

The Global Elite's 'Kill and Control' Agenda: Destroying Our Food Security

the Global Elite's coup d'état against humanity gathers pace.

Governments around the world continue to impose an expanding sequence of measures to curtail rights and freedoms ostensibly to tackle a 'virus'. In response, public demonstrations against these government measures are also ongoing and expanding with truck convoys the latest manifestation of this form of protest.

Unfortunately, while activists mistake these popular mobilizations for effective resistance, the Global Elite's coup d'état against humanity gathers pace.

Concealed beneath the 'virus'/'vaccine' narrative, and marketed by the World Economic Forum as the '[Great Reset](#)', this coup is designed to utterly transform human society and even human life. This is because the detail outlined in the 'Great Reset' documentation, which anyone can investigate for themselves, clearly identifies intended changes to some 200 areas of human activity, essentially characterized as part of the 'fourth industrial revolution'.

Beyond that, however, as a lengthening list of doctors, scientists and scholars have been warning us for some time, although their efforts are invariably heavily censored by corporate media, the injectables program is decimating the human population - see

['Killing Off Humanity: How the Global Elite is using Eugenics and Transhumanism to Shape Our Future'](#) - while ensuring that those who submit to it and survive will only do so as transhuman slaves.

See ['Beware the Transhumanists: How "Being Human" is being Re-engineered by the Elite's Covid-19 Coup'](#).

Even beyond the injectables, however, the Global Elite is using a vast range of other measures to implement its 'kill and control' agenda.

One means of doing this has been to exploit the 'pandemic' (and its control measures such

as lockdowns) to engineer the greatest redistribution of wealth from poor to rich in human history, thus starving to death vast numbers of people in Africa, Asia and Central/South America in the process – as the Director of the World Food Program had no trouble predicting in April 2020: see [‘WFP chief warns of “hunger pandemic” as Global Food Crises Report launched’](#) – while impoverishing (and often rendering homeless) substantial numbers in industrialized economies as confidently predicted by geopolitical analyst Pepe Escobar, also in April 2020.

See [‘Who Profits From the Pandemic?’](#)

Have these predictions been realized? As Oxfam has recently noted: ‘A new billionaire has been created every 26 hours since the pandemic began. The world’s 10 richest men have doubled their fortunes, while over 160 million people are projected to have been pushed into poverty.’ See [‘Inequality Kills: The unparalleled action needed to combat unprecedented inequality in the wake of COVID-19’](#).

But notable among the Elite’s other measures, including ongoing deployment of 5G which continues to devastate life generally – see [‘Deadly Rainbow: Will 5G Precipitate the Extinction of All Life on Earth?’](#) – are its ongoing efforts to destroy global supply chains, including those in relation to food, so that starvation functions to kill off far more than just marginalized populations but also to ensure that those left alive are compliant as the price of being ‘entitled’ to eat.

In essence, this component of their plan (which is now being rapidly implemented) is to disconnect humans from nature, herd us into ‘smart cities’ and destroy our sense of natural food; that is, destroy human culture.

Hence, using a combination of 5G, AI and blockchain technologies, the intention is to take complete control of food supply chains and get rid of natural food by creating lab-grown meat, synthetic foods and even ‘3D printed food’.

Watch [‘Architecting the Beast System’](#) and

[‘DARPA funds Soylent Green as Empty Shelves in USA – #BareShelvesBiden Trends’](#) and see

[‘Don’t Be Fooled: Lab-Grown Meat Is a Disaster in the Making’](#).

If you have not been following the progressive destruction of small farmers, the consolidation of agricultural land, the relentless promotion of genetically-mutilated organisms (GMOs), the destruction of food supply chains, the hoarding of food and even the destruction of food supplies, as well as the ongoing efforts to feed you a combination of synthesized trash and insect-based food substitutes, let me briefly outline the evidence below and tell you how Mohandas K. Gandhi would respond.

Control of Food Historically

Since the neolithic revolution (the transition from hunting/gathering to farming) began unfolding 60,000 years ago – see [The Biggest Estate on Earth: How Aborigines Made Australia](#) and [Dark Emu: Aboriginal Australia and the Birth of Agriculture](#) – humans have farmed open-pollinated seeds that simply allow a farmer to keep some seed harvested in one season to plant in the next. But that natural round has been progressively eroded over recent decades.

