\*\*\*

*Welcome to the early 21st century dystopian nightmare reality where Orwell's [1984](#) is no longer fiction, and if you are hearing voices, it could be the government [transplanting those thoughts](#) in your head.*

*If you think your appliances are [listening to you](#), well, you may be right. Truth is treason and fact is fiction.*

*Freedom is selfish and fascism is kindness.*

*Killer robots are being deployed and the Malthusian depopulation agenda is being implemented.*

*An evolution of good old fashion eugenics called transhumanism is being sold as the advancement of the human race, and global technocrats are openly planning to use artificial intelligence to decide which industries to eliminate in an effort to [stop economic growth](#).*

*The infrastructure for smart cities, the [sophisticated prisons](#) of the future, are in place or being employed. The force and coercion of deadly gene therapy shots continues despite the enormous evidence of causing harm. Unimaginably, masks, lockdowns, and vaccine passports, in many places, may be here to stay. Don't be surprised if the classic film [Casablanca](#) is banned because it critiques fascism by highlighting the oppressive government policy of asking for your vaccine passport, I mean, "Your Papers Please".*

The recent reports in San Francisco about the decision to use [killer robots](#) to target American citizens suspected of crimes, should be an eye opener for those still looking the other way. This, of course, is just the beginning.

A Chinese company is promoting a '[new species](#)' of 5G powered artificial intelligence driven robots to do everything from serving you coffee to pumping gas. However, these robots may be more of a 'Terminator' style prototype than a 'Jetsons' automated house keeper. The

planned future may entail these terminator style robots for law enforcement purposes, or stated more clearly, oppression. Nothing could go wrong here.

As if this absurdity wasn't enough, according to Aman Jabbi, the [sophisticated prisons](#) called smart cities will include street lights that can kill, total surveillance, and forcing people into the Metaverse under a new digital slavery system. Rural and suburban America will be eliminated as humans are herded into these smart cities. According to Jabbi, much of the infrastructure is in place in many areas of the United States, including Florida and Georgia.

A next generation prototype city, called [Neom](#), or 'the line', is being constructed in Saudi Arabia. According to Joseph Bradley, Neom's technology and digital CEO, "NEOM is not about building a smart city, it is about building the first cognitive city, where world-class technology is fueled with data and intelligence to interact seamlessly with its population."

As frightening as this is, the previously mentioned deliberate plan proposed by the World Economic Forum (WEF), **to use artificial intelligence to decide which industries to liquidate in order to [stop economic growth](#), should send a chill down your spine.**

**That's right, the WEF is actually proposing that economic growth is bad and that economic growth should diminish.**

This of course is to save the planet from the natural phenomenon called [climate change](#). This psychotic, I mean noble goal, is to stop the depletion of natural resources. Of course, this system must be fair, so artificial intelligence will be used to decide who gets to succeed, and who gets to fail. Don't worry, I'm sure that algorithm will be proprietary information, like the ones used in the voting machines, or the ingredients of those Covid shots.

If you are wondering how long it will take for the self appointed masters of the universe to determine whether all the useless humans are necessary, you need not wait. There are some interesting coincidences that have emerged globally since the introduction of the [Covid gene therapy shots](#). All cause mortality is going up while birth rates are dropping. Evidence is emerging that these shots may be both a [biological and technological](#) weapon. After all, those [semi synthetic blood clots](#) are normal. No worries, nothing to see here, move it along.

The high priests of knowledge and truth in our society have determined that for our own good, we are not allowed to know the contents of the Covid shots. These same high priests have also protected us from knowing the algorithm in our computerized voting machines. Fortunately, the government and media and big tech have colluded to protect us from free speech and have actively [censored information](#) about the dangerous Covid shots, and our [fake elections](#).

Well, you know what they say, a little knowledge can be dangerous...

Pilot programs of a [centralized digital bank currency](#) are currently being rolled out. A CDIBC has the potential to create a total slave system where your money is not yours, but instead, is more of an allowance based on approved behavior as the algorithm can be tied into your ESG score. Access to normal life activities can eventually be tied to your speech and political views. Or maybe you'll be allowed to buy food when you get your gene therapy booster.

Eugenics has evolved into transhumanism, where our billionaire Marxists are seeking to live

forever while experimenting on the human race. As mentioned in a previous article, this was prophesized by C.S. Lewis in his book [That Hideous Strength](#). Written shortly after WWII, this work of fiction depicts fascist intellectuals seeking to merge humans with artificial intelligence to find a way to live forever and sanitize humanity. Ultimately, the transhumanists were deceived and were in fact communicating with dark entities. Well, we do know the globalists are evil.

The fusion of Malthusian population control cultists and [climate change cultists](#) has led to this abysmal thing called The Great Reset. [The Great Reset](#) is a “revolution” led by billionaire technocrats

The Great Reset is unrestricted warfare on the human race.

I see a [few scenarios](#) where this can go. Most aren’t so good. We can see total control and a prison planet emerge, it could all blow up and civilization collapse, or we could see the emergence of pockets of liberty as we enter the new dark age. The globalists could fail and we see a free planet emerge. Or there could be a fusion of the two extremes. Nothing is certain. Although, I would argue that the only way possible good outcomes can emerge is if there is active resistance at all levels.

In some way, we all signed up for the early 21st century dystopian nightmare reality.

We all have a choice. We can hide and grovel on our knees, or we can enter the arena, and work to stop global genocide, preserve the human race, and the elusive, yet beautiful thing, called freedom.

It is a wonderful time to be alive. We get to slay the dragon, or die trying.
