[Big Tech's Effort to Silence Truth-tellers: Global Research Online Referral Campaign](#)

On Sunday, the Euro-Med Human Rights Monitor reported that the [Israeli Occupation Forces \(IOF\)](#) have escalated its premeditated murders, extrajudicial executions, and judicial killings against Palestinian civilians through direct targeting with snipers and drones in various regions of the Gaza Strip.

According to Euro-Med Monitor, Israel is killing Palestinians on a large scale through artillery and aerial strikes and by speeding up the execution of extrajudicial killings. These actions amount to war crimes and crimes against humanity under the Rome Statute Basic Law of the [International Criminal Court](#) (ICC).

Euro-Med Monitor has documented numerous Israeli sniping operations, killings, and executions that have primarily targeted civilians in shelter centers, hospitals, streets, and populated residential areas.

One of these incidents occurred on February 4 when an Israeli "quadcopter" drone shot and killed 49-year-old Palestinian citizen Jihad Muhammad Al-Dardasawi from Al-Turkman neighborhood in the Shuja'iyah area east of Gaza City. The preliminary analysis of Dardasawi's body revealed that he had been the target of direct fire, sustaining multiple puncture wounds, including at least four in the back and one in the thigh.

Akram Al-Dardasawi informed the [Euro-Med Monitor](#) team that his brother Jihad was killed by Israeli gunfire while riding his bicycle from his home to the Shifa Medical Complex in Gaza City to deliver food to their injured brother. He added that Jihad was subsequently buried in the yard of one of the shelter schools east of [Gaza City](#).

At least eight Palestinians were reportedly killed in Israeli sniper and shooting operations in various parts of the southern Gaza Strip city of Khan Yunis during the early hours of yesterday, Friday, according to reports received by Euro-Med Monitor.

Reports reached Euro-Med Monitor on Thursday afternoon regarding the recuperation of the bodies of six individuals and their transfer to the Nasser Hospital in Khan Yunis, southern Gaza Strip, after they were shot dead by IOF snipers while attempting to obtain drinking water near the hospital.

On the same day, Euro-Med Monitor received reports of the deaths of two Palestinians and the grave injury of a third after an Israeli quadcopter drone opened fire at a refugee school near the Al-Awda schools, east of Khan Yunis.

On Wednesday morning, Euro-Med Monitor teams documented the death of a 14-year-old girl, Ru'a Atef Qadeeh, who was shot by IOF snipers in front of the Nasser Hospital gate. The teen was attempting to fetch water from a nearby location.

The Euro-Med Human Rights Monitor also reported that, on February 4, just before noon, Muhammad Diab Abdel Qader Barhoum was shot and killed by a quadcopter drone as he was heading to Al-Nasr town, north of Rafah City, to feed his sheep.

On February 2, IOF snipers stationed near the [Palestinian Red Crescent Society](#) (PRCS) in Khan Yunis killed four Palestinians, including Hadaya Hamad, the director of the Youth and Volunteers Department.

On January 31, an IOF sniper shot and killed the security guard at the PRCS-run Al-Amal Hospital in Khan Yunis while he was standing close to the hospital's back door.

Since the beginning of the Israeli military attack on the Gaza Strip, along with the ground incursions that started at the end of last October, hundreds of Palestinian civilians have been killed or wounded by Israeli snipers and quadcopter drones.

The IOF has started to use quadcopter drones in a systematic and widespread manner, according to testimonies gathered by Euro-Med Monitor, to carry out extrajudicial executions and premeditated killings of Palestinian civilians. These drones are used in particular against civilians who attempt to return and inspect their homes after the IOF retreats from the area where incursions and raids have occurred.

According to the Palestinian health ministry, medical workers noticed that the bodies of most victims of executions and field killings showed evidence of unusual gunshots, differing from ordinary gunshots in that they leave a different shape on the victim's body when they penetrate it, as they are not bullets fired from rifle-type weapons but from quadcopter drones.

The IOF converted this drone, which was originally designed for photography, into an air weapon for intelligence gathering and subsequently utilized it for the deliberate and direct execution of unlawful targets.

Developed by Israeli military industries, the quadcopter drones are one-meter-diameter drones with various characteristics and tactical features. They are easy to program and operate electronically remotely, with a design akin to that of helicopters.

These drones have very precise eavesdropping instruments and high-quality cameras. They can carry out additional military duties like shooting and carrying bombs, and they can be modified to become suicide drones.

In a primary report submitted to UN special rapporteurs and the Prosecutor of the ICC, Euro-Med Human Rights Monitor documented, last December, dozens of cases of field executions carried out by the IOF in the Gaza Strip. The human rights group requested an immediate investigation into these crimes, calling for the perpetrators to be held accountable and for justice for all victims.

The rights organization called on the aforementioned parties to take a position opposing the widespread killing operations carried out by the IOF targeting Palestinian civilians, especially the field executions and physical liquidations in the Gaza Strip.

In addition, Euro-Med Monitor demanded the establishment of an international legal team, a commitment to secure its entry into the Gaza Strip, and the initiation of an inquiry into these and other instances of Palestinian civilians being killed by the IOF.

Euro-Med Human Rights Monitor reiterated that the UN special rapporteurs and the ICC Prosecutor must launch international human rights committees that would visit the Strip and document the magnitude of Israel's crimes against Palestinian civilians.

Euro-Med Human Rights Monitor stressed that these Israeli executions violate international standards and the right to life stipulated in Article 3 of the Universal Declaration of Human Rights, plus Article 6 of the International Covenant on Civil and Political Rights, which stipulates that "every human being has the inherent right to life. This right shall be protected by law. No one shall be arbitrarily deprived of his life."
