*Heroic George Mason University law professor **Todd Zywicki** [sued his employer](#) last year over its vaccine mandate for faculty and staff. His argument was clear: he had existing (demonstrable) antibody immunity from an earlier covid infection, and thus his immunologist considered a vaccine both potentially harmful and medically unethical. The New Civil Liberties Alliance successfully represented Zywicki in US District Court, forcing school administrators to grant a medical exemption. You can hear my interview of Professor Zywicki [here](#) beginning at the 10:15 mark, and read the NCLA press release concerning his legal victory [here](#).*

“NCLA is pleased that GMU granted Professor Zywicki’s medical exemption, which we believe it only did because he filed this lawsuit. According to GMU, with the medical exemption, Prof. Zywicki may continue serving the GMU community, as he has for more than two decades, without receiving a medically unnecessary vaccine and without undue burden. Nevertheless, NCLA remains dismayed by GMU’s refusal—along with many other public and private universities and other employers—to recognize that the science establishes beyond any doubt that natural immunity is as robust or more so than vaccine immunity.” — **Jenin Younes, NCLA Litigation Counsel and lead counsel in *Zywicki v. Washington, et al.***

“I am gratified that George Mason has given me a medical exemption to allow me to fulfill my duties this fall semester in light of unprecedented circumstances. Thanks to NCLA, we have increased public awareness that vaccinating the naturally immune is medically unnecessary and presents an elevated risk of harm to Covid-19 survivors. I speak for tens of millions of Americans in the same circumstances I am in, and I call on leaders across the country to develop humane and science-based approaches as opposed to one-size-fits-all policies.” — **Todd Zywicki, George Mason University Foundation Professor of Law, Antonin Scalia Law School**
