

Don't Trust a Hand that Feeds the "Fascist Beast". People Around the World Are Rising Up against Their Government

The Enemy Within!

By [Massoud Nayeri](#)

The "Mueller Report" is out and as it was expected, it was disastrous news to the Democrats and pushed the fascistic minded President a little closer to his dream of creating a police state in the U.S. In this regard, beside the gloat or gloom on the commercial channels and press, once again we are witnessing that there are two distinctive realities in the U.S.

The gap between problems of the American working people and the problem of the wealthy people in the U.S. is deep and a world apart. Indeed, this situation is not unique to the U.S. but in fact it is the character of all Capitalist states in the 21st century. The wider the gap between the two opposite but real forces in these countries — to the different degree — creates more or less repressive governing system. The Western powers are failing to manage their own internal and international obstacles. This fact undoubtedly is more obvious in France. Mr. Macron sees the resilient French protesters who have legitimate demands as the enemy within and sends the French Army to kill and defeat their own citizens! In the U.S., the fascistic minded President is building his own loyal Law Enforcement for the sake of the "National Security." On the global stage, both countries look weak and unpredictable. Washington on the paper or by a tweet declares a new President in a sovereign country and grant lands to a foreign occupier! But day after day the world public opinion sees that all these bold and undemocratic moves less imperial and more isolated!

The problem for the 1% around the world is the enemy within; that is the majority of people who are rising up against their own governments and can't take it anymore! In this boiling political situation, the 1% of the major powers are facing trade wars among themselves and against their rivals. Ironically, China as the last brain death corpse of Capitalism with a few knee jerk reflexes here and there is the envy of the so-called "Free World"!

Today famine, flood and fire are uninterrupted cycles that like bad omens warn all of us of our future. However, what is unredeemable is a nuclear war among the countries that have these deadly weapons. Only a unity among the working people on a global scale can stop the insane powerful military leaders and sooth the pain of the distressed earth. With a global unity, the working people around the world can create the heaven on earth. To achieve this goal, the true peace activists need a global Anti-war program.
