*Reports coming out of Israel claim hospitals are being filled with vaccinated people, 95 percent of whom are suffering serious illness being fully vaccinated.*

“I understand that most of the patients are vaccinated, even ‘severe’ patients. Exactly. Naturally occurring. Old people, most of them are vaccinated,” Israeli Dr. Kobi Haviv told *News Israel* 13 Thursday.

"95% of the severe patients are vaccinated".

"85-90% of the hospitalizations are in Fully vaccinated people."

"We are opening more and more COVID wards."

"The effectiveness of the vaccine is waning/fading out"

“Most of the population is vaccinated, and 90%... 85%-90% of the hospitalizations here are ‘Fully vaccinated’ people.”

Dr. Haviv claims the infections mean the vaccines’ “effectiveness” is fading, possibly setting up a scenario where booster shots emerge as a necessary treatment.

The news out of Israel coincides with similar statistics coming out of [Sydney, Australia](#), where government health officials late last month announced nearly all new Covid hospitalizations involve vaccinated people - except one.

The same phenomenon is being observed across the globe as the vaccine propaganda ratchets up in response to the dreaded Delta variant.

In [Singapore](#):

The image shows a screenshot of a Reuters news article. At the top left is the Reuters logo. A navigation bar at the top right lists categories: World, Business, Legal, Markets, Breakingviews, Technology, Investigations, and Sport. The article is dated July 23, 2021, at 7:47 AM CDT, and was last updated 7 days ago. The headline is 'Vaccinated people make up 75% of recent COVID-19 cases in Singapore, but few fall ill'. The author is Aradhana Aravindan, Chen Lin. Below the headline are social media sharing icons for Facebook, Twitter, a link icon, and an email icon. The bottom of the article features a blurred image of a person's hand.

In England:

BREAKING: Figures from Public Health England say 55% of people hospitalised with the delta variant were unvaccinated, while nearly 35% had received two doses of a vaccine.

— Sky News (@SkyNews) [August 6, 2021](#)

In [Gibraltar](#):

By June 1, over 99% of Gibraltar's population was fully vaccinated.

Since that time, new COVID cases per day have increased more than 2500%. <pic.twitter.com/LLqGz6ofiW>

— Michael P Senger (@MichaelPSenger) [July 29, 2021](#)

And in [Iceland](#):

1/ Meanwhile, back to Iceland for a minute.

The country is a vaccinators' paradise. 90% of people 40-70 and 98% (!) of those over 70 are fully vaccinated.

On June 26, it abolished all lockdown rules. "Thank you for this joint struggle," the Health Minister said.

Alas. <https://t.co/T76xcpzX20>

— Alex Berenson (@AlexBerenson) [July 27, 2021](#)

In the US, there's been over 4,100 so-called "breakthrough cases" in fully vaccinated people as of last month - with the pro-vaccine narrative shifting to claim the illnesses aren't as severe as those of unvaccinated people.

The screenshot shows a Forbes article header. At the top left is the Forbes logo. To the right are 'Subscribe' and 'Sign In' buttons. Below the logo, the date and time 'Jun 26, 2021, 02:26pm EDT | 461,018 views' are displayed. The main headline reads 'CDC: 4,115 Fully Vaccinated Have Been Hospitalized Or Died With Breakthrough Covid-19 Infections'. Below the headline is a black rectangular placeholder for an image. The author's name 'Bruce Y. Lee Senior Contributor' is shown with a 'Follow' button. A bio for Bruce Y. Lee follows: 'Healthcare I am a writer, journalist, professor, systems modeler, computational and digital health expert, avocado-eater, and entrepreneur, not always in that order.'

As more and more vaccinated people become sick with the very illness they're supposed to be protected against, will the vaccine manufacturers ever be held responsible for spreading disease?
