The federal government is throwing away more COVID-19 vaccines, with nearly eight million doses of the Moderna vaccines discarded due to drying-up demand in Canada and around the world.

The National Post reported in June that the government had thrown away 1.2 million doses of Moderna's shot that had expired, along with 13.6 million doses of AstraZeneca's vaccine. The number of expired Moderna shots has now risen to 7.7 million and the government has also now disposed of 3.1 million doses of the Novavax vaccine. About 7,000 doses of the Pfizer vaccine has been thrown away.

The federal government's data for discarded vaccines are current as of the end of October this year and don't include vaccines that may have expired and were discarded after they were sent to provincial governments.

Canada ordered tens of millions of doses from seven different manufacturers before any of the vaccines had cleared clinical trials, at a cost of more than \$9 billion.

The Worldwide Corona Crisis, Global Coup d'Etat Against Humanity

by Michel Chossudovsky

Michel Chossudovsky reviews in detail how this insidious project “destroys people’s lives”. He provides a comprehensive analysis of everything you need to know about the “pandemic” — from the medical dimensions to the economic and social repercussions, political underpinnings, and mental and psychological impacts.

“My objective as an author is to inform people worldwide and refute the official narrative which has been used as a justification to destabilize the economic and social fabric of entire countries, followed by the imposition of the “deadly” COVID-19 “vaccine”. This crisis affects humanity in its entirety: almost 8 billion people. We stand in solidarity with our fellow human beings and our children worldwide. Truth is a powerful instrument.”
