

# FDA Confesses: Zero Scientific Evidence of “Monkeypox Virus” or Contagion... Not Even a “Genome” Found by Anyone... Anywhere

Same as with the imaginary "avian influenza virus"... and "SARS-COV-2"

Theme: [Science and Medicine](#)

*Sarah B. Kotler (“J.D.”) acting as Director, Division of Freedom of Information, US Food and Drug Administration (FDA) officially confirmed that the people running the FDA have no records authored by anyone, anywhere regarding the monkeypox virus.*

.  
. .  
. .  
. .

The FDA does not regulate or treat viruses. The FDA is responsible for protecting the public health by ensuring the safety, efficacy, and security of human and veterinary drugs, biological products, and medical devices; and by ensuring the safety of our nation's food supply, cosmetics, and products that emit radiation. Therefore, we have no responsive records. If you are interested, we

1. that scientifically prove/provide evidence of the existence of any alleged “monkeypox virus”, or
2. that even describes the purification of particles that are alleged to be “monkeypox virus” directly from bodily fluid/tissue/excrement of so-called “hosts”, or
3. that describe the purported “genome” of any alleged “monkeypox virus” being found intact in the bodily fluid/tissue/excrement of a so-called “host” (as opposed to fabricated in silico, aka a computer model), or
4. that scientifically demonstrate contagion of the illness / symptoms that are allegedly caused by purported “monkeypox viruses” [see [pg 6](#)].

“...we have no responsive records.”

Dear Requester,

I am writing in response to your request for:

All studies in the possession/custody/control of the FDA, authored by anyone, anywhere: 1. - that scientifically prove/provide evidence of the existence of any alleged "monkeypox virus" (showing that the alleged particles exist, invade and replicate in "host" cells and cause the illness/symptoms that they are alleged to cause). Note: Scientific proof/evidence is not opinions, speculation, declarations, review papers or descriptive studies. Scientific evidence requires use of the scientific method to test falsifiable hypotheses through valid, rigorous, repeatable controlled experiments. 2. - that describe the purification of particles that are alleged to be "monkeypox virus" directly from bodily fluid/tissue/excrement of so-called "hosts" (without adding any sources of genetic material or proteins), with purification confirmed via EM imaging (the images must be available as well). Purify = separate from everything else in the clinical sample. I am aware that according to "virus" dogma a "virus" requires host cells in order to replicate. I am not seeking records describing the replication of a "virus" without host cells or that describe a suspected "virus" floating in a vacuum or a strict fulfillment of Koch's Postulates. I am simply seeking records that describe purification (separation from everything else in the "host" sample). I am not seeking private patient records. 3. - wherein the purported "genome" of any alleged "monkeypox virus" was found intact in the bodily fluid/tissue/excrement of a "host" (as opposed to fabricated in silico, aka a computer model). 4. - that scientifically demonstrate contagion of the illness / symptoms that are allegedly caused by purported "monkeypox viruses". If any records match the above description and are publicly available, please provide enough information about each one so that I may identify and access it with certainty (i.e. title, author(s), date, journal, URL, DOI). Send via email.

The FDA does not regulate or treat viruses. The FDA is responsible for protecting the public health by ensuring the safety, efficacy, and security of human and veterinary drugs, biological products, and medical devices; and by ensuring the safety of our nation's food supply, cosmetics, and products that emit radiation. Therefore, we have no responsive records. If you are interested, we have already made information public regarding the milk supply ([Updates on Highly Pathogenic Avian Influenza \(HPAI\) | FDA](#)) and the process for approval of Avian Influenza test kits. ([Influenza Diagnostic Tests | FDA](#)).

In accordance with 45 CFR § 5.61 and 21 CFR § 20.41(b)(5), you have the right to appeal this

Sadly, it looks like logic still isn't Sarah's thing, because in her email she wrote (not for the 1st time) ([pg 6](#)):

"The FDA does not regulate or treat viruses. The FDA is responsible for protecting the public health by ensuring the safety, efficacy, and security of human and veterinary drugs, biological products, and medical devices; and by ensuring the safety of our nation's food supply, cosmetics, and products that emit radiation. Therefore, we have no responsive records." (emphasis added)

This, despite the fact that "experts" at the FDA [approved a quackcine](#) to "prevent monkeypox disease", are complicit in "[Emergency Use Authorizations](#)" of "[in vitro diagnostics... related to monkeypox](#)" and provide "[Information for Monkeypox Test Developers](#)", [etc.](#)

But hey, who needs scientific evidence when a [declaration](#) from Xavier Becerra that

“*circumstances exist*” is so much more convincing and legit... and everyone can just go along with that?

(I've asked Sarah to put her response into a signed letter, minus the irrelevant references to “avian influenza”.)

Many more failed FOI responses relating to the fake/false/fraudulent “monkeypox virus” narrative can be found [here](#).

(Note: this information has been sent to [~200 people](#) who work for “the state”, lamestream media, etc. at Canada, Isle of Man, England and the U.S., so that they can't claim later that they didn't know.)
