An [unpublished manuscript](#) investigating the alleged cell phone calls from the 9/11 flights has recently been released by the well-known British writer and Consensus 9/11 panelist, **Rowland Morgan**.

Morgan, a former columnist for London's *The Guardian* and *The Independent*, undertook an in-depth investigation of the 9/11 phone calls in his extraordinary manuscript, *Voices*, researched from 2008 to 2010. (He also co-authored, with Ian Henshall, [Flight 93 Revealed](#), Carroll and Graf, 2006).

Voices cites an Associated Press report on April 6th, 2006, that "much of what happened aboard Flight 93 is known because passengers used cell phones in flight to call their loved ones."

However, the US government's own telephone data presented at the Moussaoui trial in 2006 showed that Moussaoui prosecutor **David Raskin** "had not studied his own evidence, which claimed only two cellular telephone calls out of some 35 ostensibly heard from Flight 93."

Morgan goes on to reveal:

"The telephone data contained more bombshells of which Moussaoui's prosecutors apparently were unaware:

- The world-famous 9/11 telephone calls from TV-pundit Barbara Olson to her husband Theodore Olson at his office in the Department of Justice had never occurred. The U.S government's call data said she made a call but did not get through. This meant that the U.S. Solicitor-General, a key member of the Bush administration, had connived at, or been deluded about, a crucial deception, one that had placed "hijackers" armed with "cardboard-cutters" aboard Flight 77 ostensibly speeding towards the Pentagon.
- The world-famous 9/11 in-flight telephone call from Todd Beamer, the one in which an Airfone operator heard him shout the Pentagon's recruitment slogan "Let's Roll", had never occurred. The U.S. government's fudged data said Beamer had made separate calls in the same second.

Because the existence of hijackers aboard the rogue planes partly relied on them, the collapse of these two vital telephone calls alone badly damaged the U.S. Government's 9/11 conspiracy theory."

The full manuscript for Rowland Morgan's brilliant study of all the alleged 9/11 cell phone calls, [Voices, is available on the 9/11 Consensus Panel's website](#).
