BATTLE CREEK, Mich. (WOOD) — A 47-year-old man had a medical situation and crashed on the grounds of the Battle Creek Executive Airport at Kellogg Field Thursday, according to the city.

Video from the air traffic control tower shows the car entering airport grounds around 3:15 a.m., according to a release from the city of Battle Creek. The tower was closed when the crash happened.

Staff noticed the car around 7 a.m., the city said. Police, firefighters, health care workers and deputies responded.

Police said the man had an unknown medical situation and went off the road at Helmer Road North and Dickman Road. Then, police said, he crashed through the airport perimeter fence and stopped on the runway.

A driver had a medical episode before they crashed into a light pole and died in downtown Edmonton early Thursday morning.

The 54-year-old man was headed east on 107A Avenue when his vehicle "suddenly veered off the road" and hit a pole near 99 Street, police were told.

Emergency responders performed life-saving measures but he died at the scene.

Officials confirmed later in the morning that he had a medical episode before the crash.

WYANDOTTE CO., Kan. (WIBW) - A medical condition led to the hospitalization of an Overland Park man after his car crashed into a tree along I-70.

The [Kansas Highway Patrol Crash Log](#) indicates that around 7:25 a.m. on Friday, July 7, emergency crews were called to the area of mile marker 420.4 on westbound I-70 with reports of a single-vehicle crash.

When officials arrived, they said they found a 2019 Nissan Sentra driven by Lance Anderson, 57, of Overland Park, was headed west on the interstate. [Anderson experienced a medical condition that caused him to lose control of the sedan.](#)

KHP said the car veered into the ditch and hit a tree as well as an embankment. Anderson was taken to the [University of Kansas Medical Center](#) with suspected serious injuries. He was wearing a seatbelt at the time of the crash.

Ventura County Fire Department /

Firefighters aided by helicopters quickly stopped blaze in Ojai Valley before it could reach structures.

CHP investigators say a woman who had a medical emergency while driving a car crashed into a field in the Ojai Valley, starting a brush fire.

The accident happened just after 5 p.m. Wednesday night on Highway 33, near Tico Road.

Investigators believe the 27-year-old woman fainted, leading to her car crashing through a wooden fence into the field. The Simi Valley woman escaped from the car on her own. She was taken to a hospital for treatment of minor injuries.

The fire quickly grew to 13 acres in size before about 80 firefighters, aided by water dropping helicopters contained the blaze. The fire was stopped before it could reach some nearby homes. No damage was reported.

The fire caused the shutdown of Highway 33 for a few hours Wednesday night.

Saskatoon police say a driver who crashed on Circle Drive Monday may have suffered a medical incident.

The vehicle appeared to have veered off Circle Drive while heading north, passing through the oncoming lane and busting through a fence before hitting two light posts and rolling to a stop about 100 metres down Saskatchewan Crescent West, catching fire.

Firefighters were called to the scene at 3:12 p.m., the city says. The driver was out of the

My Take...

Why are COVID-19 vaccinated drivers collapsing behind the wheel and crashing their vehicles? There are several possible mechanisms:

- cardiac arrhythmia or cardiac arrest (due to post vaccine myocarditis)
- blood clots causing a heart attack, stroke or pulmonary embolism
- seizures causing loss of consciousness
- brain bleed (aneurysm, hemorrhagic stroke) causing loss of consciousness

Should COVID-19 vaccinated drivers be restricted from driving until they go through a rigorous medical examination to determine the risk of collapsing behind the wheel from underlying myocarditis, blood clots or other medical issues?

I believe this should be done for school bus drivers and city bus drivers at a minimum. Immediately.

Ignoring the problem and hoping it goes away, is not a solution.

COVID-19 vaccine injuries of all types are skyrocketing and continue to rise well into 2023. It

is my prediction that this problem is only going to get worse.

The Worldwide Corona Crisis, Global Coup d'Etat Against Humanity

by Michel Chossudovsky

Michel Chossudovsky reviews in detail how this insidious project “destroys people’s lives”. He provides a comprehensive analysis of everything you need to know about the “pandemic” — from the medical dimensions to the economic and social repercussions, political underpinnings, and mental and psychological impacts.

“My objective as an author is to inform people worldwide and refute the official narrative which has been used as a justification to destabilize the economic and social fabric of entire countries, followed by the imposition of the “deadly” COVID-19 “vaccine”. This crisis affects humanity in its entirety: almost 8 billion people. We stand in solidarity with our fellow human beings and our children worldwide. Truth is a powerful instrument.”
