

The Global Genome Bank: Total DNA Control of the World Population

A Rockefeller Foundation Initiative

“Fast, accurate genomic sequencing information is the key to ending the Covid-19 pandemic and the suffering it has caused. Yet today only 14 countries, all of which have developed economies, are sequencing five percent or more of their cases and sharing them through global databases.”

This wonderful, generous comment stems from **Mr. Rajiv J. Shah, President of the Rockefeller Foundation**. He added,

“For that reason, The Rockefeller Foundation is strengthening global sequencing capacity - to end this pandemic for all as soon as possible.”

The “*Genome Collection Program*” may last until the end of UN Agenda 2030, when the *Global Genome Data Bank* should be completed. The Rockefeller Foundation wants to spend US\$ 20 million on this project. That’s, of course, peanuts compared to the wealth of personal information and control mechanism the Rockefeller Foundation will have acquired.

At present, the Rockefeller Foundation says there are only 14 countries - “developed” countries that is - “*so far sequencing 5% or more of their cases and sharing them through global databases.*”

This is the full report of the latest Rockefeller never-ending saga towards a globalist world, a globalist control of the human DNA, and a globalist approach to the Rockefeller-Gates *et al* eugenic agenda. See [here](#).

What better tool than total DNA control of individuals and of different ethnic groups and races to gain control of the world population?

Does it have a bearing on the issue of “population reduction”?

PRESS RELEASES/

The Rockefeller Foundation Announces Key Grants & Collaborations to Strengthen Global Genomic Sequencing & Data Sharing

With full DNA control of the world population and algorithms and artificial intelligence (AI) to bring about any combination these powerful elites control peoples lives. Potentially, diseases and viruses could be tailor-made to affect certain ethnic groups or races and to leave others intact, untouched from the disease.

A trial run had actually taken place with the SARS (Severe Acute Respiratory Syndrome) outbreak in China in 2002-2003. Preceding this epidemic, hundreds of scientists from Harvard and other reputed US universities were discovered roaming the rural areas of Anhui province, [collecting DNA samples from the Chinese population](#).

The name of Yang Huanming, the director of sequencing work for the Chinese Human Genome Project, was omitted from the Dec. 20 installment of “The Body Hunters” series on Harvard University’s genetic research in Anhui province. Yang said, **“I hope that Harvard and the School of Public Health will understand that the [recruiting] methods they used in China are unacceptable to the Chinese.”** ...

They came from distant farming villages ... “We were told there would be free medical care,” he said. “So of course everybody came out.”

There was a catch, however: **Residents had to give blood.**

This was no ordinary blood drive. It was genetic research, a pamphlet explained to participants. But many couldn’t read, and few could have guessed at the tangle of scientific and business dreams that lay behind the project.

DNA from this region was coveted in the West. Researchers at Harvard University and its corporate sponsor, Millennium Pharmaceuticals, Inc., of Cambridge, Mass., believed the isolated population here and elsewhere in the mountainous Anhui province **held a treasure of unpolluted genetic material that could yield medical breakthroughs and perhaps millions in biotech profits.**

Because it was unusually homogenous and made medical research easier, the DNA in **the local population’s blood “was more valuable than gold,”** the lead Harvard researcher reportedly told colleagues. Ounce for ounce, that would prove a sound estimate. (John Pomfret; Deborah Nelson, [Washington Post](#), emphasis added)

The 2002-2003 SARS Coronavirus

The Harvard researchers were eventually discovered and kicked out of the country. But it was too late. They had enough DNA samples to design a coronavirus especially for the Chinese genome.

The SARS coronavirus, targeting the Chinese, hit China in 2002 and lasted through 2003. The disease incidence was 8,096 cases with a known 774 deaths. Almost all of the cases and deaths were in mainland China, Hong Kong and Taiwan. A handful people affected elsewhere, like in the US and in Europe, were all of Chinese origin. It was a perfectly targeted virus? Was it a prelude to what was to follow some two decades later?

In any case, the Chinese knew about the tailor-made virus after discovering Harvard students collecting Chinese DNA - which is why they were so well prepared when the 2020 SARS-CoV-2 "epidemic" hit.

