*Recently on this show **Dr. Jane Ruby** came on and gave us the remarkable information that a huge percentage of side effects tracked in the CDC’s VAERS database are linked to just a small percentage of the vaccine batches produced by Pfizer and Moderna. This data came from a group calling itself Team Enigma. They’re a group of independent researchers with experience in medical R&D, statistics, data analytics, and everything else you’d need to investigate a vaccine’s impact on millions of people.*

A lot of Team Enigma is anonymous but thankfully one of their number has agreed to speak publicly. Sasha Latypova joins us to discuss.