Among those who have spent considerable time drawing attention to what the Global Elite has been doing and plans for us in relation to food generally, Dr. Vandana Shiva is certainly

an outstanding figure.

In a series of articles and interviews over many years, Shiva and the organization she founded, Navdanya International, have pointed out how ownership of the genetic diversity of our food crops as well as agricultural land is being increasingly consolidated in the hands of fewer corporations owned by fewer individuals and how control of the food industry (from production to processing to distribution) is also being increasingly consolidated in the hands of fewer corporations and individuals.

Beyond this, Shiva has highlighted how capital and chemical intensive monoculture-based industrial agriculture is the biggest driver of species extinctions, including systematically wiping out the diversity of crops we grow and eat, and this has been transforming the very nature of the food we consume, not just by progressively eliminating this food diversity but also by aggressively introducing toxins and poisons in various forms as well as genetically-mutilated and, ultimately, synthetic foods.

See [‘Gates to a Global Empire over Seed, Food, Health, Knowledge... and the Earth’](#)
Vandana Shiva Editor

and

[‘The Poison Cartel is Poisoning the World, Driving Species to Extinction, and Contributing to Hunger’](#).

As Shiva has pointed out, just one of the many outcomes of the aggressive marketing of genetically-mutilated seeds has been an epidemic of farmer suicides in India.

See [‘How Monsanto’s GMO Creations Caused 291,000 Suicides in India’](#).

Source: [Natural Society](#)

Another prominent figure who has drawn attention to the many dramatic reverses in the ownership, control and diversity of food and food production is Robert F. Kennedy Jr. But to highlight just one of the myriad points made by Kennedy, he draws attention to a report highlighting that Bill Gates ‘has quietly made himself the largest owner of farmland in the United States.’

See [‘Bill Gates and Neo-Feudalism: A Closer Look at Farmer Bill’](#) and

[‘Bill Gates: America’s Top Farmland Owner’.](#)

Beyond this, researcher ‘Sam Parker’ has offered a history of the use of food as an instrument of control for the past 4,000 years beginning with the ominous words ‘The control of food for use as a weapon is an ancient practice.’ He nominates the major food conglomerates (Cargill, Continental Grain, Louis Drefuss, Bunge & Born, Andre, Archer Daniels Midland/Topfer, ConAgra, IBP, Nestle, Unilever, Philip Morris) and offers an explanation of how this food cartel, along with another three dozen food corporations, control the world’s food supply noting that, today, ‘food warfare is firmly under the control of London and New York’ and that the cartel is ‘prepared to apply a tourniquet to food production and export supplies, not only to poor nations, but to advanced sector nations as well’.

See [‘The BA Cartel Part 2 \(of a 3 Part Series\)’.](#)

So for those still unconcerned as humanity rapidly loses the little control it still has left of its food supply, it might be worthwhile to recall that infamous comment of Henry Kissinger:

[‘Who controls the food supply controls the people.’](#)

But whatever the threats to the food supply that have been accelerating and accumulating over recent decades, they have been dramatically compounded in the past two years.

Control of Food in the ‘Pandemic’ Era

Since the beginning of the so-called pandemic, global supply chains of goods, including food, have been severely disrupted with the intention of forcing them to collapse. This plan has been executed using a careful combination of restrictions implemented by governments, supposedly to contain spread of the non-existent virus. Primarily, it has included forcing workers out of their role in the production, transport and distribution of food supplies.

Hence, farmers have grappled with restrictions impeding their capacity to plant, tend and harvest crops or care for livestock, workers have been prevented from staffing canning and

processing factories as well as abattoirs – see [‘Staff shortages due to COVID-19 taking a toll across all industries in NSW’](#) – truckers have been unavailable to transport foodstocks – see [‘COVID-19 vaccines still mandatory for Canadian cross-border truckers, feds say’](#) – wharf labourers have been unavailable to load shipping containers of food onto ships – see [‘The supply chain crisis is a jobs crisis’](#) – and supermarket shelves are empty as stores struggle with product and staff shortages, which is particularly challenging for those in remote communities with limited food retail outlets. See [‘Grocery store closures loom amid labour, product shortages’](#).

