Despite tens of thousands of reported injuries and deaths, Health Canada has approved administering Pfizer’s experimental mRNA COVID injection to children six months old and up.

According to *The Canadian Press*, Health Canada says the decision came after a “thorough and independent scientific review of the evidence,” and concluded that the benefits of giving young children, who [face extremely low risk from COVID-19](#), the novel Pfizer-BioNTech’s shot outweigh the risks.

This is the second COVID injection that Health Canada has approved for babies, with the federal agency already having allowed Moderna’s Spikevax COVID jab for the same age group in July.

Regardless of the so-called approval given by various health authorities across the world, the truth remains that the official [clinical trial completion date](#) for the shots is February 8, 2024, meaning until then the jabs are experimental.

The push to vaccinate young children comes despite the fact that researchers with Johns Hopkins School of Medicine [found](#) a “mortality rate of zero among children without a pre-existing medical condition such as leukemia” when they “analyze[d] approximately 48,000 children under 18 diagnosed with Covid in health-insurance data from April to August 2020.”

This, combined with the thousands of reports of serious adverse events and deaths following the shots, has led numerous experts to [criticize the push](#) to inject children with the experimental vaccines.

In fact, recent autopsy [data shows](#) a close association between the COVID mRNA shots and heart inflammation, and two additional [medical studies from Europe](#) have recently reported a link between the jabs and blood damage.

Despite these risks, Health Canada advisers are now [recommending](#) Canadians take a “booster” injection every three months, with Prime Minister Justin Trudeau [recently threatening](#) a return of “restrictions and rules” if the public fails to do so.

The Worldwide Corona Crisis, Global Coup d'Etat Against Humanity

by Michel Chossudovsky

Michel Chossudovsky reviews in detail how this insidious project “destroys people’s lives”. He provides a comprehensive analysis of everything you need to know about the “pandemic” — from the medical dimensions to the economic and social repercussions, political underpinnings, and mental and psychological impacts.

“My objective as an author is to inform people worldwide and refute the official narrative which has been used as a justification to destabilize the economic and social fabric of entire countries, followed by the imposition of the “deadly” COVID-19 “vaccine”. This crisis affects humanity in its entirety: almost 8 billion people. We stand in solidarity with our fellow human beings and our children worldwide. Truth is a powerful instrument.”
