In-depth Report: [THE H1N1 SWINE FLU PANDEMIC](#)

The core essence of “Greater Things” is that there is always a better way to do things — anything — whether it be religion, politics, science, academia — anything. To the extent that we get institutionalized and codified in a set belief system, is the extent that we inhibit the ability to grow and learn new and better ways. – Dr. Andrew Moulden.

A growing number of doctors, other health professionals and citizens are attempting to prevent the humanitarian disaster planned for this October when the new H1N1 vaccine is to be deployed in a grand scale, military, war on terror manoeuvre .

“Primum non nocere” (“First do no harm”), medical ethics standard attributed to Hippocrates that became obligatory for physicians prior to practicing medicine in the 4th century AD is still upheld by some doctors who oppose the worldwide October plan including what Global Research Director, Michel Chossudovsky warns is a military operation leading to global militarization control of individuals.

An under-reported first International Swine Flu Conference being held in Washington DC this weekend includes sessions on “conducting morgue operations,” “mass fatality planning” and “unwillingness to follow government orders,” and “training teachers to screen for symptoms ...and “transport ill students.”(Jesse Woodrow, They have planned to take kids from schools for Mass Vaccinations and Quarantines WAKE UP!) (video)

Dr. Chossudovsky asserts that chilling reports such as those recently released in the UK about mass morgues are “totally fabricated” and “[t]here is absolutely no scientific evidence to support these claims.” (Michel Chossudovsky, Fear, Intimidation & Media Disinformation: U.K Government is Planning Mass Graves in Case of H1N1 Swine Flu Pandemic, Global Research, August 21, 2009) (online)

“Realities are turned upside down. The British government is deliberately misleading the British public,” states Chossudovsky.

“There is ample evidence, documented in numerous reports, that the WHO’s level 6 pandemic alert is based on fabricated evidence and a manipulation of the figures on mortality and morbidity resulting from the N1H1 swine flu,” he advises. (emphasis added)

CBS in London reported, “Experts estimate swine flu to be about as dangerous as seasonal flu, and there usually isn’t a high demand for those vaccines.” (CBS, Gov’ts Worry About H1N1 Vaccine Contracts, London, July 16, 2009. (online)

“State and local public health planners,” however, “have been asked to plan for vaccine becoming available mid-October under the following scenarios: 40, 80, or 160 million doses

becoming available from the 5 manufacturers (total) over approximately a one month period, followed by weekly amounts of 10, 20 or 30 million doses” according to the recent CDC report.

Barbara Loe Fisher is alerting the public to recognize that the flu is not the problem and that the dangerous vaccine and further removal of rights requires urgent public education and action to thwart the October plan.

Sherry Beal stated yesterday during the KPFK public radio “Health Planet, Health Me” program that H1N1 is by far the greatest issue impacting humanity than anything that has happened in her 25 years as a health science journalist, (KPFK Sherry Beal radio interview, “Healthy Planet Healthy Me, August 21, 2009) yet mainstream news has made little if any mention of the Washington DC conference ending today. (audio)

Deadly vaccines deployed this October

Numerous doctors and other health professionals agree with Alliance for Human Research Protection Director, Dr. Vera Sherav who stated in the KPFK interview yesterday that H1N1 vaccine has potential to rapidly and dangerously spread the disease.

“All vaccinations cause immediate and delayed, acute and chronic, permanent and transient, disease and disorders that cut across all organ systems,” states Dr. Andrew Moulden BA, MA, MD, PhD. (video)

War tactics of fear mongering war and media black-out on vaccine dangers and martial law is seemingly designed to cause ill-informed citizens to submit to the dangerous H1N1 vaccine.

Chossudovsky’s August 19 Fear, Intimidation & Media Disinformation: U.K Government is Planning Mass Graves in Case of H1N1 Swine Flu Pandemic (online) report states:

“[A]mply documented and denied by Western governments, the proposed vaccines could result in more deaths than those caused by the H1N1 influenza, as confirmed by Britain’s Health Protection Agency and the letter, sent to about 600 neurologists on July 29, is the first sign that there is concern at the highest levels that the vaccine itself could cause serious complications.

Chossudovsky refers to the use of a similar swine flu vaccine in the United States in 1976 when:

- * More people died from the vaccination than from swine flu.
- * 500 cases of GBS were detected.
- * The vaccine may have increased the risk of contracting GBS by eight times.
- * The vaccine was withdrawn after just ten weeks when the link with GBS became clear.
- * The US Government was forced to pay out millions of dollars to those affected. (Mail on Sunday, August 16, 2009)

Code Red in effect now - martial law

Few choices will be allowed to citizens in the present Code Red Emergency, according to Barbara Loe Fisher, President National Vaccine Information Center. (video)

Massachusetts legislators have already passed pandemic influenza legislation legalizing

entering homes without consent of occupants, quarantining without consent and abandoning free assembly of citizens.

The National Vaccine Information Center public vaccine education and advocacy watchdog, urges everyone to rapidly become informed about H1N1 'swine' flu, vaccines and rights on freedom of choice, and to act upon them:

"As Dept of Homeland Security Officials are declaring that 'any' disease outbreak is a matter of 'Homeland Security,'

As Dept of Defense are defining public demonstrations as 'low-level terrorism,'

As plans are being made to designate 'selected US airports as quarantine centers through which all airplanes would be Re-routed for passenger health inspection;'

And as fast-tracked 'experimental' pandemic flu vaccines are being created to be given first to American children in schools:

It is time for all of us, whether public health doctors or ordinary citizens trying to protect our health; it is up to all of us to act in responsible and rational ways." (Barbara Loe Fisher, 2009)

Mass public education about mass vaccination planned

Yesterday, Dr. Sherav agreed with knowledgeable ethical doctors globally: the "vaccine can absolutely spread the H1N1 'swine flu.'" (KPFK Sherry Beal radio interview, "Healthy Planet Healthy Me, August 21, 2009) (audio)

"This is no time to be a spectator, nor to hide in fear, and there's no sense in waiting until the worst possible scenario happens," writes citizen action group, Vaccine Resistance Movement (VRM) coordinators, Wayne Prante and Joel Lord on the world's largest online social network, Face book. (online)

Through Facebook, VRM is leading a global "We're Not Going To Take It" events next weekend, August 28th-30th.

"This is about the most basic of all human rights: control over our own bodies and health decisions," VRM states.