None of this has happened because a virus will kill us, because the virus does not exist.

For just two of the myriad demonstrations of this point, see

[‘COVID-19: The virus does not exist – it is confirmed!’](#) and

[‘Statement On Virus Isolation \(SOVI\)’](#).

And for an account of researcher Christine Massey’s fruitless search over the course of more than a year to find evidence of an isolated virus, via Freedom of Information requests to health/science institutions all over the world, see

[‘164 health/science institutions globally all failed to cite even 1 record of “SARS-COV-2” purification, by anyone, anywhere, ever’](#).

Beyond restrictions supposedly imposed in response to the ‘virus’ threat, some natural disasters have disrupted food production and supply chains, such as when ‘unfavourable weather conditions’ reduced the expected potato harvest in Russia – see [‘Russia – 2021 saw potato production drop’](#) – drought was a key factor in Syria’s lowest wheat production in 50 years – see [‘Syria’s wheat production “lowest in 50 years” with fears of mass starvation: UN’](#) – and a flood shut down Vancouver, the largest port in Canada: ‘The floods temporarily shut down much of the movement of wheat and canola from Canada, one of the world’s biggest grain exporters’.

See [‘Floods cut rail access to Canada’s Vancouver port, disrupting goods shipments’](#).

Moreover, some food supplies, notably including grain among other products, are being hoarded. ‘Less than 20% of the world’s population has managed to stockpile more than half of the globe’s maize and other grains, leading to steep price increases across the planet and dropping more countries into famine. The hoarding is taking place in China.... Over the past five years, China’s soybean, maize and wheat imports soared two- to twelvefold on aggressive purchases from the U.S., Brazil and other supplier nations. Imports of beef, pork, dairy and fruit jumped two- to fivefold.’ The food, including grains to be fed to farm animals, is being stored in massive food-stockpiling bases but also in container ships anchored in the port at Dalian waiting to be unloaded.

See [‘China hoards over half the world’s grain, pushing up global prices’](#).

Other countries that traditionally supply food products just turned off the export tap early in the ‘pandemic’ to keep food supplies for domestic consumption.

See [‘Countries Are Starting to Hoard Food, Threatening Global Trade’](#).

And food stocks are being destroyed as, for example, the ongoing worker shortages continue to serve the insidious 'kill and control' agenda of the elite - see ['30,000 pigs culled on farms \[in UK\] as backlog remains "dire"'](#) - and the periodic 'apocalyptic bird flu' nonsense - see ['Scientists say an apocalyptic bird flu could wipe out half of humanity'](#) and ['UK: "Apocalyptic Bird Flu" Jumps to Humans as Authorities Cull Millions of Birds'](#) - gets yet another run and, as just one example, was used to 'justify' the slaughter of a million egg-laying hens in Israel.

See ['Massive New Bird Flu Outbreak Could Be 2022's Deadly Pandemic'](#).

More simply, perhaps, it is easy to prevent unvaccinated farmers from delivering crops to grain silos, as happened in Australia, for example.

Watch ['Farmers, Truckers STOPPED as Food Supply Collapses'](#).

Beyond these problems, however, it is happening because of the interrelated nature of supply chains, including when they collapse. Farmers have been having increasing problems growing food because of the difficulties of obtaining vital inputs, ranging from fertilizers for which 'supply chain logistics are a mess' - see ['Supply chain problems contribute to fertilizer worries'](#) - and pesticides - see ['Pesticide industry battling supply chain challenges, working to ensure 2022 availability'](#) - to machine parts and other inputs - see ['Supply chain issues hitting all segments of ag'](#) - as supply chains in other sectors have been shut down too.

Sometimes, there are simply no available empty containers on which to load the produce.

See ['Why there will be no end to the global container crisis anytime soon'](#).

And even the deployment of 5G, catastrophic for other reasons as noted above, is now exacerbating supply chain problems as it is introduced.

See ['Airlines warn of "catastrophic" crisis when new 5G service is deployed'](#) and ['Why 5G Is Dangerous for Planes — and People'](#).

Is all of this a total surprise?

