

Here's How the U.S. Government Will 'Calm' the Public if A Nuclear Attack Occurs

By [Mac Slavo](#)

Region: [USA](#)

Theme: [Intelligence](#), [US NATO War Agenda](#)

In-depth Report: [Nuclear War](#)

The government has already prepared some scripts to use on the terrified public should the United States ever be attacked with a nuclear weapon. The US government prepares for all sorts of threats, but none match the pomp and circumstance they'll display in the event of a nuclear explosion.

Prepared scripts for many disaster scenarios are already written ranging from [biowarfare](#) and [chemical weapons](#) to [volcanoes](#) and [wildfires](#). The good news is that the Cold War is over and a limited nuclear strike or a terrorist attack [can be survivable](#) (a direct hit notwithstanding). The bad news is that the [government's plans for survival don't really include you](#) anyway. Couple that with a [new arms race](#) which is [already underway](#), albeit [shrouded in secrecy](#), and one that may add small, portable nuclear weapons to the global stockpile. Lawmakers and experts [fear such "tactical"](#) or battlefield-ready devices (and their parts) may be easier for terrorists to obtain via theft or sale.

And even a small nuclear weapon on the ground can create a stadium-size fireball, unleash a city-crippling blastwave, and sprinkle [radioactive fallout hundreds of miles away](#). In this case, it's important to be prepared for this scenario, even if it's unlikely to play out.

According to [Business Insider](#), a nuclear terrorist attack of this magnitude is one of [15 major disaster scenarios](#) planned for by FEMA and [other US agencies](#). (The same scenario also includes a dirty bomb explosion, though such an event would be [dramatically less harmful](#).)

As part of the planning effort, the Environmental Protection Agency (EPA) maintains a [series of manuals](#) about how state and local governments should respond. A [companion document](#) anticipates 99 likely questions during a radiation emergency and scripted messages that officials can copy or adapt.

"Ideally, these messages never will be needed," the EPA says in its messaging document. "[N]evertheless, **we have a responsibility to be prepared to empower the public by effectively communicating how people can protect themselves and their families in the event of a radiological or nuclear emergency.**"

[Here's an example](#) of what the government will tell people to try to prevent widespread panic:

"Lives have been lost, people have been injured, and homes and businesses

have been destroyed. All levels of government are coordinating their efforts to do everything possible to help the people affected by this emergency. As lifesaving activities continue, **follow the instructions from emergency responders... The instructions are based on the best information we have right now;** the instructions will be updated as more information becomes available.”

So basically, they demand you follow their orders. Nothing out of the ordinary for the government. Comply and do what we say. This is why so many prepare in advance for a wide array of scenarios. That way, they don't have to “obey” and “comply with orders” or go to a FEMA camp just to survive.

Available to order from Global Research!

ISBN Number: 978-0-9737147-5-3

Year: 2012

Pages: 102

Print Edition: \$10.25 (+ shipping and handling)

PDF Edition: \$6.50 (sent directly to your email account!)

[Michel Chossudovsky](#) is Professor of Economics at the University of Ottawa and Director of the Centre for Research on Globalization (CRG), which hosts the critically acclaimed website www.globalresearch.ca. He is a contributor to the Encyclopedia Britannica. His writings have been translated into more than 20 languages.

Reviews

“This book is a ‘must’ resource – a richly documented and systematic diagnosis of the supremely pathological geo-strategic planning of US wars since ‘9-11’ against non-nuclear countries to seize their oil fields and resources under cover of ‘freedom and democracy’.”

-John McMurtry, Professor of Philosophy, Guelph University

“In a world where engineered, pre-emptive, or more fashionably “humanitarian” wars of aggression have become the norm, this challenging book may be our final wake-up call.”

-Denis Halliday, Former Assistant Secretary General of the United Nations

Michel Chossudovsky exposes the insanity of our privatized war machine. Iran is being

targeted with nuclear weapons as part of a war agenda built on distortions and lies for the purpose of private profit. The real aims are oil, financial hegemony and global control. The price could be nuclear holocaust. When weapons become the hottest export of the world's only superpower, and diplomats work as salesmen for the defense industry, the whole world is recklessly endangered. If we must have a military, it belongs entirely in the public sector. No one should profit from mass death and destruction.

-Ellen Brown, author of 'Web of Debt' and president of the Public Banking Institute
