One of the most vexing questions in the epidemiology of COVID-19 vaccine death is: why are some people fine and others develop fulminant fatal syndromes? This leads to the next logical question: who is the next to die after COVID-19 vaccination? This is a question that parents of a 14-year old Japanese girl wished they would have asked before she rolled up her sleeve for her third BNT1262b2 mRNA COVID-19 vaccine/Pfizer (Comirnaty®) which was not medically necessary nor clinically indicated. In other countries it would not be offered and even the WHO says healthy children don't need to risk COVID-19 vaccination.

The case was published by Nushida et al who explains the teenager was healthy and may have had POTS from the first two shots. For each of the first two shots she felt sick and missed school—that was a tip off the parents should have noted. After the third shot her sister noticed she was having trouble breathing and the next day she died. The investigators did a detailed analysis to rule out SARS-CoV-2 infection.

Case Report

A case of fatal multi-organ inflammation following COVID-19 vaccination

HE: Hematoxylin and eosin staining showing lymphocytic infiltration. CD3: Immunohistochemical staining for CD3 showing inflammatory cells including CD3-positive T-cells. CD68: Immunohistochemical staining for CD68 shows the infiltrating cells include macrophages.

Nushida H, Ito A, Kurata H, Umemoto H, Tokunaga I, Iseki H, Nishimura A. A case of fatal multi-organ inflammation following COVID-19 vaccination. *Leg Med (Tokyo)*. 2023 Mar 20;63:102244. doi: 10.1016/j.legalmed.2023.102244. Epub ahead of print. PMID: 36990036; PMCID: PMC10027302.

They found massive inflammation in virtually every organ examined consistent with multisystem inflammatory disorder. With each successive shot her body appeared to be progressively primed to react more vigorously to the Spike protein produced by the long-lasting Pfizer mRNA. Because this cannot be predicted ahead of time, each parent should understand that their child could be the next one for a fatal reaction.

The Worldwide Corona Crisis, Global Coup d'Etat Against Humanity

by Michel Chossudovsky

Michel Chossudovsky reviews in detail how this insidious project “destroys people’s lives”. He provides a comprehensive analysis of everything you need to know about the “pandemic” — from the medical dimensions to the economic and social repercussions, political underpinnings, and mental and psychological impacts.

“My objective as an author is to inform people worldwide and refute the official narrative which has been used as a justification to destabilize the economic and social fabric of entire countries, followed by the imposition of the “deadly” COVID-19 “vaccine”. This crisis affects humanity in its entirety: almost 8 billion people. We stand in solidarity with our fellow human beings and our children worldwide. Truth is a powerful instrument.”
