As I read this notice from [ClinicalTrials.gov](#), a service of the US National Institutes of Health, the US Government and Pharmaceutical corporations have been conducting ebola tests on humans. <http://clinicaltrials.gov/show/NCT02041715>

This is official confirmation of Dr. Boyle and Dr. Broderick's reports that the US government has conducted ebola experiments. Perhaps the vaccine was not effective, and those on whom the experiment was conducted came down with ebola and perhaps also employees in the US bio-warfare laboratories located in Africa where the experiment was conducted.

It appears that the test consists of giving an ebola vaccine and then exposing the unaware person to ebola, apparently an engineered version for bio-warfare. Whatever the tests are, it is clear that Boyle and Broderick in their articles below are correct that experimentation with ebola by the US government is underway.

Two Scientists Say Ebola Originated In US Bio-warfare Lab

Experts have brought to the public's attention that ebola is a genetically modified organism developed in US biowarfare laboratories in Africa.

In the two articles below reproduced from Tom Feeley's Information Clearing House (a good site worthy of your support), Dr. Francis Boyle of the University of Illinois and Dr. Cyril Broderick of the University of Liberia and the University of Delaware provide their fact-based assessments. Dr. Boyle drafted the Biological Weapons Anti-Terrorism Act of 1989, the US implementing legislation for the 1972 Biological Weapons Convention.

For speaking out, both Boyle and Broderick will be viciously attacked by the US print and TV media. Remember the case of Gary Webb who exposed the CIA's drug-running that supported the Contras in Nicaragua. The cocaine that launched the War on Drugs was brought in by the CIA. http://www.opednews.com/articles/WPost-s-Slimy-Assault-on-G-by-Robert-Parry-CIA_Cocaine_Gary-Webb_Journalism-141018-836.html

These are the URLs for the articles by Dr. Boyle and Dr. Broderick:
