During the “Health in Buildings Roundtable” sponsored by the NIH & co-organized by the US CDC and several other organizations, Dr. Martin Pall from the Washington State University (WSU) concluded that the “5G rollout is absolutely insane”.

In this short presentation, Dr. Pall confirms that the current 2G/3G/4G radiation the population is exposed to has been scientifically linked with:

- Lowered fertility
- Insomnia, fatigue, depression, anxiety, and major changes in brain structure in animals
- Cellular DNA damage
- Oxidative stress
- Hormonal disruption
- Cancer
- And much more

Dr. Pall briefly explains the mechanisms of how the electrosmog emitted by our cell phones, wifi routers, cell phone antennas and other wireless technologies affect human cells.
