The world is at a dangerous crossroads. The United States and its allies have launched a military adventure which threatens the future of humanity.

The ultimate objective is World conquest under the cloak of "human rights" and "Western democracy".

*America's hegemonic project in the post 9/11 era is the "**Globalization of War**" whereby the U.S.-NATO military machine -coupled with covert intelligence operations, economic sanctions and the thrust of "regime change"— is deployed in all major regions of the world. The threat of pre-emptive nuclear war is also used to black-mail countries into submission.*

This "Long War against Humanity" is carried out at the height of the most serious economic crisis in modern history.

It is intimately related to a process of global financial restructuring, which has resulted in the collapse of national economies and the impoverishment of large sectors of the World population.

Michel Chossudovsky

The "globalization of war" is a hegemonic project. Major military and covert intelligence operations are being undertaken simultaneously in the Middle East, Eastern Europe, sub-Saharan Africa, Central Asia and the Far East. The U.S. military agenda combines both major theater operations as well as covert actions geared towards destabilizing sovereign states.