In relation to SARS-CoV-2, the cases were so few and far in between, it would be an exaggeration to call it a "pandemic". Nevertheless, the Chinese immediately locked down Wuhan and later a considerable stretch of Hubei Province, some 50 million people - and other regions where SARS-CoV-2, later called Covid-19 by the WHO, was discovered.

China knew and knows that they are a "target" for the west which perceives China as a threat and her different approach to "worldwide cooperation" with a more egalitarian economic system, which doesn't necessarily fit the western model. In fact, SARS-CoV-2, alias Covid-19, has to this date never been isolated.

As the world was watching - and in particular the Gates and the Rockefellers - how China would deal with the virus which was initially most likely again attacking the Chinese genome - were other strands released throughout the world? Some of them adapted to a particular genome, like in Italy and Iran?

In hindsight it became clear, that this Covid "outbreak" was a mere experiment to check out people's reaction and to prepare politicians who had been coopted into this 10-year UN Agenda 2030 for possibly much worse to come - and lasting. However, we can stop it, if we get off our horses riding in comfort.

According to some estimates, there are more than 20 different variations floating around but the deviation from one variation to another is on average around 5% or less. With every new mutation the already low mortality rate decreases further.

Of course, the latest Rockefeller Foundation's plan - see above, and [again here](#) - to create a "[Pandemic Prevention Institute](#)" - all out of the goodness of their hearts - is like a bad joke, not to call it full-fledged hypocrisy, when one knows the background to this story - this monster plan of controlling humankind's genome.

While the Rockefeller Foundation's Master Plan officially is to prevent viral diseases, all the activities described in [their website \(above\) are targeting research](#) into genome manipulation, not to control viral diseases, but potentially to control humanity WITH viral and other diseases. Thus, the contrary to what they say is the purpose of their 20-million-dollar plan. Once their worldwide genome / DNA inventory is complete - or even before - they would theoretically "be able to decide who is to live and who is to die". Algorithms and

AI will help.

All the while, the Rockefeller Foundation's monster plan is working to expand global genomic sequencing capacity in collaboration with a range of organizations across several key geographies, such as sub-Saharan Africa, the US, and Asia, all officially in view of preventing Covid – the benign flu-like disease from spreading farther and to contain it. The plan, they pretend to be the official objective, includes several institutions with which to collaborate to eventually stop the “deadly” disease:

- **GISAID Initiative – Global Initiative on Sharing All Influenza Data** – from vision to reality. It is an initiative created by the Rockefeller and Gates Foundations in 2008, to “counter” the Avian flu. *“GISAID’s role today is to accelerate the advancement of its pathogen data sharing platform and to further incentivize the global community of data generators to rapidly share outbreak data to enable real-time public health responses.”*

Clearly, **the real agenda is DNA data collection, on a global basis.** It’s the Globalists at work with every activity they undertake.

- **CSIR-Center for Cellular and Molecular Biology** – is working *“on behalf of a consortium of pathogen genomics sequencing centers to develop targeted sampling strategies, optimize bioinformatics tools, and enable real-time understanding of viral evolution, while building a long-term pathogen genomics and surveillance platform across India”.* This discloses openly their intention, if people are getting as far as reading the details into it.
- **Stellenbosch University** *“to refine sampling, expand bioinformatics pipelines, catalyze surveillance-informed public health decision-making, and expand local knowledge through fellowships and workforce development programs throughout Africa.”*

Here too, no secrets. A program of DNA research throughout Africa, focusing on tribal differences. This may be important when it comes to who is who in exploiting natural resources for the northern elite and who is apt to grow food for the remaining western societies. Knowing their genome, may make it easy to discard the considered “useless” eaters.

- **U.S. Regional Accelerators for Genomic Surveillance** *to provide strategic coordination and operational support towards improved and diversified regional surveillance efforts across a network of institutions, including the Broad Institute of MIT and Harvard; Louisiana State University Health Shreveport; University of Florida, in collaboration with the University of Central Florida; and University of Wisconsin-Madison.*

This is key to get the major universities (health faculties) on board. Once coopted into this evil globalist program, it may not be easy to skip out – there is always an element of blackmailing that may be used to keep potential deserters on board. These are old “carrot and stick” strategies, dating back to way before the Roman Empire. They still work. Look at all the reputed scientists that keep nodding along with the Covid lies – cowardice for personal benefits. Maybe a placebo, instead of an mRNA-gene modifying experimental vaxx?

