[April 16, 2023](#) - Broomfield, CO - Pilar Peters was pregnant with triples in 2022. However, in Dec. 2022, doctors found a lump on one triplet, and babies were born via emergency C-

section on Dec. 27, 2022.

Baby Theo was diagnosed with Stage 4 Sarcoma and died on Jan. 31, 2023.

Baby Milo, Theo's identical twin was diagnosed with Stage 2 Sarcoma on Feb. 1, 2023 and had 6 rounds of chemo, 4 surgeries, 89 hospital inpatient stays.

"In an incredibly rare finding, it was determined that Milo's tumor was a metastasized site from Theo's cancer, since they shared a placenta in utero."

Maria Delgado is organizing this fundraiser on behalf of Pilar Peters.

Hello, my name is Maria and I am fundraising for my little sister Pilar Peters and her family. Pilar's story began when she learned she was pregnant with triplets last year. However, what was a joyous occasion suddenly became her biggest life challenge. In December of 2022, doctors discovered a lump on one of the triplets. As a result, the baby boys, Theo, Milo (identical twins), and Luca (fraternal) were born through emergency c-section on December 27th, 2022. After testing the mass, Pilar and her husband Riley learned Theo's mass was diagnosed as terminal stage four sarcoma cancer. On January 31st, 2023, at one-month-old, Theo passed away. The day after Theo's passing, Milo (Theo's identical twin) was diagnosed with stage two sarcoma cancer. In an incredibly rare finding, it was determined that Milo's tumor was a metastasized site from Theo's cancer since they shared a placenta in utero. After discovering Milo had cancer, the doctors tested both Luca and Pilar. Thankfully, both Luca and Pilar continue to test negative for cancer and will continue to be monitored as appropriate.

August 9th, 2023 by Maria Delgado, Organizer

Hello All,

Milo is in remission!! ❤️

Photo One: Pilar, Riley, and Milo ring the remission bell to memorialize the happy moment.

[May 16, 2023](#) - Sudbury, Ontario - Ryley Travis Bergeron-Folz, son of Jessica Folz and Danika Bergeron, was born a few days early by c-section on May 5th, 2023. At 10 days old he was diagnosed with rhabdomyosarcoma of the bladder (there had been some indication of a mild abnormality seen on fetal ultrasound).

Ryley is now 10 days old and has successfully had his picc line inserted. Little Ryley is embarking on a long journey of chemotherapy and surgery to remove the mass and potentially removing his entire bladder. He will be staying at Sick Kids for the start of his chemotherapy.

Katie Pajuluoma is organizing this fundraiser on behalf of Danika Bergeron.
Created May 16th, 2023

As some of you may or may not be aware, one of our family members (Shawn's cousin) and her wife, Jessica Folz and Danika Bergeron got some very shattering news. We are starting this Go Fund Me in hopes to raise money to help relieve some financial stress from Ryley's moms so they can focus on being there and supporting him through his journey. Please read their story below.

Ryley Travis Bergeron-Folz was born by c-section on May 5th, 2023 a couple days before his scheduled c-section. He just couldn't wait to be earthside and meet his wonderful mamas. Early in the pregnancy upon u/s it was noted that Ryley had slightly enlarged kidneys that had returned to normal size on a further u/s. Prior to being discharged home, the medical staff at HSN performed an u/s to make sure his kidneys remained normal. After quite some time patiently waiting for those results, **the doctors discovered a mass on Ryley's bladder.** Ryley was then rushed to Sick Kids hospital for further investigation. At only a couple days old he had already endured countless blood tests, multiple stent insertions

June 16, 2021 - Sadie Sheppard got her COVID shot in second Trimester and her baby developed brain cancer and died at 2 days old.

"Anya rapidly developed a cancerous brain tumor in utero (suspected at 30/32 weeks) that progressed so rapidly and shifted my organs in such a dangerous way my cesarean was performed by over 30 doctors, surgeons and techs."

"I got my COVID shot in the 2nd trimester and my baby developed brain cancer. I'm not sure if there are any links and my providers have stood by the fact that there are no links. But my mind can't help but wonder".

Her baby Anya lived 2 days and died on June 16, 2021.

BABY LIVED TWO DAYS

Sadie Sheppard is with Zac Sheppard.

June 16 at 9:23 PM · 🌐

just our final update - we are now home. everything is painful, everything hurts. we still do not have all the answers and we really just need space. the answers we have are hurtful, and the answers we don't have are hurtful too. Anya rapidly developed a cancerous brain tumor in utero (suspected at 30/32 weeks) that progressed so rapidly and shifted my organs in such a dangerous way my cesarean was performed by over 30 doctors, surgeons and techs. I had the option of choosing to drain her swelling in utero which would have made me less at risk, but would have killed her instantly chose an operation that top surgeons were terrified to perform. if we would have waited even one day longer, I could have died. aggressive childhood brain tumors are very very rare, but there are no statistics about the rarity of aggressive fetal brain tumors - because it just doesn't happen. we have been reassured that nothing we did or did not do would have changed this- Anya would have a some point in her childhood developed a deadly brain tumor.

