

Disbelief as “Green King Charles” Gives Royal Assent to New Gene Breeding Technology

King Charles III has committed an open act of betrayal of all bona fide farmers, and particularly of organic farmers.

May 6, 2023: Coronation of “Green King Charles”

*In one of the more shocking hypocrisies of this year so far, Charles III, King of England – considered to be a strong supporter of organic farming and environmental causes – **has given his Royal Assent to a biotechnology ‘innovation’ which will provide an open book for UK firms to alter the genome of animals and plants, so as to create novel engineered species and biotech ‘foods’.***

In taking this step Charles has committed an open act of betrayal of all bona fide farmers, and particularly of organic farmers.

[The Genetic Technology Precision Breeding Act 2023 was given the royal go ahead on 23rd March, 2023.\[1\]](#)

This piece of legislation will, for the time being, be unique to the UK, as such animal and plant biotech deformations are not allowed in the EU and many other countries.

A secondary deception relates to the marketing of such novel recombinant DNA experiments.

The UK government has stated that no separate definition will be given to gene technology engineered products, therefore no special labelling will be required.

Genetic Technology (Precision Breeding) Act 2023

2023 CHAPTER 6

An Act to make provision about the release and marketing of, and risk assessments relating to, precision bred plants and animals, and the marketing of food and feed produced from such plants and animals; and for connected purposes. [23rd March 2023]

BE IT ENACTED by the King's most Excellent Majesty, by and with the advice and consent of the Lords Spiritual and Temporal, and Commons, in this present Parliament assembled, and by the authority of the same, as follows:—

PART 1

PRECISION BREEDING: DEFINITIONS

1 Precision bred organism

- (1) In this Act “precision bred organism” means a precision bred plant or a precision bred animal.
- (2) For the purposes of this Act an organism is “precision bred” if—
 - (a) any feature of its genome results from the application of modern biotechnology,
 - (b) every feature of its genome that results from the application of modern biotechnology is stable,
 - (c) every feature of its genome that results from the application of modern biotechnology could have resulted from traditional processes, whether or not in conjunction with selection techniques, alone, and
 - (d) its genome does not contain any feature that results from the application of any artificial modification technique other than modern biotechnology.

The dark irony of the King of England launching **unlabelled biotech foods, animals and plants on citizens of his own country, is difficult to trump.**

Charles is already in conflict with the constitution of his country by standing shoulder to shoulder with Klaus Schwab in promoting the World Economic Forum's 'Great Reset'. One of the main objectives of which is to render nation states obsolete and to centralise all power within the control of a small despotic elite, whose stated intention is to make all private property illegal and to re-engineer human beings into Transhuman cyborgs.

May 6, 2023 Coronation of King Charles

On May 6, 2023, at his coronation in London, Charles will be officially crowned monarch of

the United Kingdom and its Commonwealth (colonies). A large empire.

As the centre piece of the coronation ceremony, Charles will swear 'The Coronation Oath', essentially pledging his allegiance to the people of Great Britain and to protecting the sovereignty of the country and its traditions.

If Charles does not break his relationship with the World Economic Forum before this point, he will be performing an act of treason. The implications of this are profound.

As yet, the British people have not woken-up to their fate. But should the truth emerge of this singularly blatant hypocrisy, the future of the British monarchy will be dark indeed.

The UK is officially recognised as a 'constitutional monarchy'. With an unrevoked Common Law constitution stretching back to the Magna Carta of 1215, the true political power lies with the people and not with parliament. Something which has been largely hidden from public knowledge.

If there is to be a future king or queen, the country needs that person to exercise his/her rite to stand-up against the continual parliamentary usurpation of the people's power.

The people need a monarch with some guts, some wisdom and a genuine respect for truth. Someone who will use his time-honoured constitutional powers to block anti-life legislation like The Genetic Technology Precision Breeding Act 2023; thus setting a proper precedent for Great Britain's 'first among equals' to act like a real King.
