

Covid Vaccine, Hazardous to Human Health? Big Pharma's Rush to Cash in on Multibillion Bonanza

By [Stephen Lendman](#)

Global Research, November 19, 2020

Theme: [Science and Medicine](#)

All vaccines are toxic and hazardous to human health.

The great covid vaccines to the rescue scheme risks widespread harm, not protection.

In cahoots with Big Government, Big Pharma prioritizes maximum profits over human health.

Drug companies are rushing to cash in big on a potential bonanza once one or more covid vaccines are approved for human use.

Toxins in vaccines cause diseases they're promoted to protect against, along with the risk of illness from other serious diseases.

Adverse reactions from vaxxing causes many deaths and disabling disorders.

Vaccines are an unreliable way to prevent illness and disease.

Proper health, personal hygiene, and sanitation practices are far more effective than mass-vaxxing.

Rushed development of covid vaccines is especially worrisome.

Vaccine development requires years of testing. Bringing them to market at "warp speed" is a red flag for avoiding what may be especially hazardous to human health.

On Friday, the [Children's Health Defense](#) (CHD) reported "safety concerns" affecting "leading covid vaccine candidates."

They're being developed with "unproven technologies, unsafe ingredients and inadequate testing."

Reports of Pfizer/BioNTech's covid vaccine effectiveness may be greatly exaggerated.

Pfizer reportedly is applying for an "Emergency Use Authorization from the US Food and Drug Administration (FDA), likely before the end of November," CHD explained.

According to Scripps Research Translational Institute's director Eric Topol:

Pfizer's "vaccine may not turn out to be as effective once the trial is complete and all the data ha(ve) been analyzed."

Is it safe, CHD asked? “Questions remain” unanswered.

“Recent publications in leading medical journals indicate that the answers to safety and efficacy questions may be less than assuring.”

It’s “illegal to mandate (mass vaxxing) under Emergency Use Authorization.”

If Big Pharma-controlled FDA approves the Pfizer and other vaccines this way, their use should be strictly “voluntary.”

In early November, the New York Bar Association passed a resolution — urging state authorities to mandate covid vaxxing, even if objected to for “religious, philosophical or personal reasons,” allowing only a medical exemption.

Attorneys who urged mandatory vaxxing of state residents ignored that such action is illegal, as explained above.

The so-called Public Readiness and Emergency Preparedness (PREP) Act (2005) lets the HHS secretary declare any disease an epidemic or national emergency, requiring mandatory vaccinations.

The HHS may “issue a declaration...that provides immunity from tort liability (except for willful misconduct) for claims of loss caused, arising out of, relating to, or resulting from administration or use of (vaccines or other pharmaceutical) countermeasures to diseases, threats and conditions determined by the secretary to constitute a present, or credible risk of a future public health emergency.”

All too often, inadequately tested/rushed to market drugs have questionable efficacy and may have dangerous side effects.

An October YouGov poll found that only 42% US respondents said they’d agree to be vaxxed for covid.

According to virologist Florian Krammer, “it will be difficult to determine if the Pfizer vaccine, or others in late-stage trials, can” block covid transmission.

Even if the vaccines work, “you have to swab people twice a week for very long periods, and that becomes operationally untenable.”

Approval of vaccines will not be based on the ability to stop covid transmission, so “we may face never-ending lockdowns,” CHD explained, an unacceptable situation.

Along with Pfizer, four other companies are rushing covid vaccine development — Moderna, J&J, Astra-Zeneca, and GlaxoSmithKline.

All received US “Operation Warp Speed” funding — dangerously cutting corners to rush vaccines to market.

Pfizer, J&J, Moderna and Astra-Zeneca reported “a high rate of adverse events,” CHD explained.

Vaccine developers face major hurdles to overcome and prove that their products “do not

cause more death and injury than the symptoms of COVID-19," CHD stressed.

Pfizer's claim of 90% vaccine effectiveness was in a news released, not a peer-reviewed medical journal.

According to Thailand Medical News, Pfizer management "spend a fortune on a PR conference and paying off numerous unethical media writers and media to do an elaborate piece" on its covid vaccine's alleged effectiveness, adding:

No peer-reviewed "published studies or data...back any of its claims."

