

German Health Minister Admits COVID Jabs Can Cause ‘Permanent Disabilities,’ Contradicting Past Statements

Germany leads all Western nations in excess deaths since the rollout of the COVID shots, with a 44 percent increase recorded in January 2023.

Germany’s health minister has admitted that the COVID-19 injections can cause permanent disabilities after previously claiming that the jabs are without side effects.

In an [interview](#) with the German state media outlet ZDF on March 12, 2023, health minister **Karl Lauterbach** was confronted with cases of people who suffered injuries from the COVID shots, including a 17-year-old gymnast who was hospitalized and nearly died after receiving the BioNTech COVID injection.

“These fates are absolutely dismaying, and every single fate is one too many,” Lauterbach said.

“These are severe disabilities, and some of them will be permanent, so it’s difficult,” he added.

Lauterbach called for “a faster process of recognizing vaccine injuries” and claimed that “serious vaccine injuries” occur in “fewer than 1 in 10,000 vaccinations, according to data from the Paul-Ehrlich-Institute (PEI).”

News anchor Christian Sievers confronted Lauterbach with his previous statements regarding vaccine safety. In a tweet from August 2021, Lauterbach wrote:

True. And additionally, it’s about why a minority of society doesn’t want a **side-effect-free vaccine**, even though it’s free and can save their lives and the lives of many others. Therefore, I am pessimistic about voluntary sacrifices for climate protection.

“[emphasis added]

Stimmt. Und zusätzlich geht es darum, weshalb eine Minderheit der Gesellschaft eine nebenwirkungsfreie Impfung nicht will, obwohl sie gratis ist und ihr Leben und das vieler anderer retten kann. Daher bin ich pessimistisch was freiwillige Opfer für den Klimaschutz betrifft <https://t.co/ZP7W07PD4B>

— Prof. Karl Lauterbach (@Karl_Lauterbach) [August 13, 2021](#)

“Well, that was an exaggeration that I made once in a botched tweet. But it wasn’t fundamentally my attitude,” the German health minister said.

Sievers pushed back against Lauterbach, saying that the health minister had **“always given the impression that the issue of [vaccine] side effects is not really an issue at all.”**

“No, that’s not right,” Lauterbach replied.

“I just told you, I’ve always known the numbers. They have also remained relatively stable. These vaccines are used worldwide. 1 in 10,000. So you can say it’s a lot or you can say it’s not so much.”

“It is, in fact, a vaccination that protects against very severe disease and, by the way, very often lowers ‘Long COVID’ risk,” he continued.

“The benefits outweigh the risks, but it’s right, 1 in 10,000, that’s the incidence of severe side effects.”

Executive director of the Vaccine Safety Research Foundation, Steve Kirsch, disagreed with Lauterbach’s risk assessment.

This is the German Health Minister Karl Lauterbach admitting that the COVID vaccine causes serious injury in 1 in 10,000 doses. But the actual rate for serious injury is ~100X more than that; closer to 1 in 100 doses. For death, it is ~1 in 1,000 doses. But this is progress! <https://t.co/x828coBMg6>

— Steve Kirsch (@stkirsch) [March 13, 2023](#)

There is ample evidence that severe side effects, including death, from the COVID injections, occur much more frequently than Lauterbach claims. A [recent survey](#) carried out by a polling institute in Germany found that 23% of participants said that they experienced “severe adverse effects” after receiving COVID-19 injections. Furthermore, Germany led Western nations in [excess deaths](#) since the rollout of the COVID shots, with a 44 percent increase recorded in January 2023.

Another concerning fact is the [significant decline in live births](#) nine months after the COVID jab rollout. The German Federal Institute for Population Research [carried out a study](#) that showed “strong associations between the onset of vaccination programs and the fertility decline nine months after this onset.”

Big Pharma excluded from liability

In their contracts with the European Union (EU), pharmaceutical companies such as Pfizer and BioNTech were exempted from liability, making it almost impossible for victims of their mRNA injections to successfully sue these corporations for damages.

In his interview with Lauterbach, Sievers mentioned that due to the EU contracts exempting the pharma giants from liability, the German state is therefore liable and has to deal with claims for damages of people injured by the mRNA shots.

The German health minister said that since the pharmaceutical companies generated “exorbitant profits” he expects them to make “voluntary contributions” to pay for the medical costs incurred by people with vaccine injuries.

The Worldwide Corona Crisis, Global Coup d'Etat Against Humanity

by Michel Chossudovsky

Michel Chossudovsky reviews in detail how this insidious project “destroys people’s lives”. He provides a comprehensive analysis of everything you need to know about the “pandemic” — from the medical dimensions to the economic and social repercussions, political underpinnings, and mental and psychological impacts.

“My objective as an author is to inform people worldwide and refute the official narrative which has been used as a justification to destabilize the economic and social fabric of entire countries, followed by the imposition of the “deadly” COVID-19 “vaccine”. This crisis affects humanity in its entirety: almost 8 billion people. We stand in solidarity with our fellow human beings and our children worldwide. Truth is a powerful instrument.”
