

DNA Contamination in Bivalent COVID-19 “Vaccines”: Insights from Kevin McKernan

Moderna and Pfizer’s Bivalent COVID-19 mRNA "Vaccines" Exceed DNA Contamination Limits Set by the U.S. and Europe

By [Dr. Mark Trozzi](#)

Theme: [Science and Medicine](#)

Global Research, October 19, 2024

[Dr. Mark Trozzi](#)

The greatly respected geneticist [Kevin McKernan](#) and his team have presented their most recent research, now available in [preprint](#).

Using five different laboratory methods, McKernan and his team studied two vials each of Moderna’s and Pfizer’s bivalent “vaccines.” **Both brands contained levels of DNA contamination that exceeded the limits set by both the European Medicines Agency (EMA) and the U.S. FDA.**

Pfizer’s bivalent “vaccine” contains several components when assembling the RNA sequence library. These include the spike protein insert (marked in red), a bacterial origin of replication (yellow), a Neo/Kan resistance gene (green), and two origins of replication (yellow) along with an SV40 promoter (marked in yellow and white).

When testing for RNA and DNA in the vaccine, the ratio of RNA to DNA was found to be between 43:1 and 161:1. However, the European Medicines Agency (EMA) requires a much higher ratio of 3030:1 for safety. This means the amount of DNA in the vaccine is 18 to 70 times higher than what is allowed by the EMA.

This raises multiple concerns, adding to the growing body of evidence calling for an immediate halt to these injections. One particularly troubling issue is the danger of DNA contamination in breast milk. Current testing methods would miss this problem, as exosomes containing DNA in breast milk could easily pass into suckling infants through their highly receptive neonatal upper digestive tract. The risk of genetic invasion via breast milk is alarming and could constitute a serious violation of medical safety.

The research team consists of Kevin McKernan, Yvonne Helbert, Liam T. Kane, and Stephen McLaughlin from Medicinal Genomics. Their preprint report is titled “*Sequencing of Bivalent Moderna and Pfizer mRNA Vaccines Reveals Nanogram to Microgram Quantities of Expression Vector dsDNA per Dose*” and can be found [here](#).

The Worldwide Corona Crisis, Global Coup d'Etat Against Humanity

by Michel Chossudovsky

Michel Chossudovsky reviews in detail how this insidious project “destroys people’s lives”. He provides a comprehensive analysis of everything you need to know about the “pandemic” — from the medical dimensions to the economic and social repercussions, political underpinnings, and mental and psychological impacts.

“My objective as an author is to inform people worldwide and refute the official narrative which has been used as a justification to destabilize the economic and social fabric of entire countries, followed by the imposition of the “deadly” COVID-19 “vaccine”. This crisis affects humanity in its entirety: almost 8 billion people. We stand in solidarity with our fellow human beings and our children worldwide. Truth is a powerful instrument.”

Reviews

*This is an in-depth resource of great interest if it is the wider perspective you are motivated to understand a little better, the author is very knowledgeable about geopolitics and this comes out in the way Covid is contextualized. —**Dr. Mike Yeadon***

*In this war against humanity in which we find ourselves, in this singular, irregular and massive assault against liberty and the goodness of people, Chossudovsky’s book is a rock upon which to sustain our fight. —**Dr. Emanuel Garcia***

*In fifteen concise science-based chapters, Michel traces the false covid pandemic, explaining how a PCR test, producing up to 97% proven false positives, combined with a relentless 24/7 fear campaign, was able to create a worldwide panic-laden “plandemic”; that this plandemic would never have been possible without the infamous DNA-modifying Polymerase Chain Reaction test - which to this day is being pushed on a majority of innocent people who have no clue. His conclusions are evidenced by renown scientists. —**Peter Koenig***

*Professor Chossudovsky exposes the truth that “there is no causal relationship between the virus and economic variables.” In other words, it was not COVID-19 but, rather, the deliberate implementation of the illogical, scientifically baseless lockdowns that caused the shutdown of the global economy. —**David Skripac***

A reading of Chossudovsky’s book provides a comprehensive lesson in how there is a global coup d’état under way called “The Great Reset” that if not resisted and defeated by freedom

loving people everywhere will result in a dystopian future not yet imagined. Pass on this free gift from Professor Chossudovsky before it's too late. You will not find so much valuable information and analysis in one place. -Edward Curtin
