When the [Springer Nature CUREUS Journal of Biomedical Sciences](#) retracted one of the most comprehensive and valid risk-benefit analyses of the COVID-19 vaccines, they probably had no idea the message would be greatly amplified and now fully published in a pair of papers in the *International Journal of Vaccine Theory, Practice, and Research*.

This manuscript evaluated all of the published data and has completely overturned a false narrative held by government agencies and the [American College of Cardiology](#) who **erroneously assert that SARS-CoV-2 infection poses a greater risk of heart damage than vaccination**. [Mead et al](#) importantly conclude the vaccines cause actual adjudicated and oftentimes fatal myocarditis while the infection remains a theoretical risk without adjudicated, autopsy proven cases.

COVID-19 Modified mRNA "Vaccines": Lessons Learned from Clinical Trials, Mass Vaccination, and the Bio-Pharmaceutical Complex, Part 2

Figure 2. Actual risk of myocarditis in modmRNA-injected individuals (based on prospective studies, with clinical testing for asymptomatic myocarditis) greatly surpasses the theoretical risk of myocarditis due to the wild-type SARS-CoV-2 (based primarily on passive surveillance reporting of symptomatic cases).

Figure 4. Hamm reward analysis: observed harms vs. claimed benefits of the modmRNA injectables. Serious adverse events include premature death, cardiac arrest, and other well-documented harms ascribed to the COVID-19 modmRNA injections. The claimed benefits are based on theoretical estimates and extrapolations from clinical trial data, as well as numerous observational studies that claim to support for the "safe and effective" narrative yet cannot be trusted because they contain multiple biases, relying on flawed methodologies and spurious data.

The paper goes into great depth to enumerate harms from the shot along the lines of six domains where observed adverse events greatly outweigh claimed, theoretical benefits:

“We then categorize the principal adverse events associated with the modmRNA products with a brief systems-based synopsis of each of the six domains of potential harms: (1) cardiovascular, (2) neurological, (3) hematologic; (4) immunological, (5) oncological, and (6) reproductive. We conclude with a discussion of the primary public health and regulatory issues arising from this evidence-informed synthesis of the literature and reiterate the urgency of imposing a global moratorium on the modmRNA-LNP-based platform.”

The final call is clear, the COVID-19 mass, indiscriminate vaccination campaign should come to an end and with it, the four-year long false “safe and effective” narrative from the [Bio-Pharmaceutical Complex](#).

The Worldwide Corona Crisis, Global Coup d’Etat Against Humanity

by Michel Chossudovsky

Michel Chossudovsky reviews in detail how this insidious project “destroys people’s lives”. He provides a comprehensive analysis of everything you need to know about the “pandemic” — from the medical dimensions to the economic and social repercussions, political underpinnings, and mental and psychological impacts.

“My objective as an author is to inform people worldwide and refute the official narrative which has been used as a justification to destabilize the economic and social fabric of entire countries, followed by the imposition of the “deadly” COVID-19 “vaccine”. This crisis affects

humanity in its entirety: almost 8 billion people. We stand in solidarity with our fellow human beings and our children worldwide. Truth is a powerful instrument.”

Reviews

This is an in-depth resource of great interest if it is the wider perspective you are motivated to understand a little better, the author is very knowledgeable about geopolitics and this comes out in the way Covid is contextualized. —Dr. Mike Yeadon

In this war against humanity in which we find ourselves, in this singular, irregular and massive assault against liberty and the goodness of people, Chossudovsky's book is a rock upon which to sustain our fight. -Dr. Emanuel Garcia

In fifteen concise science-based chapters, Michel traces the false covid pandemic, explaining how a PCR test, producing up to 97% proven false positives, combined with a relentless 24/7 fear campaign, was able to create a worldwide panic-laden “plandemic”; that this plandemic would never have been possible without the infamous DNA-modifying Polymerase Chain Reaction test - which to this day is being pushed on a majority of innocent people who have no clue. His conclusions are evidenced by renown scientists. —Peter Koenig

Professor Chossudovsky exposes the truth that “there is no causal relationship between the virus and economic variables.” In other words, it was not COVID-19 but, rather, the deliberate implementation of the illogical, scientifically baseless lockdowns that caused the shutdown of the global economy. -David Skripac

A reading of Chossudovsky's book provides a comprehensive lesson in how there is a global coup d'état under way called “The Great Reset” that if not resisted and defeated by freedom loving people everywhere will result in a dystopian future not yet imagined. Pass on this free gift from Professor Chossudovsky before it's too late. You will not find so much valuable information and analysis in one place. -Edward Curtin
