

Do You Know Why California Hasn't Found Any Deaths Linked to the COVID Vaccines?

It's because they haven't looked. Now, for the first time, I will show you the proof.

Executive summary

The California Department of Public Health (CDPH) hasn't investigated any link between the COVID vaccines and death. That's a [violation of California law](#) to look the other way.

Peter Baldrige, former Assistant Chief Counsel of the CDPH, expressly brought this violation to the attention of the head of the department. As you might expect, the CDPH ignored him and did absolutely nothing.

We have proof of this.

Since the California government is not doing its job in following the law, I will be filing a writ of mandamus to compel the CDPH to do their job. The California court [should also award me attorney fees](#). Also, the investigation should be under the supervision of the court and **they should be required to:**

1. do the requisite histopathology tests to assess causality
2. produce the death-vax records.

In addition, Mr. Baldrige and I have both made a FOIA request to see the death-vax records; something that no state or world government has ever produced.

One way or another, the truth will be exposed soon for all to see.

Peter Baldrige's requests

By [letter dated December 17, 2022](#), Mr. Baldrige requested under the Public Records Act (Govt. Code, §§6250, et seq.) all records pertaining to any and all special investigations conducted or being conducted by the California Department of Public Health (CDPH) into the COVID vaccine adverse events.

On January 10, 2023, he received CDPH's response: **CDPH provided no records of any special investigation in Covid-19 vaccine adverse events after January, 2021**, and had **no records of any other investigation** for periods later than June, 2021.

Are you surprised? Peter wasn't.

By [letter dated January 29, 2023](#) he urged the Department to initiate such a special investigation pursuant to [CA HSC § 100325](#).

He heard nothing back.

So in a [letter dated April 17, 2023](#), Mr. Baldrige requested, under the California Public Records Act (Govt. Code, §§7920, et seq.), any and all records pertaining to special investigations into Covid-19 vaccine adverse events commenced after January 10, 2023, the date of the Department's first response in order to see if anything happened.

On April 27, 2023 the Department responded that it had no responsive records to his request:

April 27, 2023

RE: Public Records Act Request, Reference Number P018346

Dear Peter Baldrige,

The California Department of Public Health (CDPH) received your Public Records Act request dated April 17, 2023:

I hereby request under the California Public Records Act (Govt. Code, §§7920, et seq.) any and all records pertaining to special investigations into Covid-19 vaccine adverse events commenced after January 10, 2023.

The CDPH did not find responsive records to your request. This concludes your request.

Thank you.

To monitor the progress, update this request, or download responsive records, please log into the [Public Records Center](#).

In other words, they were informed of what the law required them to do and they chose to do nothing.

Peter Baldrige's letters to CDPH

Here is the full text of the letters Mr. Baldrige sent to the CDPH:

1. [December 17, 2022](#): Peter requests to produce the records of the investigations that were required by law
2. [Jan 29, 2023](#): Peter points out that the response to his previous request was inadequate and the department has not done its duty under the law. He reminds them again what is required.
3. [April 17, 2023](#): Peter asks for the records of the investigation that the department should have commenced after receiving his previous letter.
4. [May 5, 2023](#): Peter recounts what has happened to date and points out that there was again nothing done in response to his request to comply with the law.

Peter shifts gears and makes a FOIA request for the correlated death and vaccination records

My FOIA request filed today, May 5, 2023

I also decided to make a FOIA request using the official CDPH portal:

It appears that the Department has little interest in or intention to investigate the reports of deaths in California related to Covid-19 vaccinations as required by law. I believe it is in the public's interest that the correlation of vaccination and subsequent deaths be explored, particularly since, as of April 27, 2023, the Department continued to promote the Covid-19 vaccines as both safe and effective.

The Department has in its possession records related to deaths in California commencing January, 2021, when the vaccine rollout began. The Department also has in its possession vaccination records for Californians. The Department also possesses the ability to correlate this data using personally identifying information including, but not limited to: Social Security Number, street address, zip code, date of birth, name, and gender.

Accordingly, I hereby request under the California Public Records Act (Govt. Code, §§7920, et seq.) that the Department correlate these data sets and provide for each individual who has died since January 1, 2021 the following data fields for each individual as follows:

Date(s) of COVID-19 vaccination(s): <if any>

Five year age range of the individual who died (e.g. 50-54)

Date of death

In lieu of personally identifying information, I request that the Department create a random identification number for each individual so that the identity of the individual remains confidential.

You may contact me at xxxxxx if you have any questions.

Note: the JOIN of the databases cannot be done through the CAIR because they do not have the death records. CDPH controls both databases, so if this is not the proper request portal, please let me know which is the correct place to submit the database JOIN request.

