Theme: [Science and Medicine](#)

In-depth Report: [THE H1N1 SWINE FLU PANDEMIC](#)

Vaccines are the quackery of modern medicine. Mass vaccination programs not only fail to protect the population from infectious disease, they actually *accelerate* the spread of disease in many cases.

Many website have cropped up over the last few years to counter the pro-vaccine propaganda put out by drug companies (who profit from vaccines) and health regulators (who serve the drug companies). One of those sites is www.VaccinationDebate.com , which lists the following historical facts about [vaccines](#):

- In the USA in 1960, two virologists discovered that both [polio](#) vaccines were contaminated with the SV 40 virus which causes cancer in animals as well as changes in human cell tissue cultures. Millions of children had been injected with these vaccines. (Med Jnl of Australia 17/3/1973 p555)
- In 1871-2, England, with 98% of the population aged between 2 and 50 vaccinated against smallpox, it experienced its worst ever smallpox [outbreak](#) with 45,000 deaths. During the same period in Germany, with a [vaccination](#) rate of 96%, there were over 125,000 deaths from smallpox. (<http://www.soilandhealth.org/02/020...>)
The Hadwen Documents
- In [Germany](#), compulsory mass vaccination against diphtheria commenced in 1940 and by 1945 diphtheria cases were up from 40,000 to 250,000. (Don't Get Stuck, Hannah Allen)
- In 1967, Ghana was declared [measles](#) free by the World Health Organisation after 96% of its population was vaccinated. In 1972, Ghana experienced one of its worst measles outbreaks with its highest ever mortality rate. (Dr H Albonico, MMR Vaccine Campaign in Switzerland, March 1990)
- In 1977, Dr Jonas Salk who developed the first [polio vaccine](#), testified along with other scientists, that mass inoculation against polio was the cause of most polio cases throughout the USA since 1961. (Science 4/4/77 "Abstracts")
- In the UK between 1970 and 1990, over 200,000 cases of whooping cough occurred in fully vaccinated children. (Community Disease Surveillance Centre, UK)
- In the 1970's a tuberculosis vaccine trial in India involving 260,000 people revealed that more cases of TB occurred in the vaccinated than the unvaccinated. (The Lancet 12/1/80 p73)

- In 1978, a survey of 30 States in the US revealed that more than half of the children who contracted measles had been adequately vaccinated. (The People's Doctor, Dr R Mendelsohn)
- The February 1981 issue of the [Journal of the American Medical Association](#) found that 90% of obstetricians and 66% of pediatricians refused to take the rubella vaccine.
- In 1979, Sweden abandoned the whooping cough vaccine due to its ineffectiveness. Out of 5,140 cases in 1978, it was found that 84% had been vaccinated three times! (BMJ 283:696-697, 1981)
- In the USA, the cost of a single DPT shot had risen from 11 cents in 1982 to \$11.40 in 1987. The manufacturers of the vaccine were putting aside \$8 per shot to cover legal costs and damages they were paying out to parents of brain damaged children and children who died after vaccination. (The Vine, Issue 7, January 1994, Nambour, Qld)
