After months of planning, the Third International COVID Summit will be starting soon.

The first of these summits was held in the Italian Senate in Rome Italy, at a time when there were lockdowns and mandates across Europe, Australia, Canada, the United States, and much of Latin America. That summit was the first time that physicians and medical scientists came together from across the world to share information about the early treatment treatment plans and repurposed drug strategies that they had developed and tested in their home countries and clinical practices.

We came together over three days to share information (and great Italian food!), and friendships, bonds, collaborations and alliances were forged which have lasted throughout the COVID crisis. This event was live-streamed and it reported that it reached almost 100 million people throughout the world! A personal highlight for me was traveling to the Vatican and discussing COVID policy, vaccines and early treatment with Cardinal [Peter Turkson](#), then considered #2 in the Vatican.

However, we had one requirement which the authorities insisted we abide by - we were not allowed to discuss the vaccines in the public sessions! Despite adhering to the plan, Italian and international press attacked us for spreading mis- and dis-information, and labeled ten of us as "the dirty dozen" spreaders of vaccine and early treatment heresy.

Time passed, and the Second International COVID Summit was held in France at two locations - Massy (outside of Paris) and Marseilles. France was chosen for the second summit largely because it was planned around the anticipated attendance of Nobel Laureate Professor [Luc Montagnier](#), who unfortunately passed away prior to the meeting. Personal highlights for me with that summit was the opportunity to speak in private with Professor

Didier Raoult, who pioneered the use of hydroxychloroquine and azithromycin for treating COVID (among many other lifetime achievements), and learning about the role of his family in the French resistance to the Nazi occupation of France. The Massy rally was particularly powerful because of the participation of so many resistance leaders from across Europe, and in particular the many medical professionals who had lost their jobs and careers for not accepting the COVID vaccines.

And now, as the COVID crisis winds down and we all seek to make sense of what has been done to us, and how these atrocious “public health” policy decisions were made, we have the historic Third International COVID Summit, on invitation of members of the European Parliament, who are providing donations and support from their own personal budgets to help defray the travel expenses of those participants and speakers who have much to contribute but face financial hardship because they have spoken out against the narrative in their own countries.

This multi-day summit will begin to provide the professional and scientific analysis desperately needed to help create a new vision for public health in the future.

I hope you can join us, physically or virtually (the event will be streamed), and ask that you consider donating to the organizers who have worked so hard to make this happen, now for the third time.

Donations to support the travel costs of international speakers who otherwise cannot afford to participate, and to support venue costs, can be made at www.Internationalcovidsummit.com/donate

Background

The last three years took us all by surprise. We were separated from each other, isolated and afraid.

Now that that it seems to be coming to an end, we want to unite and combine all that we have learned from all over the world to start healing and make sure that this never happens again.

We are organizing an International COVID Summit in the European Parliament in Brussels on May 3, 2023.

This event is aimed to comprehensively and objectively look at important details surrounding COVID-19 and the pandemic.

We are planning to bring world renowned and highly revered professionals from all around the globe to Brussels in order to discuss the scientific, social, medical and legal statistics and findings of the last three years. By taking an in-depth look at this important information, these professionals can give comprehensive and positive strategies and suggestions to help us all move forward from this pandemic constructively, proactively and productively.

THIS IS THE STAGE. THIS IS OUR TIME. BRUSSELS, 2023.

They have stripped us of our rights under the guise of emergencies. They have tried to coerce us into compliance and frighten us into submission. They have punished us for asking questions and censored us for speaking truth. They have terminated us, delicensed us, discredited us, banned us and segregated us. They have tried to divide and conquer us in hopes of weakening our union. They have tried everything in their power to break us. Yet, here we still stand. A little battered and bruised but still whole, strong and, above all, united in our fight for truth and freedom.

This is the sign of true warriors. No matter what they take from us, they can never take the freedom out of our soul. They could not intimidate us into compliance. They could not scare us into silence. They could not extinguish our spirit. No matter what they tried to do, we continued to tell our truth. We did not go away.

In the most challenging moments, all we had to do was look at the quality of people standing with us on this quest to know that we could not be defeated. Standing united with us are the best and strongest warriors who live their life with the highest level of integrity and who would do it all again, no matter what it cost them. This grit and tireless pursuit for truth and freedom has now paid off.

After successfully organizing the International COVID Summit I in the Senate in Rome, Italy and the International COVID Summit II in Massy, France, we are honored to announce that The ICS Group has been invited to organize the International COVID Summit III in Brussels, Belgium.

This will be a three-day event from May 2 - May 4, 2023:

- May 2, 2023 will be a closed-door medical conference
- May 3, 2023 will be a full day of testimony in the European Parliament
- May 4, 2023 will be a public event

After years of being censored, we now have the opportunity to speak openly about true research and data on one of the biggest stages in the world. The same information that got us censored, de-platformed, delicensed, suspended and fired is now being sought. We finally have an incredible opportunity to share these facts and research as well as effective ways to move forward productively and positively. We finally have an opportunity to start healing.

Unfortunately, in order to weaken the strongest warriors, they hit us hard by aiming at our financial stability. While the warriors in us are still strong and we are still ready to fight for truth and freedom, we need some help getting to that stage.

We are asking for donations to help unite the best professionals from around the world in Brussels for this historical event. This three-day event will be focused on presenting true data and research, moving out of this pandemic stronger than before and implementing ways to make sure that this never happens again.

If you are in a position to help please donate.

All proceeds will go towards travel, venues and accommodations for these world-renowned professionals to participate in this historical event. If you are in Brussels, Belgium we welcome you to join us for the Public Event on May 4, 2023.
