Author **Edmond B. Paré** has provided a careful and incisive review of vaccine injuries reported by Hospital Nurse Whistleblowers.

\*\*\*

*Hospital nurse whistleblowers are reporting that it is mostly the vaccinated, not the unvaccinated who are going to the hospital; and, their symptoms are not the symptoms of respiratory Covid-19 patients.*

***The symptoms these nurses name are those in the list that the FDA has been hiding from the public, as well as from these healthcare workers as well as from the recipients of the Covid-19 vaccine.***

*Thus, the FDA is in violation of FDA EUA requirements, as well as FDA approved vaccine informed consent requirements (once the Comirnaty jabs start).*

For examples, please consider the following hospital nurse whistleblower interview statements:

1) September 9 – [Nurse Whistleblower: Vaccines & Remdesivir are Killing and Maiming, Not Fake Variant \[VIDEO\]](#)

Interview of a nurse who has worked with Covid patients since the start of the “pandemic”

At time = 6:43, this nurse whistleblower states, “*The influx (of patients) I have seen is since the vaccination rollout and it’s more vaccination-related injuries, umm, **blood clots, cardiac issues, neurological issues, balance issues, cognitive issues, aggressive behavior, encephalopathy**, things like that that were, that are very different from the, the previous Covid.*”

2) September 10 - [Stew Peters - BOMBSHELL Exposure ICU Nurse Says Hospital Set to Deny Care to Unvaccinated! \(9/10/21\)](#)

At time = 7:33

**Stew Peters:** Are you seeing vaccine injuries?

**ICU Nurse:** *I would like to think they're vaccine injuries. Um, again, these physicians will never acknowledge that. But, **I have never seen so many spontaneous strokes, um, deadly strokes, multiple strokes, um, bizarre rashes all over the body.** I have never seen such young people come in with cardiac arrest. I have never performed so much cardiac arrest on young people with no, no reason.*

**Stew Peters:** *So, these are previously healthy people. All of a sudden they have heart issues; They're having strokes.*

**ICU Nurse:** (Nods head in agreement)

3) September 27 - [Stew Peters With MN Nurse Megan - "I'm Watching Them Commit Murder"](#) - Interview of a 15-year hospital nurse

At time = 10:47

**Stew Peters:** *What about vaccine injuries? Are you seeing some of the things that have been reported, ah, we're seeing, ah, young people with myocarditis, heart issues; we're seeing a lot of strokes and antibody dependent enhancement. Are you seeing these things first hand in your hospital?*

**Nurse Whistleblower:** *We are seeing those things. We actually had a paramedic in our hospital die within seven days of receiving the vaccine. He had had a prior Covid infection and he had a massive heart attack within seven days of having the vaccine and, and, that, that hit home.*

*That was personal. And, um, yes, we are seeing the vaccine injuries, Stew. We're seeing an increase in strokes, an increase in MIs, pulmonary embolisms, blood clots in the legs, cognitive decline - major cognitive decline in the older population, neurological symptoms. We're seeing all of that, Stew. And, and it is, again, it is just criminal that their stories are not being told.*

4) September 20 - **Starting at time = 29:11**

[THE STEW PETERS SHOW \(9/20/2021\) FLU SHOT W/ COVID JAB! WOMAN LOSES LEGS, WHISTLEBLOWERS! \(FULL SHOW\)](#)

Interview of a 30-year nurse, currently at the Univ of Vermont Medical Center

**Stew Peters:** *Sandy says that she has questioned at least three doctors about the huge amount of anomalies that they've encountered treating Covid patients. She says that she's seen at least five patients who, in her view, are one hundred percent cases linked with the Covid vaccines. There's a young woman, a diabetic, for example, who is suddenly*

*hospitalized with her (Sandy's) first case of hyperglycemia - in a decade; a man in his early thirties with cardiac issues out of nowhere; and, then, much weirder things. A twenty-something with head to toe rashes like she's never seen before; a woman with circular rashes and bloated, purple genitalia, not terribly unlike a female version of Nicki Minaj's cousin's friend.*

### **My summary of the remaining interview:**

Shortly following the (December, 2020) Covid-19 vaccine rollouts, for the first time in this nurse's experience, "tons" of patients began presenting themselves to her hospital not with normal cases characterized by common disease symptoms, **but with symptoms she had never seen before**, not even when working in cancer related cases, **some of these symptoms being "absolutely bizarre"**.

Apparently, the CDC has instructed physicians that they are not allowed to question new patients regarding their Covid-19 vaccination status;

And, this directive is then imposed as a mandate to be followed all hospital's healthcare workers. The consequence, is that doctors are not reporting these cases to VAERS because they are frequently not in a position to establish whether these patients are vaccinated or whether the patients symptoms could be caused by the Covid-19 vaccine.

Nurses are having to beat around the bush to try to determine whether these patients have been vaccinated; but, apparently, they are successful in doing so.
