From COVID-19 to Synthetic Design: Forcing a Shift to the Genetic Modification of Humans:

An Injection of Truth: The Ongoing Covidian Controversy in Alberta , Part II

This same phenomenon of public policy developed contrary to the thrust of scientific evidence, was repeated again and again throughout the world, including in Alberta Canada where I live. Alberta has been the main jurisdiction in Canada where there seemed in the recent past to be some level of government awareness of the need for some reckoning with the harm imposed on the public by perpetrators of the Covidian crimes.

Such inroads of reckoning with past harms, including facing the reality of millions of injection fatalities and injuries worldwide, form the the basic conditions for halting the extension of the invasive crimes against humanity. Only by making the responsible parties accountable for their lies and malfeasance to date, can precedents be firmly established to halt the damage being done and being contemplated by even more invasive and many-faceted applications of gene-modifying synthetic biology.

Skeptical perspectives on the Covidian crimes have been at best an undercurrent of most legislative bodies. Nevertheless, critical perspectives from within the decision-making entities of government have helped to encourage and anchor those millions of citizens who have understood that the supposed public health crisis which began in 2020, is something quite different from how it has been depicted by many mainstream sources.

In the United States **Senator Ron Johnson** utilized the US Congress to create forums to present the expertise and practical knowledge of many learned critics of the Covidian orthodoxy as pushed uniformly by coalitions of some of the world's most powerful agencies.

A similar phenomenon developed because of the efforts of a small group of Members of the European Parliament that gathered around the eloquent critiques developed by **MEP Christine Anderson**.

In the Westminster Parliament in the UK, British **MP Andrew Bridgen** became, like Anderson and Johnson, the point person for Covidian skepticism based in the UK's primary seat of government.

With some few small exceptions, elected MPs in the Canadian Parliament have, as individuals and as members of political parties, failed to organize events creating platforms to enable some of Canada's leading Covidian skeptics to articulate their positions. Way too much conformity of opinion prevailed in Parliament and in the big media venues to sustain any significant challenge to the injection mandates embraced so ferociously by Trudeau, Chrystia Freeland and the Liberal Party's NDP allies led by Jagmeet Singh.

Not surprisingly, the Canadian government is extending its Covidian preoccupations by trying to push the population into embracing a broad array of synthetic biology initiatives. In other words, the senior figures in the Trudeau government once again see nothing wrong

with putting the untested and unknown consequences of genetic modification at the forefront of Canadian health care.

Alberta, it seemed, would compensate somewhat for the severe democratic deficit at the national level of parliamentary governance in Canada. In mid June the United Conservative Party Constituency Association of the Calgary-Lougheed riding organized an event entitled “An injection of Truth.”

Highlighting **Dr Byram Bridle, Dr William Makis, Dr Eric Payne, Dr Jessica Rose, Dr Chris Shoemaker, Dr David Speicher, and Dr Mark Trozzi**, the event brought together some of Canada’s most expert researchers and medical practitioners critical of Canada’s policies of mass injections.

All of the presenters listed above have faced considerable persecution and even deplatforming for confronting lies and crimes of the promoters of the manufactured COVID crisis. A particular emphasis running throughout all of their presentations was the travesty of injecting children.

Back row left to right: Shaun Newman MC, Dr David Speicher, Dr Chris Shoemaker, Dr Mark Trozzi, Dr William Makis, Jeffery Rath LLB. Front Row left to right: Dr Eric Payne, Darrell Komick UCP Calgary-Lougheed president, Eric Bouchard MLA for Calgary-Lougheed, Dr Byram Bridle

Dr. Trozzi has assembled the video of the whole June 17 event as well as of its constituent parts.

On June 18 the main presenters organized to offer up a press conference of sorts. The quality of the video below, filmed by a single camera with sound that is far from perfect, is indicative of a lack of solid backup support.

I was surprised that an event of this magnitude of importance in Canada— an event with the backing of an important provincial government— was not dazzling in its production values. Certainly the event would have been better filmed if it had conveyed the Covidian message of the notoriously corrupt people at Alberta Health Services.

In the days following the *Injection of Truth* events, Premier Danielle Smith and the rest of the top leadership of the UCP Party were conspicuous in their failure to openly and proudly sing the praises of those who organized and participated in the *Injection of Truth* event.

For some reason Alberta's governing power seemed to lose heart before the onslaught of attacks levelled at the event by the New Democratic Party of Alberta during the final days of the leadership of Rachel Notley. Notley lost the provincial election of May 2023 to the Smith government.

Dr. William Makis, an Albertan who is currently one of the most courageous and erudite Covidian whistleblowers in the world, followed up on his controversial presentation at the *Injection of Truth* event. He presented a deserved Blitzkreig-style attack on the pathetic blundering of NDP officials who have dug themselves deeply into defending a pandemic of pedophilia that permeates the activities of Alberta Health Services and of the College of Physicians and Surgeons in Alberta.

