*On November 23, 2021, the WHO did a Facebook post claiming the vaccines side-effects are mild. You’d never guess that from the 45,000 comments they received—all negative.*

Here’s the WHO [Facebook post](#) of November 23, 2021:

**COVID-19 Vaccines**

 **World Health Organization**  
REGIONAL OFFICE FOR **Europe**

**Most people have mild or no side effects following COVID-19 vaccination.**

**Billions of doses of COVID-19 vaccines have been safely administered globally. Mild side effects – headache, fever and body aches - are normal within the first couple of days. Any concerns should be reported to your healthcare provider.**

Here are a few of the comments:

- [Gerald Rogers](#) (883 likes) This is what propaganda looks like... and look at This is what propaganda looks like... and look at the 8,500 comments of people who share story after story after story of serious to lethal side effects! 8,500 people so far speaking up on one post, and hardly a single comment praising the shot.

The World Health Organization, does not promote "health". Neither does the CDC, the government or most health care systems.

If their agenda was for us to be healthy they would be encouraging exercise, good food, fresh air and natural herbs.

I get that for "most people" the jab doesn't affect them much.

But here's the other Fact. 99.8% of people that get Covid have mild to none side effects long term, plus they have what the body is built for. Natural immunity.

And a lot of us, have strong immune systems because we focus on real "health" so our bodies never get it.

For those who love TRUTH and FREEDOM keep asking the question "WHY"?

- -Why did The pharmaceutical companies start developing these shots for Covid-19 before the virus was released?
- why has Pfizer locked up all the research and data for about 50 years?
- Why has the government made it impossible for anyone who was seriously hurt or affected to sue or legally hold accountable these companies?
- Why have all the groups on FB of people gathering to share their experiences and their horror stories after the shot been shut down and banned?
- Why have countries like Australia gone militant enforcing mandates and violate the choice and freedom of its citizens?
- Why does the government legally require companies to force their employees to comply and get the shot, or lose their jobs and benefits?
- Why are there places in the country that even the movie theaters and restaurants have been required to join the enforcers of these stupid mandates?

There are a lot more questions to keep asking.

We live in crazy and unprecedented times.

I want to reiterate this...

I'm NOT anti-vax

I'm anti-propaganda, anti-manipulation and anti-deceit and harmful practices

I'm PRO health. Pro-freedom. Pro-responsible decision making.

For those that choose to get it, I celebrate and honor your choice and hope that you stay healthy and strong.

And if you're like me, that chooses to take responsibility for my own health, then let's keep letting our voices be heard so they know WE WILL NOT COMPLY and have our rights abused.

- [Nicole De Graff](#) (6,000 likes; 177 replies) Long term heart damage, paralysis, blood clots and death are not mild. May God bring swift Justice to the perpetrators of this evil.
- [Leona Burton](#) (7,100 likes; 558 replies) The people have spoken and they're not happy.

I hope these companies aren't spending their profits? I see big huge lawsuits before too long!

- ....

I think you get the picture. [Check out the post](#) and scroll to a random comment or two.

And if you know how to view it in a wider column than this, let me know in the comments. It is such a horrible user interface.

 Thats because when someone goes in for help after their jab with bad side effects doctors deny black and blue that it was from that and don't list it 😞

 It's deadly. Don't touch it.  
 If you've already taken it, holistic protocols must be put in place to combat what is in your system. ...
