On December 4, 2023, the adult film star, Sophie Anderson, died at the young age of 36. Her husband, Oliver Spedding, too passed just two weeks prior. While the exact cause of Sophie's death remains undisclosed, reports suggest a possible connection to health issues she battled, notably a dangerous infection in her left breast from silicone implants just a year ago.

Sophie Anderson entered the adult film industry in 2017, quickly ascending to

Osteosarcoma is the kind of cancer Terry Fox had and it's very rare.

Yet, a West Island family is struggling with two cases of the disease - in two sisters - and the MUHC (McGill University Health Centre) is helping them fight for their lives.

Dr. Ahmed Aoude is treating 18-year-old patient Katelyn Harding, who recently went through what he calls, "one of the biggest surgeries in modern medicine."

"Thirty-six hours, multiple surgeons involved, multiple teams, organizing chemo, possible radiation, medical oncology, medical surgery," said Aoude, who is director of the MUHC sarcoma program.

This year has been so full of emotions!!! In February my mom Paula Denton passed away suddenly in our home! In July my brother n law "just June" Albert Johnson passed away with Johnny and I there with him, and just this past Monday my beautiful sister n law Letha Knox passed away surrounded by family!!! Sometimes I just find myself with tears in my eyes from missing all of them! It takes time and fortunately our lives have to go on!!! If only we could go back in time !!! 😭

Oct. 1, 2023 – 57 year old Red Sox baseball pitcher Tim Wakefield died this morning on Oct. 1, 2023. I reported he had aggressive brain cancer and his wife has aggressive pancreatic cancer!

"I want Tim and Stacy to know obviously we're praying for them, we're thinking of them. Their children obviously going through some very tough times. I don't want to cliché this, but nobody deserves this. ... While both of them are now very sick, they both need to know there are a lot of people out here praying and thinking about them."

Wakefield and his wife are reportedly battling aggressive forms of cancer
Paul J. Bereswill

The former Red Sox great said that he's seen the "power of prayer work" before airing out the information.

"Tim Wakefield is sick. ... Recently, Tim was diagnosed with a very serious, very aggressive form of brain cancer. ... The situation in Tim's case is incredibly serious and he went in and had surgery," Schilling said.

Red Sox 'furious' over Curt Schilling sharing Tim Wakefield cancer news

Red Sox legend's wife blasts Curt Schilling over Tim Wakefield cancer reveal: F-k

People around the Boston Red Sox and Tim and Stacy Wakefield are beyond "furious" with Curt Schilling.

That is according to Boston Globe Red Sox reporter Pete Abraham.

Schilling announced, without permission, that the former Red Sox pitcher had been diagnosed with brain cancer and that his wife was "very sick with pancreatic cancer."

Tim Wakefield, former Red Sox knuckleballer, dead at 57 from brain cancer

By Jared Schwartz

Published Oct. 1, 2023, 3:08 p.m. ET

Beloved former Red Sox knuckleballer Tim Wakefield died Sunday morning at the age of 57, the team announced.

He was **recently diagnosed with brain cancer**, though it was revealed to the public without his permission on Tuesday by former teammate Curt Schilling.

"Tim's kindness and indomitable spirit were as legendary as his knuckleball," Red Sox owner John Henry said in a statement. "He not only captivated us on the field but was the rare athlete whose legacy extended beyond the record books to the countless lives he touched with his warmth and genuine spirit."

"He had a remarkable ability to uplift, inspire, and connect with others in a way that showed us the true definition of greatness. He embodied the very best of what it means to be a member of the Boston Red Sox and his loss is felt deeply by all of us."

Tim Wakefield died Sunday morning at 57 years old.

Getty Images

Likely the most famous and successful knuckleball pitcher in MLB history, Wakefield played 19 seasons in the league, 17 of which were with Boston.

