

Is America's Presidential Election Rigged for Hillary?

By [Stephen Lendman](#)

In-depth Report: [U.S. Elections](#)

Global Research, November 06, 2016

Power brokers infesting America's deep state decide who'll hold all top government posts. Voters believing their say matters don't understand how things work.

Elections are exercises in deception, especially for the nation's highest office. Future incumbents are vetted well in advance to assure they'll continue dirty business as usual.

Duopoly power runs things with two right wings, not a dime's worth of difference between undemocratic Democrats and Republicans.

Trump isn't anti-establishment. He just sounds that way. He didn't get to be a billionaire by being a good guy, especially headquartered in New York, America's financial capital, home to Wall Street, the epicenter of corrupt financial power, controlling the nation's money, the lever controlling government and business.

Hillary was chosen last year to succeed Obama before announcing her candidacy. Throughout the campaign, things haven't gone as planned. Trump surprisingly emerged last man standing among 17 Republican aspirants.

Sanders didn't run to win - merely to create the appearance of a contest for the Democrat nomination, knowing Hillary would emerge triumphant, primaries rigged to assure it.

So what to expect on November 8? Are things rigged for Hillary - despite her baggage, most voters calling her a liar, dishonest and untrustworthy?

Pollster Doug Kaplan says "(e)very four years, there is a surge at the end by the Republican nominee, like muscle memory kicking in that in some years is enough and some is not."

Pollster Pat Caddell said Trump has momentum. "The whole country is in motion, and states in play are going all together." The election is up for grabs, he believes with up to 12% of the electorate "floating" between the two candidates.

Guccifer 2.0, responsible for hacking DNC emails for WikiLeaks, he claimed, "warn(ed) that the Democrats may rig the elections on November 8."

"This may be possible because of the software installed in the FEC networks by the large IT companies," he said. "(T)heir software is of poor quality, with many holes and vulnerabilities."

I have registered in the FEC electronic system as an independent election observer; so I will monitor that the elections are held honestly.

I also call on other hackers to join me, monitor the elections from inside and inform the US society about the facts of electoral fraud.

According to [Black Box Voting](#), the GEMS election management system counts about 25% of all votes in US elections.

“(A) fractional vote feature is embedded in each GEMS application which can be used to invisibly, yet radically, alter election outcomes by pre-setting desired vote percentages to redistribute votes,” it explained.

This tampering is not visible to election observers, even if they are standing in the room and watching the computer. Use of the decimalized vote feature is unlikely to be detected by auditing or canvass procedures...

After polls close on November 8, we’ll know whether Hillary or Trump emerged triumphant. He could win if power brokers, at the 11th hour, decided Hillary’s baggage left her too tainted to serve, got Trump to assure he’ll support their agenda, and intend making him Obama’s successor by fair or foul means.
