 5.55 billion people worldwide have received a dose of a COVID-19 vaccine, equal to about 72.3 percent of the world population," [observed the New York Times](#) in March of this year.

In other words, in the space of twenty-seven months (since the beginning of the rollout), the vaccinators had managed to inject nearly two thirds of the world's inhabitants with their COVID medicaments. Furthermore, the majority of the vaccinated were subjected to more than one dose. In total more than [13.5 billion](#) injections were administered across the planet.

To pull this off in such a short period of time makes the COVID vaccination campaign one of the most impressive logistical and organizational feats ever accomplished.

A fatal flaw, however, has marred the whole COVID vaccination enterprise: it was a blatant fraud from beginning to end.

To begin with, the whole thing was based on a false premise. We were told that in SARS-CoV-2 we were up against a highly dangerous virus that posed a potentially lethal threat to those who contracted it and that vaccines were the only sure way to escape the scourge. This was a lie. For healthy people of productive age the infection fatality rate was about as high as that of the seasonal flu. For healthy children and young people the danger of a serious outcome was virtually nil.

Lauded as both "safe and effective," the vaccines turned out to be anything but that. To begin with, it quickly became quite clear that the vaccines would not protect against infection.

Only some five months after the start of the vaccination campaign, the authorities started

speaking about the need for a booster. This obviously meant that the initial two doses of Pfizer and Moderna (one in the case of Johnson & Johnson) failed to protect their recipients from the SARS-CoV-2 virus beyond a very limited amount of time.

But the first booster also failed to confer any lasting protection and soon a second booster was required. The second booster, however, proved as ineffective as the first booster and a third booster was said to be necessary. But the third booster also failed, and a fourth booster was needed.

Currently, we are on the sixth shot and counting. And this less than 34 months after the COVID vaccines were first introduced. In other words, to keep fully vaccinated as per recommendations from our health authorities, one would have had to have been injected every five months or so.

But even those who got every booster on schedule were not protected against contracting COVID-19. We learn from the [website](#) of the Mayo Clinic: “People who are up to date on their vaccines can get breakthrough infections. They can then spread the virus to others.”

When pressed about this issue during a hearing of the European Parliament in October of last year, a [Pfizer representative admitted](#) that the company had never tested the vaccines to see whether they would prevent transmission.

What an astonishing admission that was. The objective of vaccines has always been to protect their recipients from the disease for which they were administered thus limiting the spread of infection in the population.

The COVID-19 “vaccines” are the first vaccines in history that do neither protect against infection nor slow its spread.

Do you remember when Joe Biden [promised](#) us during a Townhall meeting in 2021 that “you’re not going to get COVID if you have these vaccinations.”

Turns out this was a massive lie. It was brazen disinformation coming from the very top of the US government.

The majority of the injected came down with COVID and most of them more than once. In fact, it appears that getting “vaccinated” against COVID [increases one’s chances](#) of contracting COVID. Just ask [Joe and Jill Biden](#) who despite being jabbed multiple times have been repeatedly sickened with the disease.

We must ask ourselves, “What kind of vaccines are these?” Never has the world witnessed such a thing — vaccines that require a booster every few months and apparently make their recipients more likely to fall ill with the very disease against which they are supposed to protect.

Neither will the vaccines protect people from serious COVID outcomes. The majority of people who [get serious COVID or die of COVID](#) have been vaccinated.

That the vaccines are grossly ineffective is becoming clear even to most of those who were previously brainwashed by our corrupt governments and medical authorities. A [study](#) published earlier this month found that “uptake of boosters has stalled in the United States at less than 20% of the eligible population.” Please note that the 20% uptake figure refers to

only the *eligible* population. This means that only a small fraction of the whole population has opted to receive the COVID injections. Only 17% of Americans chose to receive [the previous booster](#). This time around the number will be even lower. By now most people have seen through the fraud.

Not only are the vaccines ineffective, but they are also very dangerous. Since the rollout of the vaccination campaign, there has been an explosion of adverse reaction reports across the world. In the United States, the reports related to the COVID shots in the VAERS database exceed those related to all the other vaccines combined. There is no doubt that the COVID vaccines are the most dangerous vaccines ever devised and that by a long shot.

