Theme: [Science and Medicine](#)

The powerful Global Financial Elites operating under the auspices of the World Economic Forum (WEF) are controlling, impoverishing, and destroying world populations using a social engineering strategy of Fear, Uncertainty, and Doubt.

The truth rarely sees the light of day amidst the drone-beat of incessant fear-mongering, the psychological warfare, the fake data.

At times, key perpetrators of this crisis publicly acknowledge the truth, knowing that the Lie has been largely implanted in the collective consciousness, and the truth will be drowned, censored, despised.

Below, Dr. Fauci admits that “asymptomatic transmission” has never been the “driver of outbreaks.”

Canadian Public Health Physician [Dr. Yaffe admits that](#) tests give false positives “almost half the time” in certain populations.

In this May 14, 2020 briefing, Chris Whitty, the UK’s Chief Medical Officer, admits that to most people, coronavirus is entirely harmless.

In March, 2020, the UK government admitted that COVID was not a “High Consequence Infectious Disease”:

Status of COVID-19

As of 19 March 2020, COVID-19 is no longer considered to be a high consequence infectious disease (HCID) in the UK.

The 4 nations public health HCID group made an interim recommendation in January 2020 to classify COVID-19 as an HCID. This was based on consideration of the UK HCID criteria about the virus and the disease with information available during the early stages of the outbreak. Now that more is known about COVID-19, the public health bodies in the UK have reviewed the most up to date information about COVID-19 against the UK HCID criteria. They have determined that several features have now changed; in particular, more information is available about mortality rates (low overall), and there is now greater clinical awareness and a specific and sensitive laboratory test, the availability of which continues to increase.

The Advisory Committee on Dangerous Pathogens (ACDP) is also of the opinion that COVID-19 should no longer be classified as an HCID.

The need to have a national, coordinated response remains, but this is being met by the [government's COVID-19 response](#).

Cases of COVID-19 are no longer managed by HCID treatment centres only. All healthcare workers managing possible and confirmed cases should follow the [updated national infection and prevention \(IPC\) guidance for COVID-19](#), which supersedes all previous IPC guidance for COVID-19. This guidance includes instructions about different personal protective equipment (PPE) ensembles that are appropriate for different clinical scenarios.