Additionally, The Rockefeller Foundation and the World Health Organization are co-leading a working group on genomic surveillance within the ACT-A Diagnostics pillar. This group will

complement the groups set around the WHO Global Risk Monitoring Framework for variants and consultations and will focus on harmonizing, coordinating, and accelerating priority activities across country, regional and global partners by building on existing initiatives and avoiding duplication.

This says it all. The World Health Organization (WHO) is coopted into driving not only the Rockefeller-Gates-WEF's depopulation agenda, but remain the lead UN agency on which the world has to rely on for any epidemic health advice. After all, WHO was created by the Rockefellers in 1948. It was then already the idea to bring health under one roof, so it can be easier manipulated.

And at the same time, Rockefeller's power from *Standard Oil*, which had a worldwide monopoly on petrol gradually converted a natural plant-based pharmaceutical industry into a petrochemical-based gigantic pharma-industry, today going hand-in-hand with petrol as the world's monopoly on energy.

As a sideline, in 2020, 84% of the world's energy is hydrocarbon based, almost unchanged since 2000 (86%) - and this despite 26 COPs - the 26th one currently ongoing in Glasgow, wasting horrendous financial and energy resources (producing untold amounts of CO2) to make the world believe that our "leaders" will stop Mother Earth's climate from changing. COP stands for "Conference of the Parties".

What an arrogance. Do they really not know that all those temperature and climate changes that Mother Earth experienced over millions of years, have their origins in solar activities? - What a hypocrisy! A hypocrisy that couldn't show to the world any better, what western leaders actually are all about: US President, Joe Biden came to the Glasgow COP26 with a 84-car motorcade. Bringing the cars by air to Scotland plus driving them - and all the surrounding security, emits within a week about the same amount of CO2 as a small country in a year. - That's COP26; the conference of the climate masters. Our world is just perfect - and with the growing Covid tyranny - it's getting more perfect by the day.

"DNA, More Valuable Than Gold"

Back to the DNA collection - the Global Genome Data Bank. **The WEF has already designed the next generation of Vaccination Certificates, or "Green Passes". It's blood-based. Yes, blood-based.**

Recall the statement of Lead Harvard Researcher in Anhui Province (quoted above) the DNA in the local population's blood "was more valuable than gold," ([Washington Post](#))

To make sure that you have had your mRNA gene-modifying killer vaccine-shot, in the form of one of the multiple boosters that will soon become compulsory, there will be blood-sample spots around countries. So as to extend your Covid-vaxx certificate, you will have to give a blood sample. See [this](#).

Again, as a "mandatory" rule for the elite's "Dark Cult", they have to inform the people what they are up to. So, they do with [this report](#), "*The Rockefeller Foundation Announces Key Grants & Collaborations to Strengthen Global Genomic Sequencing & Data Sharing*" in disguise, of course.

This project, the establishment of a Global Genome Bank - along with full digitization of

everything, including the human brain, would be the death knell of our civilization. As blunt as that. But it would not be the end of the world. Historians say there have already been 6 cradles of civilization on earth. See [this](#). Maybe more, if you consider Atlantis. They all self-destructed in one way or another. And so may we.

But it doesn't have to be.

We could all step out of the current matrix of tyranny in unison, in solidarity in an awakened spirit, out of this tyranny and start a parallel society.

Remember, they are few and we are many.

Also remember, it doesn't matter if they – the elitist “diabolical Cult” takes over all our earned and accumulated resources, assets. We don't need them in a “new” world. We need peace and solidarity to start from scratch. Money is an instrument that only has value, because we have given it value.

In a higher spirit, which the Dark Cult never can reach, there is life without money. We just have to be bold enough to try it.

Although, we are all born “free” – and freedom is a human right, but it is a human right that is not given for granted – we have to fight for it. – And fight we will.
