

# Global Research's New Internal Search Engine

By [The Global Research Team](#)

Global Research, March 15, 2022

Dear Readers,

In light of Big Tech's efforts to suppress independent media, Global Research articles are no longer picked up by external search engines like Google, DuckDuckGo, Bing, etc.

As a workaround, we are excited to announce that we have just rolled out a new internal search functionality that enables you to access an extensive list of articles from our archive.

To use this feature, kindly refer to the instructions below.

The screenshot shows the Global Research website's internal search engine. At the top, there is a navigation bar with various categories like "US Nato War", "Economy", "Civil Rights", etc. The search bar is prominently displayed with the word "myocarditis" entered. Below the search bar, the results are listed, including articles such as "VAERS Myocarditis Already 47% of 2021 in Just First 2 Months of 2022" and "People are Dying Worldwide: 'Foreign Aid' to Finance 1.8 Billion Vaccine Doses...". On the right side, there are filters for "In Categories" and "In Authors". A red number "1" is placed above the search bar, and a red number "2" is placed next to the "In Authors" section.

Selected Articles: "The Numbers Killed by These Vaccines Is Much Worse than What We Thought". Dr.

Sucharit Bhakdi, Dr. Mike Yeadon

By Global Research News, 31 December 2021

... clots from expressing spike protein. We were aware of autoimmune attacks on ones own tissues expressing spike protein to which our killer lymphocytes were primed, such as **myocarditis**. But what's new is the revelation that lymph node cells are also being invaded by the gene-based agents and marking THEM for auto destruction. Bombshell ...

**Video: What's Going On? Athletes Dropping Like Flies. Heart Disease Endemic in Young Athletes?**

By J Wilderness, 18 December 2021

All Global Research articles can be read in 51 languages by activating the "Translate Website" drop down menu on the top banner of our home page (Desktop version). To receive Global Research's Daily Newsletter (selected articles), click here. Visit and follow us on Instagram at @crg\_globalresearch. \*\*\* Note to readers: Please click the share ...

**The Pentagon's Dilemma: The Covid Vaccine Impairs the Performance of U.S. Fighting Forces**

By Prof Michel Chossudovsky, 17 December 2021

... Mandatory Vaccination ... To Protect". Nonsensical statement by the Secretary of Defense. The adverse events and injuries pertaining to the Covid vaccine are amply documented: thrombosis, heart attacks, **myocarditis**, blood clots, cancer, neurological impacts. Indelibly these vaccine related "health risks" will affect vaccinated military personnel as well as the performance and capabilities of "US fighting forces ...

1. Type keyword in the "Search" field at the top banner of our website.
2. As results come out, you can choose specific authors by clicking their names at the right navigation bar.
3. Scroll through the bottom to proceed to the next page of search results (if available).

We encourage you to utilize this functionality to aid further reading and to circumvent the massive censorship directed against us.

Thank you for your support!

With best wishes,

The Global Research Team