Not if you are aware of the script of the 2015 Center for American Progress simulation ['Food Chain Reaction: A Global Food Security Game'](#), or have followed the progressive destruction of the food supply chain in recent years. Watch ['Farmers Panic, Can't Get Supplies to Grow Food'](#).

What Can You Do?

Fortunately, a great deal. But I gently encourage you to get on with it!

As Mohandas K. Gandhi, who was assassinated 74 years ago on 30 January 1948, was teaching more than 100 years ago, self-reliance is still the safest option, particularly when it comes to food. Whether grown in your own backyard or a community garden, and perhaps participating in a local trading scheme and/or possibly a local farmers market, individual, family and community self-reliance in food-growing is the only viable option for the near-term future if survival is among your desired personal outcomes.

If you want to grow your own food with the intention of becoming self-sufficient and you are

starting from scratch, watch this recent webinar by [Marjory Wildcraft](#), coordinator of the Grow Food Network: [‘You Can Grow Food’](#).

There is high quality information on growing food for vegans and vegetarians in John Jeavons’ book [How to Grow More Vegetables](#).

In this video, the Ice Age Farmer, Christian Westbrook, interviews Marjory Wildcraft about working with the local community to establish and maintain a community food garden:

[‘Building Food Security through Community – Marjory Wildcraft’](#).

And David Holmgren, co-originator of permaculture, offers excellent resources explaining how to create a permaculture food garden for your backyard and community at his website [Holmgren Design](#).

But don’t forget, if you are not resisting the elite agenda overall, it won’t matter how self-reliant in food production you have become, you will be killed or enslaved by another component of the multifaceted nature of the elite plan.

Information on strategically resisting the World Economic Forum’s ‘Great Reset’ is explained on the [‘We Are Human, We Are Free’](#) website and the simplest form of this strategic resistance is outlined on the [one-page flyers, now available in 15languages](#) (Czech, Danish, English, Finnish, French, German, Greek, Hebrew, Hungarian, Italian, Polish, Romanian, Russian, Spanish & Slovak) with more in the pipeline.

If strategically resisting the ‘Great Reset’ appeals to you, consider joining the [‘We Are Human, We Are Free’ Telegram group](#) as well.

WE ARE HUMAN

WE ARE FREE

WORLDWIDE NONVIOLENT RESISTANCE TO ELITE CONTROL – *THE GREAT RESET*

We Are Human, We Are Free is a worldwide nonviolent resistance movement to free ourselves from elite control and resist the forces of fear and dehumanisation. Our aim is to build a mass civil resistance movement to undermine the power of the criminal Global Elite to control us,

and to regain the freedoms that make our lives worth living. Because we are human, we are free to make choices. The time has come to choose - are we on the side of love, life and freedom or fear, self-imprisonment and tyranny?

WHAT CAN YOU DO?

Refuse Covid-19 injections, tests and passports. Big Pharma is not honest or safe. Choose natural health.

Keep your small business open in lockdown. Buy from small businesses. Don't use contact-tracing QR codes.

Don't wear masks or social distance. Staying human is more important than living in fear.

Boycott corporate & government media that misinform & censor. Choose uncensored media & social media.

Don't buy 5G or smart devices/systems. Resist the fourth industrial revolution. Defend our humanity.

Don't pay Covid-19 related fines. Risk becoming a prisoner of conscience. Seek support.

Pay with cash & switch to community owned banks. Grow your own food. Join local trading schemes.

Wear an orange armband, scarf, or ribbon to show solidarity with the movement.

<https://wearehumanwearefree.org>

Conclusion

The global food supply chain is being systematically destroyed. This is happening as part of the overall elite agenda to kill off a substantial proportion of the human population and enslave those left alive. Any reading of the World Economic Forum's 'Great Reset' program

and its related eugenicist and transhumanist agendas makes this clear even if, occasionally, one needs to read between the lines.

While resisting this entire agenda is an absolute necessity if humanity is to survive in the form we have existed for the past 200,000 years, our sustained resistance is going to depend on people being able to eat.

So getting organized to defend yourself and your family by growing your own food and working with like-minded people in your local community are essential elements of our survival even if, in itself, self-reliance in food production is not enough.
