Summer in Croatia for a German doctor ended fatally. Namely, at the age of only 41, the father of two died suddenly.

Dr. **Klaus Ott** (41), an anesthesiology doctor at the University Hospital of Augsburg, lost his life from blood poisoning, [writes Fenix Magazine](#).

For his wife **Martin** and their two daughters **Luis** (8) i **Paul** (5) his death came suddenly.

“S dr. Otto loses a great colleague and doctor, who has always been concerned about the well-being of patients and employees”, they said from Augsburg University Hospital about the doctor’s death.

Shortly after arriving at a holiday destination in early June, Dr. Ott told his brother he had all the symptoms of a cold. His brother informed the public about the tragic case **Hartmut Ott**. As he felt worse, he went to the hospital: there he was diagnosed with streptococcus.

The bacterium reached the bloodstream and caused the organ to be canceled to the 41-year-old within a few hours.

Any help arrived too late: a doctor from Augsburg was dead twelve hours after arriving at the hospital.

A relaxing summer vacation with the family turned into a nightmare, the victim’s brother claims.

"Lesley had been on vacation with her beautiful family in Florida when she fell ill and was hospitalized last Thursday," Jennifer Dale, the vice president of recruiting at Gray Television, where Van Ness was working at the time of her death, wrote in a statement, per [Muddy River News](#).

"It is with a very heavy heart that we share some devastating news with you. Lesley Van Ness, who we have been so fortunate to have as part of the Gray family, passed away this (Monday) morning," Dale wrote. "Lesley and her husband Tom have two precious young boys. Please keep all of them in your prayers."

Additional information about her death was not shared, although according to her [obituary](#), she died in Naples.

My Take...

Why are COVID-19 vaccinated people dying suddenly on vacations? Theories:

1. Getting a "recent COVID-19 vaccine booster shot" to travel

2. Travel stress can trigger arrhythmia in those with post jab myocarditis
3. Flying increases risk of forming blood clots in vessels damaged by spike protein
4. Higher risk of developing infections, sepsis
5. Higher risk of seizures
6. Heat may affect contents of “vaccine”

The Worldwide Corona Crisis, Global Coup d’Etat Against Humanity

by Michel Chossudovsky

Michel Chossudovsky reviews in detail how this insidious project “destroys people’s lives”. He provides a comprehensive analysis of everything you need to know about the “pandemic” — from the medical dimensions to the economic and social repercussions, political underpinnings, and mental and psychological impacts.

“My objective as an author is to inform people worldwide and refute the official narrative which has been used as a justification to destabilize the economic and social fabric of entire countries, followed by the imposition of the “deadly” COVID-19 “vaccine”. This crisis affects humanity in its entirety: almost 8 billion people. We stand in solidarity with our fellow human beings and our children worldwide. Truth is a powerful instrument.”
