Customs and Border officials captured two small packages of Ivermectin and Hydroxychloroquine at Chicago’s O’Hare Airport recently. The two drugs would not have raised an eyebrow before the COVID pandemic. But since the Democrats and media politicized the completely safe, inexpensive and effective medications the Customs agents are on the lookout for these cheap drugs.

The agents captured packages of 100 Ivermectin pills, 32 Ivermectin pills and 40 hydroxychloroquine pills.

Meanwhile Mexican cartels continue to [smuggle record amounts of fentanyl](#) into the country this year.

[Newsweek](#) reported:

Shipments containing Ivermectin tablets and Hydroxychloroquine pills were recently seized by customs officials in Chicago.

According to a press release from Customs and Border Protection (CBP), the seizure happened at the international mail facility within Chicago’s O’Hare International Airport on October 4.

The press release said that while officers were conducting an x-ray inspection of a package from China, “officers noticed some discrepancies.” The package stated that it contained “decorative beads,” CBP said.

After officers noticed the discrepancies within this package, they conducted a further

investigation and discovered that instead of “decorative beads,” the package actually contained 100 tablets of Ivermectin...

...In addition to the package from China, CBP said that they intercepted another package arriving from Mexico that contained 32 more Ivermectin tablets and 40 Hydroxychloroquine pills.

Hydroxychloroquine was previously given emergency use authorization from the FDA for treatment against COVID-19 but on June, the agency repealed its authorization and warned against using it outside of a hospital setting.
