*Ever since reports have surfaced in recent days that people who have chosen NOT to receive the experimental COVID-19 shots but have been exposed to those who have received them, and have suffered what appear to be infections coming from these fully “vaccinated” people, affecting mainly women who have reported menstruation difficulties, heavy bleeding, miscarriages, and reduction of breast milk, I have been watching my newsfeed to see if any of the dissenting doctors and scientists we feature regularly here at Health Impact News would address these issues.*

Fortunately, a team of 5 doctors in the U.S., all of whom we have featured in the past here at *Health Impact News* and are highly qualified to address this topic, just held a round-table discussion a couple of days ago to address these issues.

The issues they discuss affect ALL of us in the U.S. (and around the world) right now, and it is imperative that you take 79 minutes of your time to watch this video.

Not only do these highly qualified doctors discuss why they think this is happening, they also give practical advice at the end about what we can be doing right now to protect ourselves and stop this attack on the human race by the Globalists seeking to reduce the world’s population.

Every single one of these doctors believe that these shots are NOT vaccines, but bioweapons designed to kill human beings.

Whatever else you are doing when you come across this video, it is highly unlikely that anything else you do the rest of your day will be more important than watching this video so you can be informed of the evil effects of these injections that are being censored in the corporate media and Big Tech social media.

Then share this video with as many people as you can.

This is from our [Bitchute channel](#), and it will also be available on our [Rumble channel](#).
