

# GMOs: Power, Profit and the Patenting of Life

By [Global Research](#) and [Global Research](#)  
Global Research, May 22, 2014

Theme: [Biotechnology and GMO](#)

The debate on genetically modified foods is making a powerful statement this weekend, with the "[March Against Monsanto](#)" being planned on Saturday, May 24, in over 50 countries across the globe. (More info [here](#).)

Today more than ever, the world's food resources are being hijacked by giant corporations that are turning farms into factories and replacing natural resources with genetically modified "food-like" substances.

In the bestselling book, "[Seeds of Destruction: The Hidden Agenda of Genetic Manipulation](#)", author [F. William Engdahl](#) takes the reader inside the corridors of power, into the backrooms of the science labs, behind closed doors in the corporate boardrooms. He cogently reveals a diabolical world of profit-driven political intrigue, government corruption and coercion, where genetic manipulation and the patenting of life forms are used to gain worldwide control over food production.

This skilfully researched book focuses on how a small socio-political American elite seeks to establish control over the very basis of human survival: the provision of our daily bread. "Control the food and you control the people."

This is no ordinary book about the perils of GMO. If the book often reads as a crime story, that should come as no surprise. For that is what it is.

Engdahl's carefully argued critique goes far beyond the familiar controversies surrounding the practice of genetic modification as a scientific technique. The book is an eye-opener, a must-read for all those committed to the causes of social justice and world peace.

*[F. William Engdahl](#) is a leading researcher on the destruction of the planet's food system and the profit-driven enterprises that are driving this devastating process.*