Here is the receipt from my FOIA request: P018493-050523

Public Records Menu	
Home	Reference No: P018493-050523 Contact E-Mail: [REDACTED]
FAQs	
Submit a Request	
My Request Center	
FAQs	
What are the CDPH guidelines for access to public records?	Thank you for contacting the California Department of Public Health (CDPH) to obtain public records.
Where can I obtain marriage, divorce, birth or death certificates?	Your Public Records Act (PRA) request dated May 05, 2023, is being processed. Reference Number P018493-050523 has been assigned for tracking purposes. Please refer to this reference number for use when accessing the CDPH Public Records Center Portal to monitor the progress of your request.
How can I obtain a digital copy of my COVID-19 vaccination record?	CDPH strives to answer all requests for public records in as timely a manner as possible. Under California law, CDPH must respond to your inquiry no later than ten calendar days from receipt of the request to notify you whether records will be disclosed. Note that some records are exempted from disclosure. If the requested records are exempt, we will inform you in writing as to why.
How can I request immunization records?	The Public Records Act (see Govt. Code §7921.000 et. seq.) provides that CDPH may extend the response period for up to 14 calendar days should it be necessary to search for records located at off-site facilities or if the request involves a voluminous amount of records. We will notify you within 10 days of receipt of your request if a 14-day extension is necessary. If fees are involved, CDPH will need to collect the fees before releasing the records. However, there is typically no fee for records released electronically through the Public Records Center Portal.
How can I obtain a copy of a Form 700?	Please be advised that due to the evolving situation surrounding COVID-19, the Department is receiving an unusual number of Public Records Act requests. Due to the volume of Public Records Act requests and circumstances related to the emergency, in some cases the review and release of responsive records may take longer. Your patience is appreciated. The 10- and 14-day response periods are to allow CDPH time to determine how long it will take to disclose the requested records. Depending on the number of records requested or other factors, a response may take longer. CDPH will do its best to provide documents on a rolling basis as they become available and to keep you informed as to the timing and type of records to be released.

Please visit the [CDPH Public Records Center Portal](#) to monitor request progress, communicate with CDPH staff processing your request and to submit future requests.

California Department of Public Health

Who wants to see the data?

As Ryan Cole is fond of saying, “You will never find what you don’t look for.”

Let’s be clear. California is not looking into any injuries or deaths caused by the vaccines. They are looking out for the interests of the drug companies, not your health. They don’t care how many people in California have been injured or died. Your injuries and deaths are immaterial. They don’t care. They don’t even want to look.

The medical community in California is not better. They don’t want an investigation either. Have you heard of a single doctor, Dean of Medicine, or medical association in California calling for an investigation? Of course not!

Does Governor Newsom want an investigation? No way. [Newsom himself is vaccine injured so he knows the vaccines cause harm](#). That’s why he dropped out of sight for weeks after his booster shot. A proper investigation would show that the vaccines killed people which means that Newsom instituted policies that likely lead to the untimely demise of tens of thousands of innocent residents of California and the injury of many times that number.

The only person who called for an investigation, as required by law, is the former Assistant Chief Counsel of the California Department of Public Health. He worked there for 27 years and is appalled by what is happening there now. They can’t take away his medical license because he’s not a doctor. They could try to take away his license to practice law, but he’s retired. This is a problem for them. They ran into someone they couldn’t intimidate.

Interested in bringing my writ of mandamus in California?

If you are a lawyer interested in bringing my writ of mandamus action, please use the [Contact Me](#) link and select the “writ of mandamus” option on the form.

The vaccination rollout data

The vax-death data is good, but you also need the [vaccination data by age](#) pictured below. This allows me to normalize the deaths of the unvaccinated since people move from unvaccinated to vaccinated over time so without an upward adjustment, it will look like the unvaccinated are not dying at an even rate. With the normalization, I can compare death curves for people who got the shot with the death curves of people who didn't. I can also compute the death rate of people in the vaxxed group with the death rate of people in the unvaxxed group.

Vaccinated Status by Age and Race-Ethnicity

Summary

It is clear at this point that neither the CDPH, the governor, the California legislature, the medical community, or the mainstream media have any interest or intention to investigate the reports of injuries and deaths in California related to the COVID vaccinations.

This is why I'll be bringing a **writ of mandamus action** against the CDPH for not investigating the injuries and deaths.

In addition, I have sent a FOIA to the CDPH for the death-vax records. If the CDPH does not comply with my FOIA request, I will bring another writ of mandamus request action against them.

If you like where this is going and you would like to help support my work and be part of the solution, please consider becoming a paid subscriber. These legal actions can be very

expensive (running into hundreds of thousands of dollars) and my primary income is now from my Substack subscribers.

As always, please share this article to let people know that the government of California simply is not interested in looking into whether the COVID vaccines have caused any injuries or deaths in California.

Peter Baldrige is a hero for speaking out.

The Worldwide Corona Crisis, Global Coup d'Etat Against Humanity

by Michel Chossudovsky

Michel Chossudovsky reviews in detail how this insidious project “destroys people’s lives”. He provides a comprehensive analysis of everything you need to know about the “pandemic” — from the medical dimensions to the economic and social repercussions, political underpinnings, and mental and psychological impacts.

“My objective as an author is to inform people worldwide and refute the official narrative which has been used as a justification to destabilize the economic and social fabric of entire countries, followed by the imposition of the “deadly” COVID-19 “vaccine”. This crisis affects humanity in its entirety: almost 8 billion people. We stand in solidarity with our fellow human beings and our children worldwide. Truth is a powerful instrument.”