He played the first two years of his career with the Pirates, who cut him before he subsequently signed with the Red Sox and spent the rest of his career there.

developed testicular cancer that spread to lymph nodes. In June 2023, his wife Morgan was diagnosed with triple negative breast cancer.

Newlywed husband and wife are diagnosed with cancer less than a year after getting married

The couple wed in October 2022 and said they "couldn't wait to begin their lives as newlyweds" before the traumatic news.

By **CLIVE HAMMOND**

09:34 ET, Fri, Sep 15, 2023 | UPDATED: 09:57 ET, Fri, Sep 15, 2023

The couple's heartbreak started in February when Shane was diagnosed with testicular cancer, with doctors confirming the disease had spread to his surrounding lymph nodes.

READ MORE: Jeopardy host Alex Trebek's home of 30 years being demolished 2 years after death

The Grays' plight was shared on a fundraising page (Image: GOFUNDME)

This began an arduous period of treatment, including surgery and 21 chemo infusions.

By June, though, Shane was told he was cancer-free - beginning what the Gray family had hoped would be a period of celebration.

Weeks later heartbreak struck again as Morgan was then given a cancer diagnosis of her own.

She was told she had negative breast cancer, which is a form of breast cancer that is more common in women under the age of 40, during a breast examination.

On a fundraiser set up by close friend Kelli Kachmar, it was "initially thought that everything was fine" and that an "ultrasound and biopsy were performed to rule anything out".

But "the finding was another blow to the Gray family. Morgan had triple-negative breast cancer", she added.

Morgan has so far had to go through a double mastectomy and egg retrieval procedure.

She has also just begun the first of eight chemo infusions.

The fundraiser continues: "While the prognosis for her cancer is good, given how early she detected it, the cost of both Shane and Morgan's surgeries, chemo and IVF are starting to stack up.

"Between a wedding and two cancer diagnoses in less than a year, Morgan and Shane are endlessly grateful for any donation."

The couple wedded in Grove City, Ohio, after being set up by Kelli. The pair were in Oxford with Shane attending Miami University, and Morgan at The Christ College nursing school.

Sep. 5, 2023 - Los Angeles, CA - Teacher Karyn Newbill Helmig was diagnosed with ovarian cancer in the form of 5 malignant tumors in her abdomen. Her husband 53 year old Shawn Helmig died unexpectedly of a pulmonary embolism in Nov. 9, 2022.

Karyn Newbill Helmig

September 5th, 2023

\$27,491 USD raised of \$30,000 goal • 331 donations

Hey, friends...Our beautiful friend Karyn Newbill Helmig has been handed a really challenging medical diagnosis and needs our support in a big way. After a truly dreadful series of major life events, culminating in the death of her husband Shawn in November 2022, Karyn recently learned that her months of exhaustion, weight loss and other troubling symptoms were, in fact, ovarian cancer in the form of five...FIVE malignant tumors in her abdomen! This news has us all reeling, Karyn most of all. She had surgery earlier in August...Her wonderful and brilliant surgeon, who will also be her oncologist, removed every bit of cancer she could find, along with Karyn's uterus, ovaries and fallopian tubes.

Karyn is recovering nicely but isn't even close to being done with her treatment. Starting on September 5th, she will be having the first of six rounds of chemotherapy, each round consisting of two different drugs, administered every three weeks until mid-December. This chemo will likely include many of the difficult side effects we've all heard about...Nausea, fatigue, bone pain, and yes, hair loss. The physical and mental toll her diagnosis and treatment will take on Karyn is huge and will keep her out of her magical classroom and away from the students who love her so much for an entire year.

Got mine !

[Aug. 19, 2023 - Halifax, MA](#) - William Roche and his wife Tracy Roche have both come down with cancer. Tracy was diagnosed with breast cancer last year and this spring William was diagnosed with tonsil/neck/throat cancer.

HELP BILLY AND HIS FAMILY FIGHT CANCER!!

 **Team fundraiser**

BARBARA HAYES and Kathleen ONeil are organizing this fundraiser.

