In-depth Report: [U.S. Elections](#), [UKRAINE  
REPORT](#)

A week after pardoning two turkeys on Thanksgiving Day, President Biden pardoned his son Hunter. Hunter Biden was convicted of lying about drug use on a 2018 federal gun purchase form and evading **hundreds of thousands of dollars in taxes, including payments for escorts and sex club memberships. He was granted a full and unconditional pardon for these offences by his father, the President.** This has been the subject of criticism even in the Democratic Party.

**But nobody talks about the far more serious dirty business Hunter Biden played a leading role in. In 2014, in the aftermath of the Maidan Square coup in Ukraine, he joined the board of directors of a company set up by a gas tycoon, a former Ukrainian minister, who was trying to rebuild his image as he struggled with an international money laundering investigation. By putting the son of Joe Biden, at the time the vice-president of the Obama Administration, on the board of directors and paying him lavishly, the tycoon provides himself with effective cover for his dark dealings.**

Far more serious is the role played by **Hunter Biden in setting up a US network of biolabs in Ukraine, promoted and funded by the Pentagon.** Irrefutable evidence comes from an investigation published on 24 March 2022 by The National Pulse, a U.S. centre for investigative journalism based in Washington. Centre for Investigative Journalism: "Rosemont Seneca Technology Partners (RSTP), whose CEOs are Hunter Biden and Christopher Heinz, stepson of former Obama Secretary of State John Kerry, has in its portfolio Metabiota, a San Francisco-based company whose stated purpose is to detect, track and analyse emerging infectious diseases, working closely with Anthony Fauci's National Institute for Allergy and Infectious Disease (NIAID). "As evidenced by Metabiota's contracts with the US Department of Defense and Ukrainian bio labs, Metabiota received an \$18.4 million grant in 2014 for research projects in Ukraine, including the isolation of strains of deadly pathogens such as African swine fever virus. Researchers from Metabiota and three Ukrainian institutes have carried out the complete genome sequencing of a virulent African swine fever virus from a domestic pig in Ukraine".

As a documented investigation by the Russian Federation also shows, **it is not credible that the more than 30 bio-labs set up directly and indirectly by the United States in Ukraine were intended to conduct research on deadly viruses in**

**order to protect the Ukrainian population from them.** If that were the case, there would have been no need for more than 30 laboratories, and if the purpose was civilian, there would have been no need for the research and experiments to be commissioned by the Pentagon. An international investigation should be launched into the activities of the bio-labs in Ukraine, which are part of more than 300 bio-labs established by the US in 36 countries around the world.

Robert Kennedy Jr. made it clear in an interview with Fox News Channel host Tucker Carlson (August 2023):

*"We have biological labs in Ukraine because we develop biological weapons. These biological weapons use all kinds of new synthetic biology, genetic engineering techniques that were not available to the previous generation".*

**Against this background, the news published by the Ukrainian newspaper "Kyiv Post" comes as no surprise: the Islamic groups, already linked to Al-Qaida, that seized Aleppo in Syria were trained by the special forces of the Khimik group of the Ukrainian secret service.**

**This confirms that, as part of the US-NATO strategy, the Ukrainian war scenario is linked to the Middle East war scenario, where the war is spreading to Lebanon and Syria, while Israel is building military bases on the Gaza territory and occupying the West Bank in order to permanently erase the State of Palestine.**