"America has lowered the standards for vaccine approvals and efficacy...even for (other) drugs and therapeutics."

No data shows that the Pfizer vaccine "prevents severe cases, the type that can cause hospitalization and death."

Since trials have only been ongoing for a few months, "it is impossible to say how long it will protect against infection with the virus."

"(T)here are...many ways that studies (of drug efficacy) can be manipulated."

According to biotech firm Moderna, preliminary analysis claims to show that its covid vaccine is 95% effective.

According to Thailand Medical News last May, Moderna began human trials for its covid vaccine "without any previous preclinical testing for efficacy or safety."

At least three individuals involved as test subjects had adverse reactions, at least one needing urgent medical treatment.

TMN noted that Moderna never successfully brought a drug to market through required clinical trials.

The company failed to disclose data on its vaccine development, focusing instead on non-specific press release information to the public.

It doesn't publish research findings in scientific journals.

According to CHD chairman **Robert Kennedy Jr.** last week:

"Moderna is the number one, of all the 210 vaccines that are now part of Warp Speed program or trying to get into the Warp Speed program" to get US funding.

The company was given "concessions" not afforded to covid vaccine developing firms.

It was given permission to "skip animal testing and go straight to human testing."

"Moderna is using a technology that has never been used in any medicine before."

"And it's a technology that is controversial and nobody knows whether it's going to have a bad downside."

“Bill Gates...is one of the company’s funders.

If Moderna’s covid vaccine is 95% effective, it’s unknown if it’s only short-term.

If so, repeating vaxxing would be required. Unknown as well is its safety.

Does its use risk potentially serious health issues — including possibly contracting the illness it’s supposed to protect against and/or other major diseases.

RFK Jr. called Moderna — and its connection to Tony Fauci — a “racket.”

“Nobody in the world would buy (its) vaccine if they knew” the risks involved.

It has “really serious problems.” Since last May, its clinical trial “high dose group” human testing resulted in “21%” of test subjects “requir(ing) medical intervention or a hospitalization.”

Around “6% (of) low dose” subjects became ill enough to require medical treatment.

Days before Moderna announced that its covid vaccine was 95% effective, RFK Jr. said “this thing is dead on arrival.”

And yet its “market cap (went) through the roof.” Before the latest announcement sent its stock price soaring even higher, it “doubled (during a period of) 14 trading days.

“Fauci has a secret contract with the Pentagon (to) buy 500 (Moderna) doses for \$9 billion,” RFK Jr. explained.

“(I)t doesn’t matter if it works or not. It doesn’t matter if it hospitalizes 20% of the people who take it.”

“All he has to do is get an FDA approval, and the day he gets (it), that \$9 billion is his.”

Based on RFK Jr.’s remarks, Moderna’s vaccine seems more like a bioweapon than protection against any disease.

Notably in cahoots with politicians in Washington and elsewhere, drug companies seek maximum profits — even at the expense of human health.

Vaccines are notoriously hazardous.

Rushing development for mass vaxxing against covid amounts to playing Russian roulette with human health.

Instead of protecting the public from health hazards, US ruling authorities, in cahoots with Big Pharma, are promoting use of potentially dangerous vaccines ahead.

They’re acting in lieu of proved effective, widely available, inexpensive hydroxychloroquine (HCQ) when used with either azithromycin or doxycycline and zinc.

Covid is another form of seasonal flu/influenza.

Unreliable PCR tests produce many false positive results.

Failing to distinguish between seasonal flu/influenza and covid makes them a dubious diagnostic tool.

Annually in the US, tens of millions of Americans become ill from seasonal flu/influenza.

Hundreds of thousands are hospitalized. Tens of thousands die — with no pandemic fear-mongering mass hysteria, no mandatory house arrest lockdowns, no social distancing or mandated mask-wearing.

Covid should be handled the same way as seasonal flu/influenza.

If earlier in the year lockdowns are repeated again — in individual US states or nationwide — they'll do infinitely more harm than good if mandated.
