

The DOJ Is Trying to Protect Pfizer From a Whistleblower Lawsuit

How do more people not know about this case?

[Global Research Wants to Hear From You!](#)

A high-profile healthcare lawsuit in Beaumont, Texas, is flying under the radar—which is just how the federal government and Pfizer want it.

The Department of Justice recently argued that a whistleblower lawsuit against Pfizer, filed by Brook Jackson, should be dismissed.

Jackson, a 20-year veteran in clinical trial administration employed by a third-party vendor (Ventavia Research Group), worked on Pfizer's COVID-19 vaccine trials in 2020. Alarmed by what she witnessed, Jackson raised concerns to her superiors, Pfizer, and the Food and Drug Administration (FDA) in September 2020.

She claimed the trial was being run, documented, and reported in a manner that violated Federal law and was potentially dangerous.

Hours after contacting the FDA on September 25, 2020, Jackson was fired. Her sealed whistleblower complaint seemed to stall, with the FDA not investigating her claims. Faced with inaction, Jackson filed a lawsuit.

As the case progressed towards discovery, the DOJ intervened, asking the judge to dismiss the case. Jackson argues that the government [failed to articulate](#) a legitimate reason for dismissal and did not demonstrate why the burdens of continued litigation outweigh its benefits.

Disturbingly, a former FDA lawyer who worked at the agency when Jackson's complaint was filed has moved to the DOJ and is [now representing the government](#) in its attempt to shut

down the suit, raising concerns about regulatory capture and the use of government to shield companies from accountability.

In 2021, the British Medical Journal [published an article investigating](#) Jackson's claims and found them credible. The journal's investigation concluded that Jackson's account was supported by documentation and raised serious questions about the integrity of Pfizer's vaccine trials and the FDA's oversight.

Other former Ventavia employees vouched for Jackson's complaint, describing a "helter-skelter" work environment and lack of oversight.

Despite evidence and corroboration, the FDA did not inspect Ventavia after Jackson's complaint, and Pfizer did not mention any problems at Ventavia in its FDA submission for emergency use authorization.

BMJ's findings lend significant credibility to Jackson's claims and raise serious questions about the integrity of Pfizer's vaccine trial data, the adequacy of regulatory oversight, and, ultimately, the approved emergency use authorization.

Should the court grant the DOJ's request for dismissal, it could send a chilling message to would-be whistleblowers and undermine public trust in the vaccine approval process. The BMJ investigation suggests that Jackson's concerns deserve a thorough examination, which might only occur if her lawsuit moves forward.

Additionally, the revelation that a former FDA official involved in the vaccine's approval is now working for the DOJ and arguing for the lawsuit's dismissal after the FDA appears to have outed Jackson to her employer, ultimately leading to her firing, raises further questions about potential conflicts of interest and regulatory capture.

Despite its significance, the case has received limited media coverage. Reporting on the FDA employee turned DOJ Pfizer bodyguard was an independent Dallas, Texas-based journalist, Texas Lindsay.

In related news, this week AstraZeneca [pulled its COVID-19 vaccine](#) from the market.

The Worldwide Corona Crisis, Global Coup d'Etat Against Humanity

by Michel Chossudovsky

Michel Chossudovsky reviews in detail how this insidious project “destroys people’s lives”. He provides a comprehensive analysis of everything you need to know about the “pandemic” — from the medical dimensions to the economic and social repercussions, political underpinnings, and mental and psychological impacts.

“My objective as an author is to inform people worldwide and refute the official narrative which has been used as a justification to destabilize the economic and social fabric of entire countries, followed by the imposition of the “deadly” COVID-19 “vaccine”. This crisis affects humanity in its entirety: almost 8 billion people. We stand in solidarity with our fellow human beings and our children worldwide. Truth is a powerful instrument.”

Reviews

This is an in-depth resource of great interest if it is the wider perspective you are motivated to understand a little better, the author is very knowledgeable about geopolitics and this comes out in the way Covid is contextualized. —Dr. Mike Yeadon

In this war against humanity in which we find ourselves, in this singular, irregular and massive assault against liberty and the goodness of people, Chossudovsky’s book is a rock upon which to sustain our fight. —Dr. Emanuel Garcia

In fifteen concise science-based chapters, Michel traces the false covid pandemic, explaining how a PCR test, producing up to 97% proven false positives, combined with a relentless 24/7 fear campaign, was able to create a worldwide panic-laden “plandemic”; that this plandemic would never have been possible without the infamous DNA-modifying Polymerase Chain Reaction test - which to this day is being pushed on a majority of innocent people who have no clue. His conclusions are evidenced by renown scientists. —Peter Koenig

Professor Chossudovsky exposes the truth that “there is no causal relationship between the virus and economic variables.” In other words, it was not COVID-19 but, rather, the deliberate implementation of the illogical, scientifically baseless lockdowns that caused the shutdown of the global economy. —David Skripac

A reading of Chossudovsky’s book provides a comprehensive lesson in how there is a global coup d’état under way called “The Great Reset” that if not resisted and defeated by freedom

loving people everywhere will result in a dystopian future not yet imagined. Pass on this free gift from Professor Chossudovsky before it's too late. You will not find so much valuable information and analysis in one place. -Edward Curtin
