First published in April 2015. The H1N1 vaccine fiasco ordered by the (corrupt) WHO Director General is of relevance to the current debate on a COVID-19 vaccine.

\*\*\*\*

The 2009 swine flu vaccine caused severe brain damage in over 800 children across Europe, and the UK government has now agreed to pay \$90 million in compensation to those victims as part of a vaccine injury settlement.

This is the same swine flu vaccine that the entire mainstream media ridiculously insists never causes any harm whatsoever. From the quack science section of the Washington Post to the big pharma sellout pages of the New York Times, every U.S. mainstream media outlet exists in a state of total vaccine injury denialism, pushing toxic vaccines that provably harm children.

“Across Europe, more than 800 children are so far known to have been made ill by the vaccine,” reports the [International Business Times](#).

The vaccine caused narcolepsy and cataplexy in hundreds of children. Both are signs of neurological damage caused by vaccine additives which include [mercury, aluminum, MSG, antibiotics and even formaldehyde](#).

As the IBTimes reports:

Narcolepsy affects a person’s sleeping cycle, leaving them unable to sleep for more than 90 minutes at a time, and causing them to fall unconscious during the day. The condition damages mental function and memory, and can lead to hallucinations and mental illness.

Cataplexy causes a person to lose consciousness when they are experiencing heightened emotion, including when they are laughing.

See the animated educational video here: [If car companies operated like vaccine companies](#).

Children brain damaged in Norway, too

“Norway has seen more than 170 reported cases of children developing narcolepsy after receiving the Pandemrix vaccine,” reports the [Global Post](#). “The government has so far paid \$13 million to 86 victims, including 60 children...”

Just as in the USA and everywhere else, a contrived swine flu panic campaign was launched by the WHO and the CDC, creating widespread fear that would sell more vaccines. (Disneyland measles operation, anyone?)

As the Global Post write:

Back in 2009, the Norwegian health authorities urged everyone, not just at-risk groups, to receive vaccinations after the World Health Organization designated swine flu a pandemic.

More than 2 million Norwegians, or 45 percent of the country’s population, were given Pandemrix in an unprecedented drive. The vaccine is produced by GlaxoSmithKline (GSK) and was used to inoculate up to 30 million people in 47 other European countries.

Vaccine damage is Big Pharma’s route to selling more medications

Incredibly, even those children who are damaged by vaccines end up being big profit centers for the same pharmaceutical companies that damaged them in the first place.

In case after case being reported in the media, children who are damaged by defective vaccines are reported to be on multiple medications. For example, as the Global Post reports:

Tove Jensen, whose son developed severe narcolepsy after receiving the vaccine, also wants compensation from GSK.

“The situation is terrible,” she says. “He’s 100 percent disabled. We don’t know if it’s going to get better, he’s on so much medication. But we hope something will happen, that he will get his life back.”

Similarly, as the IB Times reports:

Peter Todd, a lawyer who represented many of the claimants, told the Sunday Times: “...The victims of this vaccine have an incurable and lifelong condition and will require extensive medication.”

In other words, children who are damaged by vaccines generate even more profits for Big Pharma by being damaged! It’s the perfect sinister revenue model for an industry run like a criminal mafia.

GlaxoSmithKline swine flu vaccine brain damaged medical staffers, too

“Among those affected are NHS medical staff, many of whom are now unable to do their jobs because of the symptoms brought on by the vaccine,” reports the IBTimes. “They will be suing the government for millions in lost earnings.”

The paper goes on to report:

Among [those damaged] is Josh Hadfield, 8, from Somerset, who is on anti-narcolepsy drugs costing [\$20,000] a year to help him stay awake during the school day.

“If you make him laugh, he collapses. His memory is shot. There is no cure. He says he wishes he hadn’t been born. I feel incredibly guilty about letting him have the vaccine,” said his mother Caroline Hadfield, 43.

Despite a 2011 warning from the European Medicines Agency against using the vaccine on those under 20 and a study indicating a 13-fold heightened risk of narcolepsy in vaccinated children, GSK has refused to acknowledge a link.

Pharma-controlled U.S. media claims ZERO children were harmed in America

If 800 children were brain damaged by the swine flu vaccine in the UK and across Europe, how many children were damaged by the same vaccine — or other vaccines — in America?

According to the pharma-controlled lamestream media, that number is ZERO.

Vaccine Injury Denialism — a particularly dangerous form of delusional junk science — is the present-day mantra of the pharma-controlled press, which includes all the usual suspects such as the Washington Post, New York Times, CNN and so on. They simply pretend no children are ever harmed by vaccines... and they hope the U.S. public is stupid enough to believe the lie that “all vaccines are safe.”

Right now, there are 800 children in the UK whose lives have been destroyed by the swine flu vaccine and who will never lead a normal life again. Every year, tens of thousands more children are diagnosed with autism. The vaccine industry is destroying a generation of children — committing what Robert Kennedy Jr. correctly compared to a “holocaust” — while the sellout media covers it up.

How is this not a crime against children?

Shame on all of those sellout editors and professional liars in the mainstream media who cover up the truth about an industry that’s maiming and killing our children by the thousands. Do you have no sense of humanity?