Dear Family, friends and community,

As many of you know, our sister-in-law Tracy was diagnosed with breast cancer last year and underwent surgery and months long treatment. She has been on the road to a full recovery, but it has been difficult and emotionally overwhelming for the family. Then this spring, our brother Billy was diagnosed with tonsil/neck/throat cancer. In February 2023 he had surgery on his nose for post nasal drip and other issues, and when he found a lump on his neck a few weeks later, the doctors thought it was an infection related to the surgery. He was put on a round of antibiotics with no result. They scheduled a series of tests and xrays/scans and discovered nodules/tumors in his neck, and on one of his tonsils; CANCER. The word no one wants to hear.....

He is now in the midst of daily treatment; chemotherapy and intensive radiation on his neck and throat. He is not able to eat or drink and had a feeding tube placed at the start of treatment to sustain him. There will most likely come a time when the pain will be so intense he will not be able to speak. The hope is he will regain his ability to swallow, eat and speak with the understanding his voice could be different, his taste buds could be destroyed, chronic dry mouth...the list goes on.

He has speech therapists, nutritionists, radiologists, oncologists, nurses, VNA all at a cost. His insurance covers only a portion of the staggering amounts of money needed to treat this deadly disease. This has taken a toll on both Billy and Tracy, as they attempt to maintain their household and their jobs, all while making daily trips back and forth to Dana Farber.

Aug. 14, 2023 - Melbourne, Australia - Danny Norman and Stacey Singles lost their baby boy Cooper at 2 weeks old on May 23, 2023. Just 2 months later, on August 13, 2023, while on vacation in Bali, Stacey Singles collapsed and died suddenly. "My beautiful wife Stacey passed away and is now with our beautiful boy Cooper in heaven"

The Worldwide Corona Crisis, Global Coup d'Etat Against Humanity

by Michel Chossudovsky

Michel Chossudovsky reviews in detail how this insidious project “destroys people’s lives”. He provides a comprehensive analysis of everything you need to know about the “pandemic” — from the medical dimensions to the economic and social repercussions, political underpinnings, and mental and psychological impacts.

“My objective as an author is to inform people worldwide and refute the official narrative which has been used as a justification to destabilize the economic and social fabric of entire countries, followed by the imposition of the “deadly” COVID-19 “vaccine”. This crisis affects humanity in its entirety: almost 8 billion people. We stand in solidarity with our fellow human beings and our children worldwide. Truth is a powerful instrument.”

Reviews

This is an in-depth resource of great interest if it is the wider perspective you are motivated to understand a little better, the author is very knowledgeable about geopolitics and this comes out in the way Covid is contextualized. —Dr. Mike Yeadon

In this war against humanity in which we find ourselves, in this singular, irregular and massive assault against liberty and the goodness of people, Chossudovsky's book is a rock upon which to sustain our fight. -Dr. Emanuel Garcia

In fifteen concise science-based chapters, Michel traces the false covid pandemic, explaining how a PCR test, producing up to 97% proven false positives, combined with a relentless 24/7 fear campaign, was able to create a worldwide panic-laden “plandemic”; that this plandemic would never have been possible without the infamous DNA-modifying Polymerase Chain Reaction test - which to this day is being pushed on a majority of innocent people who have no clue. His conclusions are evidenced by renown scientists. —Peter Koenig

Professor Chossudovsky exposes the truth that “there is no causal relationship between the virus and economic variables.” In other words, it was not COVID-19 but, rather, the deliberate implementation of the illogical, scientifically baseless lockdowns that caused the shutdown of the global economy. -David Skripac

A reading of Chossudovsky’s book provides a comprehensive lesson in how there is a global coup d’état under way called “The Great Reset” that if not resisted and defeated by freedom loving people everywhere will result in a dystopian future not yet imagined. Pass on this free gift from Professor Chossudovsky before it’s too late. You will not find so much valuable information and analysis in one place. -Edward Curtin
