

# Excess Deaths in the UK: 10,000 More Brits Are Dying. Experts Not Sure Why.

I have an idea. This trend of excess deaths is accelerating in 2023 and that is very bad news.

# Tens of thousands more Brits are dying - experts not sure why

In December 2022 the number of excess deaths was 5,900, which is 13.5 per cent above the five-year average

NEWS By Kieren Williams & Nisha Mal  
16:50, 12 MAY 2023 | UPDATED 16:57, 12 MAY 2023

Bookmark

Tens of thousands of more Brits are dying than expected and experts don't know what the cause or reason is. **From May to December 2022 there were 32,441 excess deaths in England and Wales.**

- 

Shocking moment two men arrested after police pursuit in Swansea
- 

Police helicopter over Cardiff in dramatic car chase as fugitives swap vehicles repeatedly

Let's look at the excess death numbers that the mainstream UK media admit to in this interesting article:

"May to Dec 2022" there were 32,441 excess deaths in England and Wales.

That's 4,055 deaths per month or 48,661 annually.

"In December 2022 the number of excess deaths was 5,900"

That's an estimated 70,800 annualized heading into 2023, if the rate stays stable.

Population of England (57.06 mil) and Wales (3.21 mil): combined 60.27 million

That works out to about 1 in 1000 people in England and Wales dying as "excess deaths" in 2022.

All the highly COVID-19 vaccinated countries were seeing excess mortality in 2022 on the order of about 1 in 1000 population:

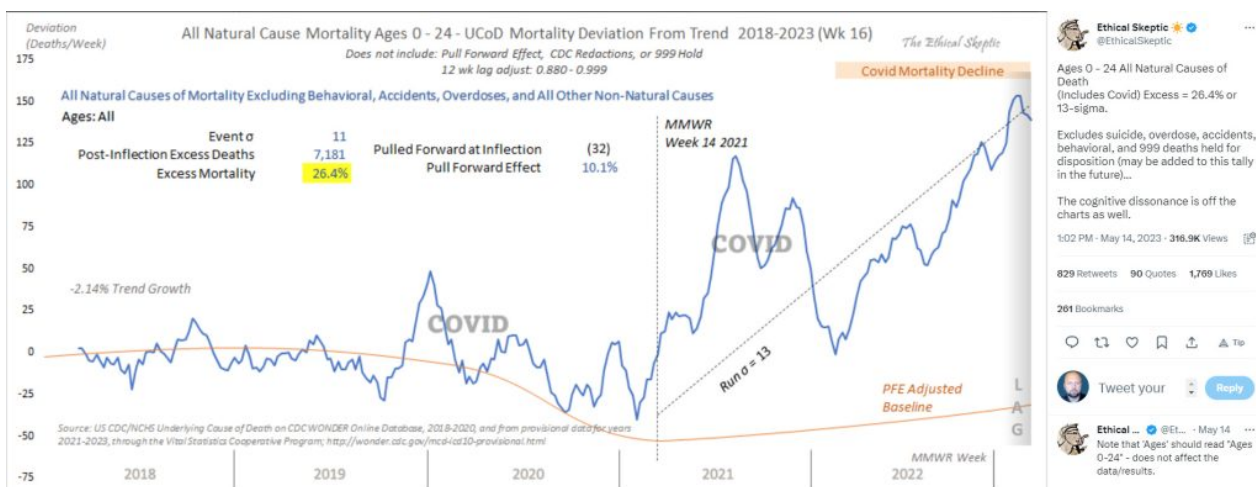

- USA - 270,000 in 2022 (source: [Ethical Skeptic](#), [BMC Skidmore](#), [USMortality.com](#))
- Germany - 103,000 in 2022 (source: German govt, OECD, EuroMOMO [click here](#))
- UK - 54,000 in 2022 (source: BBC [click here](#))
- Japan - 91,000 in 2022 (source: [click here](#))
- Australia - 42,000 in 2022 (source: [click here](#))
- Canada - 49,900 in 2022 (source: [click here](#))

Excess deaths are accelerating into 2023:

From 48,000 excess deaths in 2022 to 71,000 excess deaths heading into 2023, that is the kind of excess death acceleration that the mainstream media in the UK are admitting is happening, even if they refuse to provide an explanation.

Anecdotally, I am seeing this acceleration in the “died suddenly” incidents in young people, whether it’s sudden deaths in doctors, nurses, police officers, school bus drivers or pilots. These are the excess deaths, young healthy people who were COVID-19 vaccinated and are now coming down with cardiac arrests, strokes, pulmonary embolism, brain bleeds, aneurysms, seizures, sepsis, turbo cancers, and other conditions that predispose them to a sudden or unexpected death.

USA Excess Deaths in ages 0 – 24:

Here is another data analysis by Twitter user Ethical Skeptic, showing that excess deaths in young people ages 0 to 24 are accelerating into early 2023 in an unprecedented manner (13 sigma event, which means 13 standard deviations from the mean).

Look at the last 6 months, we are in unprecedented territory.

My Take...

In the early months of 2023, there is evidence that excess deaths are accelerating, compared to 2022.

In 2022, all highly COVID-19 vaccinated countries had excess deaths of approximately 1 in 1000 population but this is increasing in 2023 towards 1 in 500.

This acceleration in excess deaths is evident in the incidents of sudden death and in the obituaries, but the broader population may not realize this is happening, especially if these tragic events haven’t impacted their family directly.

Since only 13% of Canadians have had a booster shot in the past 6 months, I believe we are now starting to see the long term effects of COVID-19 mRNA vaccination in young people, and these long term effects are translating into an ever increasing rate of death.

These long term effects were never studied by either Pfizer or Moderna. In their clinical trials, they studied healthy young people for a few months. That’s it.

It is crucial, now more than ever, to demand investigations and proper autopsies to be done. What are the mechanisms of sudden death 1 or 1.5 years after your last COVID-19 mRNA vaccine? We don't know, but we better find out soon.

## The Worldwide Corona Crisis, Global Coup d'Etat Against Humanity

by Michel Chossudovsky

Michel Chossudovsky reviews in detail how this insidious project “destroys people’s lives”. He provides a comprehensive analysis of everything you need to know about the “pandemic” — from the medical dimensions to the economic and social repercussions, political underpinnings, and mental and psychological impacts.

*“My objective as an author is to inform people worldwide and refute the official narrative which has been used as a justification to destabilize the economic and social fabric of entire countries, followed by the imposition of the “deadly” COVID-19 “vaccine”. This crisis affects humanity in its entirety: almost 8 billion people. We stand in solidarity with our fellow human beings and our children worldwide. Truth is a powerful instrument.”*
