Google no longer helps you find what you are truly looking for. Instead, they now customize results to satisfy their wants and needs. Individual results might vary.

Google's audacious tyranny, which includes censorship, surveillance, and mind control, is accelerating at a wicked clip. It's hard to keep up.

The planet's leading search engine has stealthily infiltrated areas/sectors of our society, including elections, [news](#), finances, and health, not to mention your mind, all the while '[vacuuming](#)' and usurping data, to become a megalithic repository.

Let's take a trip down memory lane back to 2019.

 **Zach Vorhies**
@Perpetualmaniac

A leading local news company is partnering with GoogleNews and providing data for to their machine learning algorithms in order to make a “dynamic paywall”.

November 11, 2019 06:45 ET | Source: Lee Enterprises Inc.

DAVENPORT, Iowa, Nov. 11, 2019 (GLOBE NEWSWIRE) -- Lee Enterprises, Incorporated (NYSE: LEE), a leading provider of news, information, and advertising in 50 markets, announced today that the [Google News Initiative](#) is partnering with Lee Enterprises and its digital technology subsidiary, TownNews, to expedite the development of a machine learning-based paywall technology.

“Google and TownNews are the leading technology providers for our industry, and Google

complete, this technology and associated best practices will be openly shared to expand the impact.”

Brad Ward, CEO of TownNews, added: “Streamlining the process of converting browsers to subscribers is a crucial piece of the revenue puzzle for many of our local media partners. As the leading provider of Content Management Systems for local media, our ability to leverage

The company plans to begin testing the program in December.

ABOUT LEE

Lee Enterprises is a leading provider of local news and information, and a major platform for advertising, with daily newspapers, rapidly growing digital products and nearly 300 weekly

80 4:51 PM - Nov 12, 2019

November 1st: Google’s parent company Alphabet acquired FitBit for a cool \$2.1 billion, adding it to the other 200 companies it owns.

November 12th: [The Wall Street Journal](#) reports via an anonymous ‘source’ within Google that the company has been accessing millions of patients’ health data alongside **Ascension**, the largest Catholic health system in the world, without patient consent.

The deal between Google and Ascension authorizing the data transfer was formally signed hours after *The Wall Street Journal* broke the story.

The same day, [Ascension](#) put out a notification stating that there was no breach of data and that their collaboration is (somehow) entirely compliant with The Health Insurance Portability and Accountability Act (HIPAA) regulations of 1996 (more on this later).

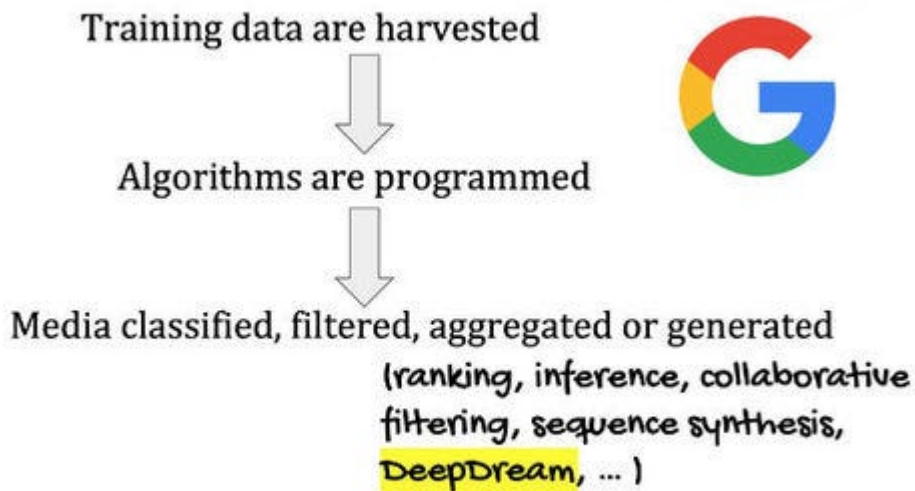

November 14th: [The Wall Street Journal](#) reports that attorney generals representing 48 states, as well as the District of Columbia and Puerto Rico, announced the opening of a sweeping antitrust investigation into Google.

[The Guardian](#) published an opinion piece titled “I’m the Google whistleblower. The medical data of millions of Americans is at risk.”

Mind Control, Surveillance, Wicked Genius

The amount of surveillance, manipulation, and [mind control](#) that Google is guilty of beckons

the slogan: "Make George Orwell Fiction Again."

© Courtesy Zach Vorhies

It sounds outlandish and sci-fi until you untangle the wicked genius.

To begin, one can review the evidence Google software engineer turned whistleblower handed over to the Department of Justice and [Project Veritas](#) in August 2019.

Although mainstream media coverage has been slow to catch on, **the 950 pages Zach Vorhies provided, which includes two blacklists, confirms Google's nefarious ways.**

Three years prior, [Dr. Robert Epstein](#), Senior Research Psychologist at the American Institute for Behavioral Research and Technology, and former editor-in-chief of *Psychology Today* had already identified at least nine different blacklists and written about them in a piece for *US News and World Report* titled "[The New Censorship](#)."

It was 2016, and he was already calling the company 'the world's biggest censor.'

In October 2019 at the [American Priority Conference](#) in Miami, Vorhies's astounding presentation further unpacked Google's maniacal plan to allow machines to [unfairly control our minds](#) to serve their agenda under the guise of benevolence.

Google calls it "Machine Learning Fairness." In this world that Vorhies exposes objective reality itself is biased.

"I think it's just going to get harder [for the mainstream] to ignore because Zach walked off with 950 pages of documents and an internal video," says [Dr. Robert Epstein](#).
