My Take...

There has been a tsunami of COVID-19 vaccine injuries and deaths in the US military, but there hasn't been much attention paid to the young military cadets from highly vaccinated countries who are dying suddenly and under mysterious circumstances.

Each of these cadets were 18-22 years old (one was 26). Sudden deaths shouldn't be happening in this age group and every death should be thoroughly investigated.

South Korea had a 22 year old military recruit collapse 5 days after taking his first Pfizer COVID-19 mRNA vaccine. He was found unresponsive at 8am hunched beside the bed, was taken to ER, had ventricular fibrillation, CPR was performed for 2 hours and he died ([click here](#)).

A very thorough autopsy by the Korean military proved his death was caused by the Pfizer mRNA vaccine. The Korean CDC acknowledged this case as a post Pfizer vaccine myocarditis death.

The Worldwide Corona Crisis, Global Coup d'Etat Against Humanity

by Michel Chossudovsky

Michel Chossudovsky reviews in detail how this insidious project “destroys people’s lives”. He provides a comprehensive analysis of everything you need to know about the “pandemic” — from the medical dimensions to the economic and social repercussions, political underpinnings, and mental and psychological impacts.

“My objective as an author is to inform people worldwide and refute the official narrative which has been used as a justification to destabilize the economic and social fabric of entire countries, followed by the imposition of the “deadly” COVID-19 “vaccine”. This crisis affects humanity in its entirety: almost 8 billion people. We stand in solidarity with our fellow human beings and our children worldwide. Truth is a powerful instrument.”