In dealing with the deplatforming of several doctors who have tried to remain true to their Hippocratic Oaths to do no harm in the name of addressing COVID-19, Dr. Makis began looking into the contrast with the treatment of medical practitioners who have been charged and convicted of pedophilia. The double standards are striking. The contrast raises many questions about the partnership of Rachel Notley and Justin Trudeau as doctrinaire Covidian authoritarians who place a high premium on defending pedophiles.

Danielle Smith came to the top political job in Alberta in significant measure because she won the support of Albertans appalled with the COVID policies of former UCP Premier Jason Kenney. Premier Smith won the popular election in May of 2023 in the face of much media hostility. She won because many average Albertans, but especially those organized in opposition to the wrongheaded Covidian tyranny that the NDP has so tellingly epitomized, turned out to give Premier Smith a majority government.

Premier Smith's new assignment is to go head-to-head with former Calgary mayor Naheed Nenshi. But as she goes into battle with the new provincial NDP leader who replaced Rachel Notley, how will her core supporters view her apparent snub by failing to build on the momentum set in motion by the grass roots *Injection of Truth* event?

How tolerant will Premier Smith's core supporters be now that it seems she is giving ground to the Covidian culprits in the Legacy media, in the NDP, in Alberta Health Services, and in the perverse intrigues of the Alberta College of Physicians and Surgeons?

While it is said Premier Smith is an advocate of "free choice" when it comes to taking the gene-modifying injections for COVID and for a growing array of other ailments, how much has been done in Alberta by her government to create the conditions of *informed* consent? Without *informed* consent, how "free" can so-called free choice really be? What is the responsibility of the Alberta premier to put in place the conditions where solid educational resources are readily accessible to make it possible for Albertans to develop the capacity to give genuinely informed consent?

The AHS was never in the business of giving sufficient background education to enable Albertans to offer up genuinely informed consent for the injections that came on stream in 2021. There is no "free choice" on this pivotal public health issue as long as the Covidian lies remain mostly unaddressed by those in the upper echelons of the provincial and

national governments.

This is no time to go soft and to look the other way as millions more are offered up for human sacrifice in the transition from the lies and crimes of COVID-19 to the profoundly flawed forms of health care developing in the name of delivering synthetic biology.

Alberta Synthetic Biology & Biomolecular Design Hub

The next revolution in biotechnology will be the age of rationally designing and engineering biomolecular (RNA/protein)-based systems, molecular machines, and devices that can operate both within and outside of living systems (Synthetic Biology). The Alberta (Applied) Synthetic Biology & Biomolecular Design Hub (Alberta SynBioMoD Hub) will be integrated into the emerging synthetic biology network in Alberta and Canada and focuses on deploying emerging Synthetic Biology and bioengineering platform technologies through partnering with technology end-users from academia, industry and the private sector.

Dr. Anthony Hall is currently Professor of Globalization Studies at the University of Lethbridge in Alberta Canada. He has been a teacher in the Canadian university system since 1982. Dr. Hall, has recently finished a big two-volume publishing project at McGill-Queen's University Press entitled "The Bowl with One Spoon".

He is a Research Associate of the Centre for Research on Globalization (CRG).

The Worldwide Corona Crisis, Global Coup d'Etat Against Humanity

by Michel Chossudovsky

Michel Chossudovsky reviews in detail how this insidious project “destroys people’s lives”. He provides a comprehensive analysis of everything you need to know about the “pandemic” — from the medical dimensions to the economic and social repercussions, political underpinnings, and mental and psychological impacts.

“My objective as an author is to inform people worldwide and refute the official narrative which has been used as a justification to destabilize the economic and social fabric of entire countries, followed by the imposition of the “deadly” COVID-19 “vaccine”. This crisis affects humanity in its entirety: almost 8 billion people. We stand in solidarity with our fellow human beings and our children worldwide. Truth is a powerful instrument.”

Reviews

This is an in-depth resource of great interest if it is the wider perspective you are motivated to understand a little better, the author is very knowledgeable about geopolitics and this comes out in the way Covid is contextualized. —Dr. Mike Yeadon

In this war against humanity in which we find ourselves, in this singular, irregular and massive assault against liberty and the goodness of people, Chossudovsky’s book is a rock upon which to sustain our fight. —Dr. Emanuel Garcia

In fifteen concise science-based chapters, Michel traces the false covid pandemic, explaining how a PCR test, producing up to 97% proven false positives, combined with a relentless 24/7 fear campaign, was able to create a worldwide panic-laden “plandemic”; that this plandemic would never have been possible without the infamous DNA-modifying PCR test - which to this day is being pushed on a majority of people who have no clue. His conclusions are evidenced by renown scientists.

Professor Chossudovsky exposes the truth that “there is no causal relationship between the virus and economic variables.” In other words, it was not COVID-19 but, rather, the deliberate implementation of the illogical, scientifically baseless lockdowns that caused the shutdown of the global economy. —David Skripac

A reading of Chossudovsky’s book provides a comprehensive lesson in how there is a global coup d’état under way called “The Great Reset” that if not resisted and defeated by freedom

loving people everywhere will result in a dystopian future not yet imagined. Pass on this free gift from Professor Chossudovsky before it's too late. You will not find so much valuable information and analysis in one place. -Edward Curtin
