This skillfully researched book focuses on how a small socio-political American elite seeks to establish control over the very basis of human survival: the provision of our daily bread. “Control the food and you control the people.” This is no ordinary book about the perils of GMO. Engdahl takes the reader inside the corridors of power, into the backrooms of the science labs, behind closed doors in the corporate boardrooms.

The author cogently reveals a diabolical World of profit-driven political intrigue, government corruption and coercion, where genetic manipulation and the patenting of life forms are used to gain worldwide control over food production. If the book often reads as a crime story, that should come as no surprise. For that is what it is.

Engdahl’s carefully argued critique goes far beyond the familiar controversies surrounding the practice of genetic modification as a scientific technique. The book is an eye-opener, a must-read for all those committed to the causes of social justice and World peace.

What is so frightening about Engdahl’s vision of the world is that it is so real. Although our

civilization has been built on humanistic ideals, in this new age of “free markets”, everything- science, commerce, agriculture and even seeds- have become weapons in the hands of a few global corporation barons and their political fellow travelers. To achieve world domination, they no longer rely on bayonet-wielding soldiers. All they need is to control food production.

-Dr. Arpad Pusztai, biochemist, formerly of the Rowett Research Institute Institute, Scotland

If you want to learn about the socio-political agenda -why biotech corporations insist on spreading GMO seeds around the World- you should read this carefully researched book. You will learn how these corporations want to achieve control over all mankind, and why we must resist...

-Marijan Jost, Professor of Genetics, Krizevci, Croatia

The book reads like a murder mystery of an incredible dimension, in which four giant Anglo-American agribusiness conglomerates have no hesitation to use GMO to gain control over our very means of subsistence...

-Anton Moser, Professor of Biotechnology, Graz, Austria

F. William Engdahl is a leading analyst of the New World Order, author of the best-selling book on oil and geopolitics, *A Century of War: Anglo-American Politics and the New World Order*, His writings have been translated into more than a dozen languages.

[The Globalization of Poverty and the New World Order](#)

by Michel Chossudovsky

Michel Chossudovsky takes the reader through an examination of how the World Bank and IMF have been the greatest purveyors of poverty around the world, despite their rhetorical claims to the opposite. These institutions, representing the powerful Western nations and the financial interests that dominate them, spread social apartheid around the world, exploiting both the people and the resources of the vast majority of the world's population.

For a nuanced examination of the intricacies of the global political-economic landscape and the power players within it, pick up your copy of: [The Globalization of Poverty and the New World Order](#).