I chose to risk my life for even a single cry or coo or to even see Anya make a face at us even once. there are absolutely no words to describe how heartbreaking it is to watch your sweet innocent baby pass. but Anya defied every single odd, and gave us 48 hours of love. she wasn't even supposed to live an hour, but we were able to give her comfort and allow her to pass with the love of her family. we were told she felt nothing but pain since the tumor progressed, but our care team was able to provide her with enough comfort to pass with us.

please don't be offended, but I will absolutely not be reaching out or responding to anyone outside of my home or postpartum team. we are absolutely gutted, in shock, and still trying to process how our last week has drastically changed the dynamic of our lives.

we will always love our sweet Anya

BRAIN CANCER

Sadie Sheppard

I mean this is just totally a grieving mothers "what if" theories. But I got my covid shot in the second trimester and my baby developed brain cancer. I'm not sure if there are any links and my providers have stood by the fact that there are no links. But my mind can't help but wonder.

My Take

COVID-19 mRNA Vaccinated pregnant women are having babies that develop aggressive cancers while still in utero.

These may be Turbo Cancers, but it is too early to tell.

I will raise a very serious concern that I believe has not been raised by anyone yet:

1. Lipid Nanoparticles (LNPs) cross the placenta
2. When a pregnant woman is vaccinated with an mRNA Vaccine, the LNPs in her blood cross the placenta and deliver Pfizer & Moderna mRNA to the fetus which can then produce the toxic spike protein.
3. DNA Contamination is also contained within Pfizer & Moderna LNPs, in addition to the mRNA
4. DNA Contamination is therefore also crossing the placenta, potentially integrating into the genome of the developing fetus.
5. This could lead to the initiation of an aggressive cancer in utero.

We've now had months of very important work done exposing DNA contamination of both Pfizer & Moderna COVID-19 mRNA vaccines.

However, as far as I know, no one has raised the possibility of DNA Contamination, contained within LNPs, being delivered across the placenta to the fetus, potentially integrating into its genome and causing extremely aggressive cancers.

The horror continues...

The Worldwide Corona Crisis, Global Coup d'Etat Against Humanity

by Michel Chossudovsky

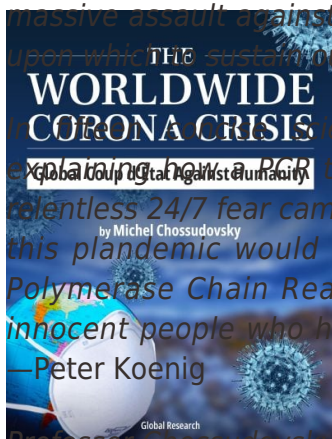

Michel Chossudovsky reviews in detail how this insidious project “destroys people’s lives”. He provides a comprehensive analysis of everything you need to know about the “pandemic” — from the medical dimensions to the economic and social repercussions, political underpinnings, and mental and psychological impacts.

“My objective as an author is to inform people worldwide and refute the official narrative which has been used as a justification to destabilize the economic and social fabric of entire countries, followed by the imposition of the “deadly” COVID-19 “vaccine”. This crisis affects humanity in its entirety: almost 8 billion people. We stand in solidarity with our fellow human beings and our children worldwide. Truth is a powerful instrument.”

Reviews

This is an in-depth resource of great interest if it is the wider perspective you are motivated to understand a little better, the author is very knowledgeable about geopolitics and this comes out in the way Covid is contextualized. —Dr. Mike Yeadon

In this war against humanity in which we find ourselves, in this singular, irregular and massive assault against liberty and the goodness of people, Chossudovsky’s book is a rock upon which we can stand in our fight. —Dr. Emanuel Garcia

Science-based chapters, Michel traces the false covid pandemic, explaining how a PCR test, producing up to 97% proven false positives, combined with a relentless 24/7 fear campaign, was able to create a worldwide panic-laden “plandemic”; that this plandemic would never have been possible without the infamous DNA-modifying Polymerase Chain Reaction test - which to this day is being pushed on a majority of innocent people who have no clue. His conclusions are evidenced by renown scientists. —Peter Koenig

Professor Chossudovsky exposes the truth that “there is no causal relationship between the virus and economic variables.” In other words, it was not COVID-19 but, rather, the deliberate implementation of the illogical, scientifically baseless lockdowns that caused the shutdown of the global economy. —David Skripac

A reading of Chossudovsky’s book provides a comprehensive lesson in how there is a global coup d’état under way called “The Great Reset” that if not resisted and defeated by freedom

loving people everywhere will result in a dystopian future not yet imagined. Pass on this free gift from Professor Chossudovsky before it's too late. You will not find so much valuable information and analysis in one place. -Edward Curtin