Already early in 2022, there were [more than one thousand articles and studies](#) published in scientific journals discussing the adverse effects of the COVID-19 vaccines. Some of the effects listed include conditions such as pericarditis, myopericarditis, death, Guillain-Barre syndrome, acute venous thromboembolism, lymphadenopathy, acute thrombosis of the coronary tree, cerebral venous sinus thrombosis, portal vein thrombosis, T-cell lymphoma, aphasia, and thrombophilia among others.

The wider public, however, was never informed about these studies by our government and the medical establishment, both of which are corrupted to the core.

According to a [survey](#) conducted by Rasmussen at the end of last year, nearly 30 percent of Americans thought they knew someone who had been killed by a COVID vaccine. This number is undoubtedly much higher today as we keep hearing the news of healthy people who keep inexplicably dying. The stories of hundreds of healthy athletes who have been [collapsing and dying](#) since the beginning of the vaccination campaign are especially revealing.

According to researcher Steve Kirsch [the death rate](#) of the COVID vaccines is roughly 1 in 1000 doses. This translates into 676,000 dead Americans. It turns out, however, that Kirsch's analysis, which is based on a breakdown of VAERS figures, may be too conservative. Working with data from 17 countries on all-cause mortality, researchers with Canada-based *Correlation Research in the Public Interest* have come [to the conclusion](#) that the death rate of the COVID-19 shots is somewhere in the region of 1 in 800 doses. They estimate that the vaccines have killed some 17 million people worldwide.

As a point of comparison, the number of people exterminated by the Nazis in the Holocaust was about 6 million.

If even the most conservative estimates are correct, the COVID-19 vaccination campaign, the bulk of which was carried out under false pretences and coercive mandates, constitutes the greatest crime ever committed against humanity.

Unbelievably, so far no one — either in government or in the medical establishment — has been held responsible for this travesty.

The Worldwide Corona Crisis, Global Coup d'Etat Against Humanity

by Michel Chossudovsky

Michel Chossudovsky reviews in detail how this insidious project “destroys people’s lives”. He provides a comprehensive analysis of everything you need to know about the “pandemic” — from the medical dimensions to the economic and social repercussions, political underpinnings, and mental and psychological impacts.

“My objective as an author is to inform people worldwide and refute the official narrative which has been used as a justification to destabilize the economic and social fabric of entire countries, followed by the imposition of the “deadly” COVID-19 “vaccine”. This crisis affects humanity in its entirety: almost 8 billion people. We stand in solidarity with our fellow human beings and our children worldwide. Truth is a powerful instrument.”

Reviews

This is an in-depth resource of great interest if it is the wider perspective you are motivated to understand a little better, the author is very knowledgeable about geopolitics and this comes out in the way Covid is contextualized. —Dr. Mike Yeadon

In this war against humanity in which we find ourselves, in this singular, irregular and massive assault against liberty and the goodness of people, Chossudovsky’s book is a rock upon which to sustain our fight. —Dr. Emanuel Garcia

In fifteen concise science-based chapters, Michel traces the false covid pandemic, explaining how a PCR test, producing up to 97% proven false positives, combined with a relentless 24/7 fear campaign, was able to create a worldwide panic-laden “plandemic”; that this plandemic would never have been possible without the infamous DNA-modifying Polymerase Chain Reaction test - which to this day is being pushed on a majority of innocent people who have no clue. His conclusions are evidenced by renown scientists. —Peter Koenig

Professor Chossudovsky exposes the truth that “there is no causal relationship between the virus and economic variables.” In other words, it was not COVID-19 but, rather, the deliberate implementation of the illogical, scientifically baseless lockdowns that caused the shutdown of the global economy. -David Skripac

A reading of Chossudovsky’s book provides a comprehensive lesson in how there is a global coup d’état under way called “The Great Reset” that if not resisted and defeated by freedom loving people everywhere will result in a dystopian future not yet imagined. Pass on this free gift from Professor Chossudovsky before it’s too late. You will not find so much valuable information and analysis in one place. -Edward Curtin
