Everyday Dr. McCullough and I speak to people who have been injured—or have a family member who has been killed—by one of the COVID-19 vaccines. Almost every day, Dr. McCullough examines one or more vaccine injuries in his clinical practice. Because he has become a go-to doctor for people who are suffering from these injuries, his view of the problem is not statistical, but at the individual human level.

The United States has a census counted population of 332 million. Thus, if even a small percentage of these people are injured or killed from COVID-19 vaccines, it's still a frightful number.

Consider that 58,000 men were killed in ten years of fighting in Vietnam. This was just a tiny percentage of the 100 million American men counted in the 1968 census, but it was still a huge number of men to die in their early twenties.

Yesterday, former BlackRock portfolio manager Ed Dowd and his analysts at the research firm, Phinance Technologies, published a report on the cost of the COVID-19 vaccine program in the United States for the year 2022.

I know from multiple, probing conversations with Mr. Dowd that he is a conservative analyst. A serious and sober-minded man, he is ruthless in eliminating biases and wild assumptions. He and his team have focused their research on the 148 million Americans (between the ages of 18-64) who are employed. The Bureau of Labor Statistics compiles much data on this cohort, as does the life insurance industry, because many employed people receive policies as part of their compensation packages.

Mr. Dowd's report is grim. As he encapsulated the results in a tweet:

Edward Dowd
@DowdEdward

Estimated 2022 US Vaccine Damage Report:

Estimated Human Cost:

- ✓ 26.6 million Injuries
- ✓ 1.36 million Disabilities
- ✓ 300k excess deaths

Estimated Economic Cost:

Total: \$147.8 Billion

- ✓ Injuries: \$89.9 billion
- ✓ Disabilities: \$52.2 billion
- ✓ Excess Deaths: \$5.6 Billion

As a true crime author, I always focus on the human cost. I know that the death of a single young person can devastate a family and even an entire community. 26.6 million injuries; 1.36 million disabilities; 300,000 excess deaths. Note that this death count in one year is 5.2 times the number of men killed in ten years of combat in Vietnam.

Perhaps the most extraordinary thing about this state of affairs is that most Americans don't know it's happening. Every day, young people are dying from heart attacks, strokes, and seizures caused by COVID-19 vaccines. Most of their families and friends are led to believe that they *just died*—suddenly and unexpectedly—of acute conditions that were extremely rare in young people prior to 2021.

The Worldwide Corona Crisis, Global Coup d'Etat Against Humanity

by Michel Chossudovsky

Michel Chossudovsky reviews in detail how this insidious project “destroys people’s lives”. He provides a comprehensive analysis of everything you need to know about the “pandemic” — from the medical dimensions to the economic and social repercussions, political underpinnings, and mental and psychological impacts.

“My objective as an author is to inform people worldwide and refute the official narrative which has been used as a justification to destabilize the economic and social fabric of entire countries, followed by the imposition of the “deadly” COVID-19 “vaccine”. This crisis affects humanity in its entirety: almost 8 billion people. We stand in solidarity with our fellow human beings and our children worldwide. Truth is a powerful instrument.”
