Our thoughts are with the victims of the mRNA vaccine, which has been applied Worldwide. More than 14 billion doses for a World population of 8 billion people

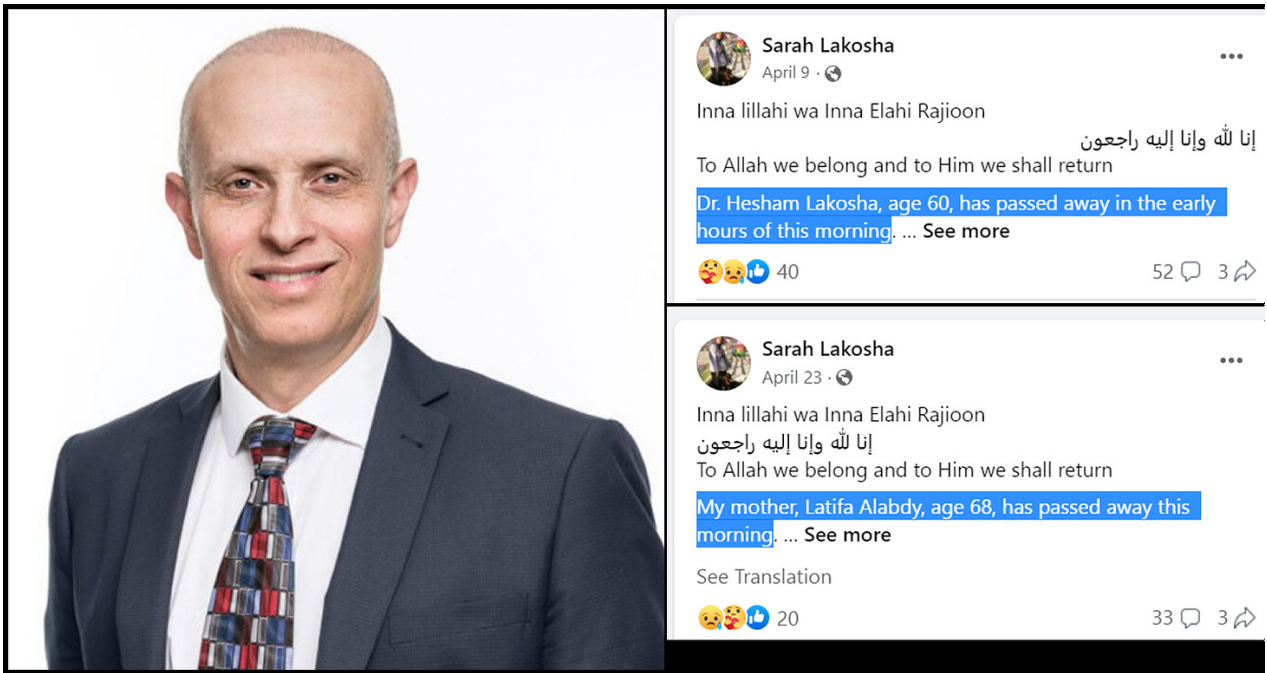

Michel Chossudovsky, Global Research, May 28, 2023

This may seem like a strange topic for an article, however, enough of these incidents have actually occurred. Family members often go together to get a COVID-19 vaccine and now we are seeing multiple sudden deaths in the same family.

If multiple family members die suddenly following COVID-19 vaccination, the big question is: did they get the same bad vaccine batch or vial?

Here are 11 families that had multiple sudden deaths:

CASE 1 - Halifax, NS - Fully COVID-19 vaccinated Dr. Hesham Lakosha, a physician & ophthalmologist died on April 9, 2023, allegedly from ALS and his ex-wife Latifa Alabdy (age 68) died two weeks later on April 23, 2023.

CASE 2 - Ontario - Kevin Aaron Meehan (age 36) died on March 28, 2023, and his sister Kerri Anne Meehan (age 49) died 3 weeks later on April 17, 2023.

Football Omar Achadoud died suddenly in his sleep last Saturday. This sad event was followed by another painful loss for the family three days later, the death of his father, Mbark, according to the Houthalen mosque (Province of Limburg).

Last Thursday, Omar Achadoud repatriated his sick father from Morocco for care in Belgium. The Montreuillois in shock after the announcement of the disappearance of Frédéric Wibaut

On Tuesday January 24, a vehicle was found in the carpooling area of Wally-Beaucamp. Inside, the inanimate body of Frédéric Wibaut, 46 years old

A native of the mining basin, Frédéric is Lensois but spent most of his time in Berck-sur-Mer from childhood. His parents have a house there and it is on the banks of the Channel that he makes his best childhood memories, with friends his age. Which will make him say throughout his life « *I am more Berckois than Lensois.* » He therefore logically moved into the station and with his wife Albane they would give birth to two boys, Charles and François. Frédéric excels in the medico-social, and his wife is a teacher of schools, a sportsman. First a specialist educator at the Cazin-Perrochaud association, he later became deputy director, before joining the House of Social Children (MECS) The poplars in Campagne les Hesdin. There he puts his sense of human at the service of children and adolescents in difficulty. **In June 2022 Frédéric and his children were hit hard by the disappearance of Albane, barely 44 years old.** Where they live in Verton, friends and acquaintances can't get back and cry with him. For those who know the couple, Albane's death is a gaping scar for Frédéric. No sooner had his wife left than he joined her. « *It was a heart attack* » is confirmed in his family.

To his children Charles and François, to his mom Micheline and to all those who knew and appreciated him, the editorial staff of the Réveil de Berck offers his sincere condolences.

My Take...

These unusual incidents of multiple sudden deaths of young people in one family, should be extremely rare.

To be clear, **I did not search for these 11 cases**. They were either sent to me or I stumbled upon them accidentally on social media. That means there are probably many more such situations that we haven't heard about.

If multiple members of a family took **COVID-19 mRNA vaccines and then died suddenly, this situation should be of interest to the medical community** for investigation and study.

Are there genetic mutations that are heritable and predispose certain families and their members to sudden death following COVID-19 vaccination? We don't know and the question is not even being asked.

It's interesting that these cases are coming to me from regular people, not from doctors. Also, the website [howbadismybatch.com](https://www.howbadismybatch.com) which tracks Pfizer & Moderna mRNA vaccine serial numbers with the VAERS system to see how toxic a particular vaccine batch is, in terms of

disabilities and deaths, wasn't created by doctors.

It now has over 111 million visitors.
